Civilization and Empire Shogo Suzuki, 2009-02-02 This book critically examines the influence of International Society on East Asia and how its attempts to introduce civilization to barbarous polities contributed to conflict between China and Japan Challenging existing works that have presented the expansion of European International Society as a progressive linear process this book contends that imperialism along with an ideology premised on civilising barbarous peoples played a central role in its historic development Considering how these elements of International Society affected China and Japan's entry into it Shogo Suzuki contends that such states envisaged a Janus faced International Society which simultaneously aimed for cooperative relations among its civilized members and for the introduction of civilization towards non European polities often by coercive means By examining the complex process by which China and Japan engaged with this dualism this book highlights a darker side of China and Japan's socialization into International Society which previous studies have failed to acknowledge Drawing on Chinese and Japanese primary sources seldom utilized in International Relations this book makes a compelling case for

revising our understandings of International Society and its expansion This book will be of strong interest to students and researcher of international relations international history European studies and Asian Studies **Mediating Globalization**

Andrew P. Cortell, 2012-02-01 Has globalization fundamentally altered international relations producing a race to the bottom in which states compete for economic growth and development by adopting similar liberal economic strategies Mediating Globalization challenges this increasingly dominant perspective demonstrating that national governments often respond to global competitive pressures with more not less economic intervention Using interviews archival research and secondary sources Andrew P Cortell explores the strategies adopted by the United States and Britain with regard to one of the world's most globalized sectors the semiconductor industry From the early 1970s through the mid 1990s he argues increasing globalization pressures in each country led them to more actively intervene in the evolution of their semiconductor markets rather than assume a more marginal role The empirical evidence moreover indicates that the two countries adopted similar responses whether liberal or interventionist as a consequence of similar domestic institutional incentives rather than constraints identified to emerge from globalization **The Social Sources of Financial Power** Leonard

Seabrooke, 2018-07-05 A state's financial power is built on the effect its credit property and tax policies have on ordinary people this is the key message of Leonard Seabrooke's comparative historical investigation which turns the spotlight away from elite financial actors and toward institutions that matter for the majority of citizens Seabrooke suggests that everyday contests between social groups and the state over how the economy should work determine the legitimacy of a state's financial and fiscal system Ideally he believes such contests compel a state to intervene on behalf of people below the median income level leading the state to broaden and deepen its domestic pool of capital while increasing its influence on international finance But to do so Seabrooke asserts a state must first challenge powerful interests that benefit from the concentration of financial wealth Seabrooke's novel constructivist approach is informed by economic sociology and the work of Max Weber This book demonstrates how domestic legitimacy influences the character of international financial orders It will interest all readers concerned with how best to transform state intervention in the economy for the good of the majority

The Politics of Inclusion and Exclusion David Ericson, 2011-01-26 Assessing the limits of pluralism this book examines different types of political inclusion and exclusion and their distinctive dimensions and dynamics Why are particular social groups excluded from equal participation in political processes How do these groups become more fully included as equal participants Often the critical issue is not whether a group is included but how it is included Collectively these essays elucidate a wide range of inclusion or exclusion voting participation representation in legislative assemblies representation of group interests in processes of policy formation and implementation and participation in discursive processes of policy framing Covering broad territory from African Americans to Asian Americans the transgendered to the disabled and Latinos to Native Americans this volume examines in depth the give and take between how policies shape political configuration and

how politics shape policy At a more fundamental level Ericson and his contributors raise some traditional and some not so traditional issues about the nature of democratic politics in settings with a multitude of group identities **Conflict and Compliance** Sonia Cardenas,2011-03-18 International human rights pressure has been applied to numerous states with varying results In **Conflict and Compliance** Sonia Cardenas examines responses to such pressure and challenges conventional views of the reasons states do or do not comply with international law Data from disparate bodies of research suggest that more pressure to comply with human rights standards is not necessarily more effective and that international policies are more efficient when they target the root causes of state oppression Cardenas surveys a broad array of evidence to support these conclusions including Latin American cases that incorporate recent important declassified materials a statistical analysis of all the countries in the world and a set of secondary cases from Eastern Europe South Africa China and Cuba The views of human rights skeptics and optimists are surveyed to illustrate how state rhetoric and behavior can be interpreted differently depending on one's perspective Theoretically and methodologically sophisticated **Conflict and Compliance** paints a new picture of the complex dynamics at work when states face competing pressures to comply with and violate international human rights norms

Violence Against Women in Legally Plural settings Anna Barrera,2015-11-19 This book addresses a growing area of concern for scholars and development practitioners discriminatory gender norms in legally plural settings Focusing specifically on indigenous women this book analyses how they often in alliance with supporters and allies have sought to improve their access to justice Development practitioners working in the field of access to justice have tended to conceive indigenous legal systems as either inherently incompatible with women's rights or alternatively they have emphasised customary law's advantageous features such as its greater accessibility familiarity and effectiveness Against this background and based on a comparison of six thus far underexplored initiatives of legal and institutional change in Ecuador Peru and Bolivia Anna Barrera Vivero provides a more nuanced ethnographic understanding of how women navigate through context specific constellations of interlegality in their search for justice In so doing moreover her account of ongoing political debates and local struggles for gender justice grounds the elaboration of a comprehensive conceptual framework for understanding the legally plural dynamics involved in the contestation of discriminatory gender norms

Delegation and Agency in International Organizations Darren G. Hawkins,David A. Lake,Daniel L. Nielson,Michael J.

Tierney,2006-09-14 Why do states delegate certain tasks and responsibilities to international organizations rather than acting unilaterally or cooperating directly Furthermore to what extent do states continue to control IOs once authority has been delegated Examining a variety of different institutions including the World Trade Organization the United Nations and the European Commission this book explores the different methods that states employ to ensure their interests are being served and identifies the problems involved with monitoring and managing IOs The contributors suggest that it is not inherently more difficult to design effective delegation mechanisms at international level than at domestic level and drawing on principal agent theory help explain the variations that exist in the extent to which states are willing to delegate to IOs They argue that IOs are neither all evil nor all virtuous but are better understood as bureaucracies that can be controlled to varying degrees by their political masters *Building Sustainable Peace* Armin Langer,Arnim Langer,Graham K. Brown,2016 Countries emerging from civil war or protracted violence often face the daunting challenge of rebuilding their economy while simultaneously creating the political and social conditions for a stable peace The implicit assumption in the international community that rapid political democratisation along with economic liberalisation holds the key to sustainable peace is belied by the experiences of countries such as Iraq and Afghanistan Often the challenges of post conflict reconstruction revolve around the timing and sequencing of different reform that may have contradictory implications Drawing on a range of thematic studies and empirical cases this book examines how post conflict reconstruction policies can be better sequenced in order to promote sustainable peace The book provides evidence that many reforms that are often thought to be imperative in post conflict societies may be better considered as long term objectives and that the immediate imperative for such societies should be people centred policies The World Bank and Governance Diane L. Stone,Christopher Wright,2006-09-27 This timely book offers the first critical examination of World Bank policy reforms and initiatives during the past decade The World Bank is viewed as one of the most powerful international organizations of our time The authors critically analyze the influence of the institution s policy and engagement during the past decade in a variety of issue areas including human rights domestic reform and the environment The World Bank and Governance delves into the bowels of the World Bank exploring its organizational structure professional culture and bureaucratic procedures illustrating how these shape its engagement with an increasingly complex diverse and challenging operational environment The book includes chapters on two under researched divisions of the World Bank the International Finance Corporation and the Multilateral Investment Guarantee Agency Several illuminating country studies are also included analyzing the World Bank s activities in Argentina Bolivia Lebanon Hungary and Vietnam This volume will be of great interest to students and scholars of international relations development politics and economics **The Domestic Politics of Foreign Aid** Erik Lundsgaarde,2013 This book explains the choices that states make concerning the volume of development aid they provide and what types of priorities are supported with this assistance The core argument of the book is that aid choices are a

product of domestic politics in donor countries which involve a variety of actors that differ in character across the donor community Neoclassical Realism, the State, and Foreign Policy Steven E. Lobell, Norrin M. Ripsman, Jeffrey W.

Taliaferro, 2009-01-15 Neoclassical realism is an important approach to international relations Focusing on the interaction of the international system and the internal dynamics of states neoclassical realism seeks to explain the grand strategies of individual states as opposed to recurrent patterns of international outcomes This book offers the first systematic survey of the neoclassical realist approach The editors lead a group of senior and emerging scholars in presenting a variety of neoclassical realist approaches to states grand strategies They examine the central role of the state and seek to explain why how and under what conditions the internal characteristics of states intervene between their leaders assessments of international threats and opportunities and the actual diplomatic military and foreign economic policies those leaders are likely to pursue The Handbook of Global Companies John Mikler, 2013-03-25 The Handbook of Global Companies brings

together original research addressing the latest theories and empirical analysis surrounding the role of global companies in local national and international governance Offers new insights into the role of global companies in relation to policy and governance at local national and international levels Brings together newly commissioned research by a global team of established and up and coming scholars from the fields of international relations political science public policy and beyond Considers the environmental and societal responsibilities of global corporations Covers topics including the spatial locations of global companies debate about the power they wield and their role as catalysts in new forms of governance and the ways in which global companies share authority with the state and international organizations to drive policy processes Speculates on the broader potential and limitations of global governance **Assessing the Effectiveness of International Courts**

Yuval Shany, 2014 During the last 20 years the world has experienced a sharp rise in the number of international courts and tribunals and a correlative expansion of their jurisdictions This book draws on social sciences to provide a clear goal orientated assessment of their effectiveness and a critical evaluation of the quality of their performance **The**

Construction of Regional Institutions in the Asia-Pacific and East Asia Yasumasa Komori, 2007 **International Review of Public Administration**, 2008 **Unpacking international organisations** Jarle Trondal, Martin

Marcussen, Torbjorn Larsson, Frode Veggeland, 2013-07-19 This book introduces international bureaucracy as a key field of study for public administration and also rediscovers it as an essential ingredient in the study of international organisations To what extent how and why do international bureaucracies challenge and supplement the inherent Westphalian intergovernmental order based on territorial sovereignty To what extent how and why do international bureaucracies supplement the existing international intergovernmental order with a multi dimensional international order subjugated by a compound set of decision making dynamics International bureaucracies constitute a distinct and increasingly important feature of public administration studies However the role of international bureaucracies has been largely neglected in most

social science sub disciplines This book takes a first step into a third generation of international organisation IO studies It will be of immense value to academics in politics and international relations as well as practitioners in public administration in domestic governments and international organizations
