Alvan Clark & Sons Deborah Jean Warner,1968 *ALVAN CLARK AND SONS ARTISTS IN OPTICS* DEBORAH JEAN. WARNER,2018 **Alvan Clark & Sons: Artists in Optics** Deborah Jean Warner,1968 Three instrument makers Alvan Clark and his sons George Bassett and Alvan Graham figured importantly in the great expansion of astronomical facilities which occurred during the second half of the 19th century Almost every American observatory built during this period and some observatories abroad housed an equatorial refracting telescope and often auxiliary apparatus as well made by the Clarks Their optical work recognized as unexcelled anywhere in the world was the first significant American contribution to astronomical instrument making While American telescopes had been made before none compared with those of European manufacture by the end of the 19th century partly because of the example set by Alvan Clark Sons several other Americans were making fine astronomical instruments **Alvan Clark and Sons Artists in Optics (Classic Reprint)** Deborah Jean Warner,2017-09-17 Excerpt from *Alvan Clark and Sons Artists in Optics* Clarks made the objectives for the largest refracting telescopes in the world and the fifth of their efforts their 40 inch lens at the Yerkes Observatory has never been surpassed Their optical work which was recognized as unexcelled anywhere in the world was the first significant American contribution to astronomical instrument making American telescopes had been made before but none compared to those of European manufacture by the end of the 19th century however partly because of the example set by Alvan Clark Sons several other Americans were making fine astronomical instruments About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works A History of the Photographic Lens Rudolf Kingslake,1989-11-22 The lens is generally the most expensive and least understood part of any camera In this book Rudolf Kingslake traces the historical development of the various types of lenses from Daguerre's invention of photography in 1839 through lenses commonly used today From an early lens still being manufactured for use in low cost cameras to designs made possible through such innovations as lens coating rare earth glasses and computer aided lens design and testing the author details each major advance in design and fabrication The book explains how and why each new lens type was developed and why most of them have since been abandoned This authoritative history of lens technology also includes brief biographies of several outstanding lens designers and manufacturers of the past **Henry Ives Cobb's Chicago** Edward W. Wolner,2011-06-30 When championing the commercial buildings and homes that made the Windy City famous one can't help but mention the brilliant names of their architects Daniel Burnham Louis Sullivan and Frank Lloyd

Wright among others But few people are aware of Henry Ives Cobb 1859 1931 the man responsible for an extraordinarily rich chapter in the city's turn of the century building boom and fewer still realize Cobb's lasting importance as a designer of the private and public institutions that continue to enrich Chicago's exceptional architectural heritage Henry Ives Cobb's Chicago is the first book about this distinguished architect and the magnificent buildings he created including the Newberry Library the Chicago Historical Society the Chicago Athletic Association the Fisheries Building for the 1893 World's Fair and the Chicago Federal Building Cobb filled a huge institutional void with his inventive Romanesque and Gothic buildings something that the other architect giants occupied largely with residential and commercial work did not do Edward W Wolner argues that these constructions and the enterprises they housed including the first buildings and master plan for the University of Chicago signaled that the city had come of age that its leaders were finally pursuing the highest ambitions in the realms of culture and intellect Assembling a cast of colorful characters from a free wheeling age gone by and including over 140 images of Cobb's most creative buildings Henry Ives Cobb's Chicago is a rare achievement a dynamic portrait of an architect whose institutional designs decisively changed the city's identity during its most critical phase of development
