Transatlantic Energy Relations John R. Deni, Karen Smith Stegen, 2016-04-08 Recent upheaval in the global energy system dramatic increases in demand led largely by developing countries significant decreases in supply as a result of local or regional conflicts and the growing nexus between the burning of hydrocarbons and climate change has unsettled long held notions of energy security For many years transatlantic cooperation helped undergird the system s stability but Europe and

North America have drifted apart in several key ways potentially undermining the search for energy sufficiency surety and sustainability Will the transatlantic partners continue on separate paths in the face of dramatic change in the global energy system or does the breadth and depth of the challenges they confront compel them to work more closely together In this edited volume experts from across Europe and North America including advisors to the executive and legislative branches of both the EU and the United States to senior military commanders and to major international organizations and companies examine the most salient facets of the transatlantic energy relationship and discern whether that relationship is characterized by growing convergence or divergence This book was based on a special issue of the Journal of Transatlantic Studies

Power, Energy, and the New Russian Imperialism Anita Orban,2008-09-30 Russia is the world s foremost energy superpower rivaling Saudi Arabia as the world s largest oil producer and accounting for a quarter of the world s exports of natural gas Russia s energy reserves account for half of the world s probable oil reserves and a third of the world s proven natural gas reserves Whereas military might and nuclear weapons formed the core of Soviet cold war power since 1991 the Russian state has viewed its monopolistic control of Russia s energy resources as the core of its power now and for the future Since 2005 the international news has been filled with Russia s repeated demonstrations of its readiness to use price transit fees and supply of gas and oil exports as punitive policy instruments against recalcitrant states that were formerly part of the Soviet Union striking in turn the Ukraine Georgia Azerbaijan Armenia Belarus and Lithuania Orban reveals for the first time in Power Energy and the New

Russian Imperialism Russia's readiness to wield the same energy weapon against her neighbors on the west all of them former Soviet satellite states but now EU and NATO member nations the three Baltic nations and the five East European nations of Poland Slovakia Hungary the Czech Republic and Slovenia Orban shows how the Kremlin since 1991 has systematically used Russian energy companies as players in a concerted neo mercantilist energy based foreign policy designed to further Russia's neo imperial ambitions among America's key allies in Central East Europe Her unprecedented analysis is key to predicting Russia's strategic response to American negotiations with Poland and the Czech Republic to host the US missile shield She also reveals the economic and diplomatic *modus operandi* by which Russia will increasingly apply its energy clout to shape and coerce the foreign policies of the West European members of the EU as Russia's contribution to EU gas consumption increases from a quarter today to three quarters by 2020 Orban proves that Russia's neo mercantilist energy strategy in East Europe is not at all dependent on the person of Putin but began under Yeltsin and continues under Medvedev the former chairman of Gazprom *Обратный эффект санкций. Как санкции меняют мир не в интересах США* Arara Демаре, 2024-06-14 COVID 19 *The West European Allies, the Third World, and U.S. Foreign Policy* Richard Payne, 1991-10-07 Payne provides a comprehensive analysis of the underlying tensions as well as cooperation between the U S and NATO countries in out of area conflicts *The American Economic Review* ,1987 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association **International Summitry and Global Governance** Emmanuel Mourlon-Druol, Federico Romero, 2014-03-05 This volume is the first detailed study of the emergence of regular and frequent heads of government meetings summits covering the period from the mid 1970s to the early 1990s Summit meetings of heads of government have become banal in today's world Yet they are a relatively recent practice that took off only in the mid 1970s The aim of the book is to explore the origins of this new feature of global governance in its historical context Why did heads of Western governments decide to regularly meet up in the European Council and the G7 What were they aiming at How were these meetings run and what consequences did they have How did other actors of international relations states as well as non state and or transnational actors react to this transformation Based on newly released archival material *International Summitry and Global Governance* investigates the rise of regular international summitry and its impact on international relations The volume brings together the best specialists of this new field of historical enquiry in order to explore those features of global governance in their historical context and open up an interdisciplinary dialogue with social scientists who have studied summits from their own disciplinary perspectives This book will be of much interest to students of international history Cold War studies global governance foreign policy and IR in general **Europe Since 1945** Mary Fulbrook, 2001 This text brings home the waves of transformation that have washed across Europe in the second half of the 20th century sketching out general patterns of this change and exploring some of the local themes and variations in parts of Europe *States, Firms,*

and Power George E. Shambaugh, 1999-08-12 Analyses the effectiveness of economic sanctions as instruments of statecraft

Natural Gas and Geopolitics David G. Victor, Amy M. Jaffe, Mark H. Hayes, 2006-06-29 By most estimates global consumption of natural gas a cleaner burning alternative to coal and oil will double by 2030 However in North America Europe China and South and East Asia which are the areas of highest expected demand the projected consumption of gas is expected to far outstrip indigenous supplies Delivering gas from the world's major reserves to the future demand centres will require a major expansion of inter regional cross border gas transport infrastructures This book investigates the implications of this shift utilizing historical case studies as well as advanced economic modelling to examine the interplay between economic and political factors in the development of natural gas resources The contributors aim to shed light on the political challenges which may accompany a shift to a gas fed world
