Pae, 2020-10-14 This open access volume reveals the hidden power of the script we read in and how it shapes and drives our minds ways of thinking and cultures Expanding on the Linguistic Relativity Hypothesis i.e. the idea that language

affects the way we think this volume proposes the Script Relativity Hypothesis i.e the idea that the script in which we read affects the way we think by offering a unique perspective on the effect of script alphabets morphosyllabaries or multi scripts on our attention perception and problem solving Once we become literate fundamental changes occur in our brain circuitry to accommodate the new demand for resources The powerful effects of literacy have been demonstrated by research on literate versus illiterate individuals as well as cross scriptal transfer indicating that literate brain networks function differently depending on the script being read This book identifies the locus of differences between the Chinese Japanese and Koreans and between the East and the West as the neural underpinnings of literacy To support the Script Relativity Hypothesis it reviews a vast corpus of empirical studies including anthropological accounts of human civilization social psychology cognitive psychology neuropsychology applied linguistics second language studies and cross cultural communication It also discusses the impact of reading from screens in the digital age as well as the impact of bi script or multi script use which is a growing trend around the globe As a result our minds ways of thinking and cultures are now growing closer together not farther apart

Isermann, 2025-03-20 The Alphabetisation of Thought is a bold and original study about the rise spread and dominance of orthographic thinking in the Early Modern period Starting out as a local grammatical mode of thinking it soon gained momentum strength and depth turning into a development that provoked a wholesale reorganisation of thought along the lines of alphabetical writing The study brings together an unprecedented range of texts from areas as diverse as grammar epistemology classical scholarship natural philosophy and cryptography A major source of evidence is Locke's doctrine of ideas as laid out in his Essay Concerning Human Understanding Echoing the orthographic debate of the preceding 150 years it affords not only crucial insight into the final stages of the alphabetisation process but also glimpses of its legacy

Visual Processes in Reading and Reading Disabilities Dale M. Willows, Richard Kruk, Evelyne Corcos, 2012-12-06 Over the last 25 years reading processes have been the focus of an enormous amount of research in experimental psychology as well as in other disciplines The theories and models emerging from this research have greatly advanced understanding of both normal acquisition and of reading disabilities Although great progress has been made there are certain aspects that have been relatively neglected in the current understanding Specifically the role of visual factors has received less attention than that of other component processes This is particularly surprising since reading and writing are distinct from the other language processes of speaking and listening in large part by virtue of the fact that a visual dimension is involved Relevant research is broadly scattered both geographically and in terms of disciplines and there have been no major reviews or books concerned with the visual dimension of reading and reading disabilities The purpose of

this book is to bring together a broad range of evidence that concerns the role of visual information in reading and reading disabilities Because reading processes are of central interest to cognitive scientists neuropsychologists psycholinguists clinicians and educators this book should draw a very broad readership     The Handbook of Mathematical Cognition Jamie I.D.
