Turner,2010-05-06 While many books decry the crisis in the schooling of African American children they are often disconnected from the lived experiences and work of classroom teachers and principals In *Change Is Gonna Come* the authors look back to go forward providing specific practices that K 12 literacy educators can use to transform their schools The text addresses four major debates the fight for access to literacy supports and roadblocks to success best practices theories and perspectives on teaching African American students and the role of African American families in the literacy lives of their children Throughout the authors highlight the valuable lessons learned from the past and include real stories from their own diverse family histories and experiences as teachers parents and community members **Wounds That Will Not Heal** Russell K Nieli,2012-11-20 Racial preference policies first came on the national scene as a response to black poverty and alienation in America as dramatically revealed in the destructive urban riots of the late 1960s From the start however preference policies were controversial and were greeted by many including many who had fought the good fight against segregation and Jim Crow to further a color blind justice with a sense of outrage and deep betrayal In the more than forty years that preference policies have been with us little has changed in terms of public opinion as polls indicate that a majority of Americans continue to oppose such policies often with great intensity In *Wounds That Will Not Heal* political theorist Russell K Nieli surveys some of the more important social science research on racial preference policies over the past two decades much of which he shows undermines the central claims of preference policy supporters The mere fact that preference policies have to be referred to through an elaborate system of euphemisms and code words affirmative action diversity goals and timetables race sensitive admissions tells us something Nieli argues about their widespread unpopularity their tendency to reinforce negative stereotypes about their intended beneficiaries and their incompatibility with core principles of American justice Nieli concludes with an impassioned plea to refocus our public attention on the truly disadvantaged African American population in our nation s urban centers the people for whom affirmative action policies were initially instituted but whose interests Nieli charges were soon forgotten as the fruits of the policies were hijacked by members of the black and Hispanic middle class Few will be able to read this book without at least questioning the wisdom of our current race based preference regime which Nieli analyses with a penetrating gaze and an eye for cant that will leave few unmoved Race and Class Matters at an Elite College Elizabeth Aries,2008-09-28 How race and class collide at a prestigious liberal arts college **Truth and Knowledge in Curriculum Making** Lobat Asadi,Cheryl J. Craig,2021-01-01 *Truth and Knowledge in Curriculum Making* addresses issues in curriculum and instruction such as the lack of Black teachers minority representation and mentorship The book arose from a serial interpretation of five published narrative

inquiries that pinpointed complexities lived in a teacher knowledge community at T P Yaeger Middle School a campus located in the fourth largest urban center in America The inquiry initially resulted in a documentary style presentation at an educational conference using performance narrative inquiry as an arts based method to recount the research In Truth and Knowledge in Curriculum Making the process of researchers turned actors is unraveled by looking at the lived experiences and identifying the embodied knowledge of teachers in different content areas including Physical Education Music Teaching English as a Second Language Mathematics and Reading The authors use parallel stories counter stories story constellations musical narrative inquiry performance narrative inquiry and other narrative means of sense making as they examine how they may relate to those stories Ethical research dilemmas including the how and why behind each author s choice to burrow into difficult topics such as race gender and conflict resolution are revealed By unpacking the hidden curriculum examining value creation and by revealing isolated relational experiences of participants and researchers Truth and Knowledge in Curriculum Making instantiates and outlines how truth and knowledge may be formed in educational settings through intertwining narrative inquiry teacher knowledge and aesthetic ways of knowing

Beyond Human Nature Jesse J. Prinz, 2015-11-09 A loud counterblast to the fashionable faith of our times that human nature is driven by biology urgent and persuasive Sunday Times London In this era of genome projects and brain scans it is all too easy to overestimate the role of biology in human psychology But in this passionate corrective to the idea that DNA is destiny Jesse Prinz focuses on the most extraordinary aspect of human nature that nurture can supplement and supplant nature allowing our minds to be profoundly influenced by experience and culture Drawing on cutting edge research in neuroscience psychology and anthropology Prinz shatters the myth of human uniformity and reveals how our differing cultures and life experiences make each of us unique Along the way he shows that we can't blame mental illness or addiction on our genes and that societal factors shape gender differences in cognitive ability and sexual behavior A much needed contribution to the nature nurture debate *Beyond Human Nature* shows us that it is only through the lens of nurture that the spectrum of human diversity becomes fully and brilliantly visible
