Abstract: Some contemporary social phenomena, despite secularization, are still linked to religion. However, this same secularization seems to have accompanied a progressive process of religious illiteracy. Therefore, the capacity to address religious inspired issues is lower than the magnitude of the problems at work, the violent right-wing movement and Islamist terrorism or ethical debates on the beginning and end of life, to name but a few. Hence, this paper aims to fulfil three goals: to revisit secularism and some liberal assumptions that might prevent a correct understanding of these phenomena, to assess some of the consequences of the critique of ideologies and to propose an alternative approach to address religious inspired social phenomena.

Keywords: liberalism; secularization; critique of ideologies; Islamist terrorism; violent right-wing movements; religion

1. Introduction

Secularization theory which tried to explain the move from traditional to modern societies forecasted the end of religion. The pattern observed in Europe seemed to be that as societies became more modern, religion appeared to be more absent from public life. However, religions and religiosity did not disappear, as has been shown. For example, some analysis based on the World Values Survey and the European Social Survey (Kaufman et al. 2012) highlight the need to consider rates of religion change and demographics (i.e., migration, fertility rates, etc.) showing that, in some considered high secularized countries, figures on secularization have reached floor showing a shift in trends in religiosity now and in the upcoming years. However, not only that; many pressing challenges affecting both modern and traditional societies throughout the world are connected to religion and so require religious sensitivity in order to address them effectively: some forms of terrorism, religious inspired political parties, the ban of *hijab* in French schools, the use of religious language in public debates and political campaigns, and some right-wing movements, to name a few.

Despite that, the capacity to deal with religion has not grown accordingly for two reasons. First, modernization predictions on religion were taken for granted. If religion is going to disappear, why keep paying attention to it? The second reason has to do with the triumph of liberalism as the only framework for public debate and analysis (García-Magarino 2018). Its success has been so compelling that it is difficult to adopt a critical standpoint toward the values inherent to liberalism. This intellectual tradition emphasizes individual freedom and autonomy and tends to overlook the collective dynamics of social life. Religion is more than individual beliefs; it is a social phenomenon with a strong collective dimension (Berger 1974). Thus, liberalism might not be the best framework to approach religion and religiously inspired phenomena in all their complexity.

Alternative goals in religion George Bosworth Burch, 1972 *Alternative Goals in Religion* George Bosworth Burch, 1972

Religions Mahatma Gandhi once said are different roads converging to the same point But in this stimulating assessment of Christianity Buddhism and Vedanta Professor Burch develops the revolutionary theory that religions starting from the same point take divergent roads to different goals incompatible one with the other Whereas Gandhi asks What does it matter that we take different roads so long as we reach the same goal Dr Burch asks What does it matter that in taking different roads we reach different goals Religions he maintains do not have to fight each other because of their differences or abolish their differences to avoid fighting He is a firm believer in coexistence for religions Ecumenicity is good in so far as it means on the one hand cooperation with other faiths in their common concerns of social activities and resistance to irreligion and on the other hand mutual respect for the other faiths themselves Dr Burch argues for the coexistence of three alternative Absolutes Truth or Absolute Self as ultimate reality which corresponds to the religion of Hindu Advaita Vedanta Absolute Freedom which corresponds to Buddhism and love or Absolute Feeling which corresponds to Christianity The religious quest requires absolute commitment to one or other of these irreducible alternatives not to truth and freedom and love but to truth or freedom or love In his Foreword Professor W Norris Clarke S J of Fordham University subjects Dr Burch's theory to the most rigorous critical analysis but in the end invites each reader to make the effort himself of coming to grips with the author's profound and original challenge

Religion and Economics: Normative Social Theory J.M. Dean, A. M. C. Waterman, 2012-12-06 Normative Social Theory James M Dean and A M C Waterman University of Manitoba 1 Economics and Religion Once Again This book is a sequel to Economics and Religion Are They Distinct Brennan and Waterman 1994 That volume was motivated by a frustration born of many disappointing encounters between economists and theologians in the 1980s Can bishops synods and other voices of organized religion bring any interesting and disinterested contribution to the public policy debate If so what is the relation of their contribution to that of the purely secular knowledge economists believe they can supply Can economists bring any interesting and disinterested contribution to the public policy debate If so what is the relation of their contribution to the fundamental values that inform social ethics and that are still guarded to a large extent by religious tradition All too often the two sides talked at cross purposes Well intentioned economists coexisted for a few hours or days with well intentioned theologians whose manner of conceiving social reality was radically incompatible with their own There seemed to be no common ground The first requisite of any genuine conversation is an agreed conceptual framework that is able to accommodate the peculiar social vision both of the economist and of theologian and to display the logical relation between the two

Religion and Violence Dominic Arcamone, 2015-08-17 The aim of Religion and Violence is to engage dialectically key symbols of religiously motivated violence through the insights of Bernard Lonergan Sociologists and psychologists argue the link between religion and violence Religion is viewed more as part of the problem and not part of the solution to violence Bernard Lonergan's insights have helped the author arrive at a number of conclusions regarding the link between religion and violence He argues that there is a difference between distorted religion and genuine religion between authenticity and inauthenticity of the subject

Distorted religion has the capacity to shape traditions in ways that justify violence while genuine religion helps persons help them make different moral decisions when confronted with situations of conflict and aims to explore new ways of understanding themselves as shaping history toward progress. Further, Religion and Violence while arguing from within the Catholic Christian tradition nevertheless seeks to provide a number of categories that will speak to people from other cultural traditions. Since many of the examples of religious violence cited by commentators come out of the Islamic tradition, the author has evidenced and explored more authentic aspects of the Islamic tradition that would help provide a solution to violence.

Prophets and Photons Benjamin E Zeller, 2010-03-01 This in depth study shows how new religious movements offer a variety of strategies for reconciling science and religious faith. By the twentieth century established religious traditions were forced to grapple with the challenges presented by scientific knowledge and innovation. But emerging religions still led by a living founder to guide them found new ways to respond to science. The Hare Krishnas, the Unification Church, and Heaven's Gate each found distinct ways to incorporate major findings of modern American science, understanding it as central to their wider theological and social agendas. In Prophets and Photons Benjamin Zeller examines how these New Religious Movements (NRMs) crafted their views on science during their founding period and how those views evolved over time. These NRMs shed light on how religious groups, new, old, alternative, or mainstream, could respond to the tremendous growth of power and prestige of science in late twentieth century America. In this engrossing book Zeller carefully shows that religious groups had several methods of creatively responding to science and that the often assumed conflict based model of science vs religion must be replaced by a more nuanced understanding of how religions operate in our modern scientific world.

Teaching New Religious Movements David G. Bromley, 2007-05-25 Since its inception around 1970, the study of New Religious Movements (NRMs) has evolved into an established multidisciplinary field. At the same time, both the movements and the scholars who study them have been the subjects of intense controversy. In this volume, a group of senior NRM scholars who have been instrumental in the development of the field will offer pivotal essays that present the basics of NRM scholarship along with guidance for teachers on classroom use. The book is organized topically around subjects that are both central to the study of NRMs and likely to be useful to non-specialists. Part I contains examinations of the definitional boundaries of the area of study, varying disciplinary perspectives on NRMs, unique methodological and ethical problems encountered in the study of NRMs, and the controversies that have confronted scholars studying NRMs and the movements themselves. Part II examines a series of topics central to teaching about NRMs: the larger sociocultural significance of the movements, their distinctive symbolic and organizational features, the interrelated processes of joining and leaving NRMs, the organization of gender roles in NRMs, media and popular culture portrayals of the movements, the occurrence of corruption and abuse within movements, and violence by and against NRMs. Part III provides informational resources for teaching about NRMs, which are particularly important in a field where knowing the biases of

sources is crucial. With its interdisciplinary approach, the volume provides comprehensive, accessible information and perspectives on NRMs. It is an invaluable guide for instructors navigating this scholarly minefield.

Presents an encyclopedia of religion and politics in America, including short biographies of important political and religious figures like Ralph Abernathy, civil rights leader, and Ralph Waldo Emerson, writer, and synopses of religious entities like the Branch Davidians and the Episcopal Church, as well as important court cases of relevancy like *Epperson et al v Arkansas* having to do with evolution.

The Buddha and Religious Diversity J. Abraham Vélaz de Cea, 2013. Providing a rigorous analysis of Buddhist ways of understanding religious diversity, this book develops a new foundation for cross-cultural understanding of religious diversity in our time. Examining the complexity and uniqueness of Buddha's approach to religious pluralism using four main categories: namely exclusivism, inclusivism, pluralistic inclusivism, and pluralism, the book proposes a cross-cultural and interreligious interpretation of each category, thus avoiding the accusation of intellectual colonialism. The key argument is that unlike the Buddha, most Buddhist traditions today, including Theravada Buddhism and even the Dalai Lama, consider liberation and the highest stages of spiritual development exclusive to Buddhism. The book suggests that the Buddha rejects many doctrines and practices found in other traditions and that for him, there are nonnegotiable ethical and doctrinal standards that correspond to the Dharma. This argument is controversial and likely to ignite a debate among Buddhists from different traditions, especially between conservative and progressive Buddhists. The book fruitfully contributes to the literature on interreligious dialogue and is of use to students and scholars of Asian Studies, World Religion, and Eastern Philosophy.
