Black Americans In World War II:

The Afro-American and the Second World War Neil A. Wynn, 1976 The definitive account of black Americans in World War II and its aftermath The Afro American and the Second World War has been expanded to include the wartime experience of black women how demographic change reshaped the South and other issues In addition to providing a close look at the African American experience in the armed forces the author discusses the widespread wartime discrimination at glaring odds with American claims to social equality and democracy the resulting war on two fronts in which black newspapers literature and songs reiterated the demand for equal citizenship rights the psychological impact of the war and the protest campaigns launched by blacks during these years

Black Americans in World War II Albert Russell Buchanan, 1977 The struggle of African Americans for equality coalesced during the period of World War II but the commitment of the government to winning the war left little time for social protest or the breaking of racial barriers As a result African Americans advanced considerably in momentum but were given little legislation to support these gains The author examines the role of African Americans in the military advances made by African Americans through the judicial system the status of African American women during the war periods of racial violence and the relationship of African Americans to organized labor

The African American Experience during World War II Neil A. Wynn, 2010-05-16 Drawing on more than thirty years of teaching and research Neil A Wynn combines narrative history and primary sources as he locates the World War II years within the long term struggle for African Americans equal rights It is now widely accepted that these years were crucial in the development of the emerging Civil Rights movement through the economic and social impact of the war as well as the military service itself Wynn examines the period within the broader context of the New Deal era of the 1930s and the Cold War of the 1950s concluding that the war years were neither simply a continuation of earlier developments nor a prelude to later change Rather this period was characterized by an intense transformation of black hopes and expectations encouraged by real socio economic shifts and departures in federal policy Black self consciousness at a national level found powerful expression in new movements from the demand for equality in the military service to changes in the shop floor to the Double V campaign that linked the fight for democracy at home for the fight for democracy abroad As the nation played a new world role in the developing Cold War the tensions between America s stated beliefs and actual practices emphasized these issues and brought new forces into play More than a half century later this book presents a much needed up to date short and readable interpretation of existing scholarship Accessible to general and student readers it tells the story without jargon or

theory while including the historiography and debate on particular issues *Encyclopedia of African American History, 1896 to the Present* Paul Finkelman, 2009 Alphabetically arranged entries from A to C that explores significant events major persons organizations and political and social movements in African American history from 1896 to the twenty first century

African American Urban History since World War II Kenneth L. Kusmer, Joe W. Trotter, 2009-08-01 Historians have devoted surprisingly little attention to African American urban history of the postwar period especially compared with earlier decades Correcting this imbalance African American Urban History since World War II features an exciting mix of seasoned scholars and fresh new voices whose combined efforts provide the first comprehensive assessment of this important subject The first of this volume's five groundbreaking sections focuses on black migration and Latino immigration examining tensions and alliances that emerged between African Americans and other groups Exploring the challenges of residential segregation and deindustrialization later sections tackle such topics as the real estate industry's discriminatory practices the movement of middle class blacks to the suburbs and the influence of black urban activists on national employment and social welfare policies Another group of contributors examines these themes through the lens of gender chronicling deindustrialization's disproportionate impact on women and women's leading roles in movements for social change Concluding with a set of essays on black culture and consumption this volume fully realizes its goal of linking local transformations with the national and global processes that affect urban class and race relations **We the ^Black People: Untold Truths of Black**
