Virtual Interaction: Interaction in Virtual Inhabited 3D Worlds E. Granum, Lars Qvortrup, B. Holmqvist, S.

Kolstrup, K. Halskov Madsen, 2013-03-09 Lars Qvortrup The world of interactive 3D multimedia is a cross institutional world Here researchers from media studies linguistics dramaturgy media technology 3D modelling robotics computer science sociology etc etc meet In order not to create a new tower of Babel it is important to develop a set of common concepts and references This is the aim of the first section of the book In Chapter 2 Jens F Jensen identifies the roots of interaction and interactivity in media studies literature studies and computer science and presents definitions of interaction as something going on among agents and agents and objects and of interactivity as a property of media supporting interaction Similarly he makes a classification of human users avatars autonomous agents and objects demonstrating that no universal differences can be made We are dealing with a continuum While Jensen approaches these categories from a semiotic point of view in Chapter 3 Peer Mylov discusses similar issues from a psychological point of view Seen from the user's perspective a basic difference is that between stage and back stage or rather front stage i.e. between the real I and we and the virtual representational I and we Focusing on the computer as a stage in Chapter 4 Kjølner and Lehmann use the theatre metaphor to conceptualize the stage phenomena and the relationship between stage and front stage **Virtual Space** J.F. Jensen, Lars Qvortrup, E. Kjems, N. Lehmann, C. Madsen, 2011-06-28 Containing the edited research papers resulting from an ambitious cross disciplinary research project this volume examines the spatiality of virtual inhabited 3D worlds virtual reality and cyberspace Three other volumes look at Interaction Staging and Methodology It is about the communication spaces emerging at the Internet and supported by special 3D interfaces It is also about the virtual spaces created by virtual reality hardware CAVes panoramic screens head mounted display systems etc and software Virtual Space Spatiality in Virtual Inhabited 3D Worlds is interdisciplinary It deals with philosophical psychological communicational technological and aesthetic aspects of space While philosophy raises the question concerning the ontology of space what is space psychology deals with our perception of space Communication theory looks at the way in which space supports communication i.e. that space is a medium for communication and finally aesthetic analyses exemplify the use of virtual space in virtual cities in museums and in art **Cases on Collaboration in Virtual Learning Environments: Processes and Interactions** Russell,

Donna, 2009-10-31 Using a case study analysis this book provides a unifying perspective for discussing the viability of collaborative virtual spaces as training programs for insurance brokers forums to support at risk university students simulations of historical places means to aid autistic children learn social skills repositories for digital libraries collaborative spaces designing new university programs and emergency response training Provided by publisher **Designing Virtual Worlds** Richard A. deep physical structure to confuse our understanding and the way we should react to the problems and potentials of landscapes. Nowhere are these dilemmas and paradoxes so clearly highlighted as in Australia where landscapes dominate and their relationship to cities is so fragile yet so important to the sustainability of an entire nation if not planet. This book presents a unique collection and synthesis of many of these perspectives; perhaps it could only be produced in a land used in the tiniest of pockets and yet so daunting with respect to the way non-populated landscapes dwarf its cities. Many travel to Australia to its cities and never see the landscapes but it is these that give the country its power and imagery. It is the landscapes that so impress on us the need to consider how our intervention through activities ranging from resource exploitation and settled agriculture to climate change poses one of the greatest crises facing the modern world. In this sense, Australia and its landscape provide a mirror through which we can glimpse the extent to which our intervention in the world threatens its very existence.
