Clinical Lab Sci SERIES Section I Hematology ,1986-11-30 **CRC handbook series in clinical laboratory science** David Seligson, *Hematology* Robert Milton Schmidt,1986 **PSRMLS Resource Libraries Union List of Serials** ,1990 The New Dimensions of Warfarin Prophylaxis Stanford Wessler,2013-06-29 The International Symposium on The New Dimensions of Warfarin Prophylaxis held on October 16 18 1986 in New York City was conceived as a forum to bring together physicians and other scientists knowledgeable about the pharmacological effects of warfarin on the hemostatic mechanism and the clinical usefulness of this compound in the prevention of thromboembolic phenomena The coumarin compounds have commanded a striking breadth of interest among members of the biomedical research community for almost one half century Aspects of its effects on the vitamin K dependent proteins on the laboratory recognition of the drug s pharmacologic action and its use as a therapeutic agent in a variety of disease states have been actively studied with increasing intensity in the past several decades Thus the present state of these studies seemed to be a timely subject for discussion not only to gather together in one place representative samples of the myriad of data on warfarin but also to underscore the ever increasing necessity for communication between basic research and clinical practice The content and organization of this monograph reflect the scope and importance of warfarin prophylaxis One of the unique aspects of this publication is that it spells out in one place the warfarin story from molecular biology through clinical trials to future directions of research and patient care Hematology William Samson Beck,1991 The fifth edition of this well known series of lectures by distinguished Harvard hematologists is substantially revised to include discussions of the many important scientific developments in contemporary hematology New insights into oncogenes growth factors membrane receptors differentiation and morphogenesis enzymology molecular biology and evolutionary biology appear in virtually every lecture A lecture on general principles of malignant disease appears for the first time in recognition of the fact that in many hospitals and medical schools hematology departments now encompass oncology an important topic that is not covered elsewhere in the medical curriculum This new edition also adds many tables and figures relating to differential diagnosis that will be useful to practicing physicians and house officers Examples include causes of splenomegaly indications for splenectomy differential diagnosis of normocytic anemia macrocytic anemia hypochromic anemia thrombocytopenia bone marrow failure syndromes and many others The bibliographies have been expanded a new appendix containing laboratory methods has been added and there is an unusually complete index **Region Seven (NN/LM) Resource Libraries Union List of Serials** ,1991 **Current Catalog** National Library of Medicine (U.S.),1982 First multi year cumulation covers six years 1965 70

Vertebrate Blood Cells Arthur Frederic Rowley,N. A. Ratcliffe,1988-02-25 First published in 1988 Vertebrate Blood Cells provided a comprehensive review of our knowledge of the structure and function of vertebrate blood cells This was the first book to attempt to draw together such a guide and this volume was essential reading for this subject The book consists of six chapters on general evolutionary aspects fish amphibian reptilian avian and mammalian haematology written by experts in his her field Of particular importance is the standardized format used from chapter to chapter which allows the reader to compare the information available on a particular aspect from one group of animals to another The book should be of interest to immunologists haematologists and general biologists as well as undergraduate students of zoology cell biology microbiology and veterinary and human medicine      *Advances in Clinical Chemistry* ,1998-10-20 For more than thirty years this serial has broadened the technical scope and expanded the scientific base of clinical chemistry These volumes clarify the areas of molecular biology informatics and the monitoring of physiological parameters in critical situations as they pertain to clinical chemistry Each volume of *Advances in Clinical Chemistry* contains an index and each chapter includes references

Vertebrate Red Blood Cells Mikko Nikinmaa,2012-12-06 This book reviews the respiratory function of vertebrate red cells I have defined the phrase respiratory function broadly to include in addition to the actual oxygen and carbon dioxide transport erythropoiesis haemoglobin synthesis red cell structure the deformability of red cells in circulation ion and substrate transport across the cell membrane cellular metabolism and control of cellular volume and pH All of these aspects of the red cell function may affect gas transport between the respiratory epithelia and the tissues Throughout the book I have tried to relate our current knowledge about the nucleated red cell function to the wealth of information about the function of mammalian red cells However whenever possible I have placed the emphasis on the nucleated red cell function for two reasons First the erythro cytes of 90% of vertebrate species are nucleated and second nucleated red cell function has not been reviewed earlier in a single volume This being the case I have tried to make the reference list as complete as I could with regard to nucleated red cells I hope that the approach adopted is useful for both comparative and human physiologists Many people have contributed to the making of this book directly or indirectly Antti Soivio started me in this field Prof Henrik Wallgren has always encouraged fresh scientific ideas in his department My present ideas of red cell function have been influenced by work carried out with Prof Roy E      *CRC Handbook Series in Clinical Laboratory Science* Clinical rubber company,Chemical Rubber Company Cleveland, Ohio,1978      *CRC Handbook Series in Clinical Laboratory Science* Robert M.
