Crash Course In Creativity:

InGenius Tina Seelig, 2012-08-06 Is the ability to creatively tackle problems innate or can it be learned Like most human traits both answers are correct Some people are inherently more innovative than others But just like maths or writing everyone can improve with practice Tina Seelig PhD teaches creativity every day in her courses on innovation at Stanford School of Engineering After ten years of experience she confidently asserts that not only can creativity be taught but that there are a clear set of tools skills and approaches that can unlock anyone's creative potential In InGenius Seelig reminds us that creativity is not just something that you think about it is something that you do It is as natural as breathing and just as necessary for leading a successful and fulfilling life Creative solutions are required because the status quo is never good enough and our goal should always be to push beyond the limits of what seems possible Great ideas are needed to solve all the problems we face and to enrich our lives Whether it is in the conference room classroom or kitchen new ideas open up a world of wonderful possibilities With the tools presented in this remarkable book we will learn how to pull out all stops to take on the challenges big and small that come our way and to see that every word every idea and every moment provides an opportunity for creativity that will enhance our lives InGenius is filled with concepts tools techniques and stories that reveal ways you can increase your creativity quotient and that of your groups and organizations The first half of the book focuses on the inside out what you can personally do to increase your own creative aptitude and attitude The second half deals with the outside in how you can change the local and cultural environment to increase the creativity quotient of your community InGenius reveals one of the great truths about ideas it costs nothing to generate amazing ideas and yet the results have the potential to be priceless

The Creative Turn Anne M. Harris, 2014-04-16 The conundrum of understanding practising and teaching contemporary creativity is that it wants to be all things to all people Almost all modern lists of creativity creative thinking and how to becoming creative books begin with one premise the creative individual artist is not special rather each of us is creative in a special way and these skills can and must be nurtured Increasingly industry and education leaders are claiming that creativity is the core skill to take us into a prosperous future signalling the democratisation of creativity as industry Yet centuries of association between aesthetics mastery and creativity are hard to dismantle These days it is increasingly difficult to discuss creativity without reference to business industry and innovation Why do we love to think of creativity in this way and no longer as that rare visitation of the muse or the elite gift of the few This book looks at the possibility that creativity is taking a turn what that turn might be and how it relates to industry education and ultimately cultural role of creativity and aesthetics for the 21st century In proliferating discourses of the commodification of creativity there is one thing all the experts agree on creativity is undefinable possibly unteachable largely unassessable and becoming the most valuable commodity in 21st century markets
