The Scientific World of Copernicus B. Biéłowska, 2012-12-06 On February 19 1973 five centuries have elapsed since the birth of Nicolaus Copernicus the greatest astronomer of the Renaissance period who rediscovered for us the heliocentric model of the solar system and documented it by his life's work in such a manner as to make its concept a permanent property of mankind The life of Copernicus extending from 19 February 1473 to his death on 24 May 1543 was not too rich in adventures or biographical facts Born in Toruń from a family of Polish burghers he received his first university training in Cracow between 1491-1494 From Cracow he proceeded to Italy to spend the years between 1496-1503 at the Universities of Bologna Padua and Ferrara with occasional visits to Rome in preparation for an ecclesiastical career When Bishop Watzenrode his patron and maternal uncle could no longer extend his leave Copernicus returned to Poland in 1503 to enter the service of the church establishment which soon led to a canonry at the Frombork Frauenburg Cathedral in Warmia And there in the northern mists not far from the Baltic shores in a land so different in climate from the sunny Italy of his youth he was destined to spend the rest of his life

The British National Bibliography Arthur James Wells, 1968 **The Lands of Partitioned Poland, 1795-1918** Piotr S. Wandycz, 1975-02-01 The Lands of Partitioned Poland 1795-1918 comprehensively covers an important complex and controversial period in the history

of Poland and East Central Europe beginning in 1795 when the remnant of the Polish Commonwealth were distributed among Prussia Austria and Russia and culminating in 1918 with the re establishment of an independent Polish state Until this thorough and authoritative study literature on the subject in English has been limited to a few chapters in multiauthored works Chronologically Wandycz traces the histories of the lands under Prussian Austrian and Russian rule pointing out their divergent evolution as well as the threads that bound them together The result is a balanced comprehensive picture of the social political economic and cultural developments of all nationalities inhabiting the land of the old commonwealth rather than a limited history of one state Poland and one people the Poles

The Impact of Artists on Contemporary Urban Development in Europe Monika Murzyn-Kupisz, Jarosław Działek, 2017-04-04 This book provides an up to date critical review of theoretical concepts connecting artists and urban development It focuses on the multidimensionality of potential and actually observed interactions between artists and cities and their impacts on urban space its form functions and perceptions Departing from the viewpoint that a more nuanced geography of artists is still needed to fully conceptualise the diversity of roles artistic creatives play in urban transformations the book presents contributions with a common denominator of distinguishing artists as a unique professional and social group The essays focus on the complexity of the artists spatial preferences and analyse a myriad of expressions of artists presence in urban centres in different geographic political economic social and spatial contexts drawing on experiences from 16 cities across Europe The book presents several case studies ranging from Spain to Russia and from Scandinavia to Slovenia and offers new pathways into understanding the implications of artists residence and activities in contemporary cities Apart from presenting less obvious expressions of artists involvement in urban transformations such as their participation in urban planning or grass root urban movements the volume explores the ambivalence of artists interactions with cities Particular chapters test several divergent narratives of artistic creatives as inspirers and instigators of urban changes pioneers of gentrification testers and resisters of neoliberal urban policies or mere indicators of transformations inspired by other actors instrumentalized by public and private stakeholders
