Black Africa 2vol:

Black Africans in Renaissance Europe T. F. Earle, K. J. P. Lowe, 2005-05-26 This highly original book opens up the almost entirely neglected area of the black African presence in Western Europe during the Renaissance. Covering history, literature, art history, and anthropology, it investigates a whole range of black African experience and representation across Renaissance Europe from various types of slavery to black musicians and dancers from real and symbolic Africans at court to the views of the Catholic Church and from writers of African descent to Black African criminality. Their findings demonstrate the variety and complexity of black African life in fifteenth and sixteenth century Europe and how it was affected by firmly held preconceptions relating to the African continent and its inhabitants reinforced by Renaissance ideas and conditions. Of enormous importance both for European and American history, this book mixes empirical material and theoretical approaches and addresses such issues as stereotypes, changing black African identity, and cultural representation in art and literature.

African American Southerners in Slavery, Civil War and Reconstruction Claude H. Nolen, 2005-08-29 This work documents the many roles filled by Southern blacks in the last decades of slavery, the Civil War years, and the following period of Reconstruction. African Americans suffered and resisted bondage in virtually every aspect of their lives but persevered through centuries of brutality to their present place at the center of American life. Utilizing statements made by former slaves and other sources close to them, the author takes a close look at the culture and lifestyle of this proud people in the final decades of slavery, their experiences of being in the military and fighting in the Civil War, and the active role taken by the Southern blacks during Reconstruction.
