Almost Japanese:

Fighting for Foreigners Apichai W. Shipper, 2016-03-08 Although stereotypically homogenized and hostile to immigrants Japan has experienced an influx of foreigners from Asia and Latin America in recent decades In *Fighting for Foreigners* Apichai W Shipper details how in response Japanese citizens have established a variety of local advocacy groups some faith based some secular to help immigrants secure access to social services economic equity and political rights Drawing on his years of ethnographic fieldwork and a pragmatic account of political motivation he calls associative activism Shipper asserts that institutions that support illegal foreigners make the most dramatic contributions to democratic multiculturalism The changing demographics of Japan have been stimulating public discussions the political participation of marginalized groups and calls for fair treatment of immigrants Nongovernmental organizations established by the Japanese have been more effective than the ethnically particular associations formed by migrants themselves Shipper finds Activists who initially work in concert to solve specific and local problems eventually become more ambitious in terms of political representation and opinion formation As debates about the costs and benefits of immigration rage across the developed world Shipper's research offers a refreshing new perspective rather than undermining democracy in industrialized society immigrants can make a positive institutional contribution to vibrant forms of democratic multiculturalism **Global Japan** Roger

Goodman, Ceri Peach, Ayumi Takenaka, Paul White, 2005-06-27 The Japanese have long regarded themselves as a homogenous nation clearly separate from other nations However this long standing view is being undermined by the present international reality of increased global population movement This has resulted in the establishment both of significant Japanese communities outside Japan and of large non Japanese minorities within Japan and has forced the Japanese to re conceptualise their nationality in new and more flexible ways This work provides a comprehensive overview of these issues and examines the context of immigration to and emigration from Japan It considers the development of important Japanese overseas communities in six major cities worldwide the experiences of immigrant communities in Japan as well as assessing the consequences for the Japanese people's view of themselves as a nation **Lesbians in East Asia** Diana Khor, Saori

Winters, 2009 Taking the example of the nuclear bombing of Hiroshima as a case in point Francis Winters analyzes the ethics of warfare demonstrating how the examples of World War II hold relevance to the contemporary world Unique in concept and approach the volume links events from WWII with the modern day war on terror and the impact of the September 11 2001 assaults on America **Why Place Matters** Saburo Horikawa, 2021-05-31 This book is based on the author's 33 years of intensive fieldwork It chronicles a major movement that shaped the preservation policy in Japan in the 1980s and 1990s

providing thick descriptions of preservationists that are not available anywhere else in English It also provides clear answers to a series of pressing questions about preservationists are they building huggers are they selfish and myopic home owners or are they merely obstacles to urban planning and urban renewal Since 1984 Saburo Horikawa Professor of Sociology at Hosei University in Tokyo has continuously studied the movement to preserve the Otaru Canal in Otaru Japan This book shows that the preservation movement was neither conservative nor an obstacle Rather the movement sought to promote changes in which the residents place would continue to be theirs As such the word preservation does not mean the prevention of growth and development but rather its control As is shown in this study preservation allows for and can even promote change The original Japanese version of this book published by the University of Tokyo Press has won 3 major academic awards most notably The Ishikawa Prize the highest award bestowed by the City Planning Institute of Japan It is extremely unusual that a sociology book should receive such important recognition from the city planning discipline
