Creating The European Community:

European Community John Pinder,1995 Invaluable for all those who seek a greater understanding of the European Community John Pinder s book gives a complete and coherent view of its formation He includes recent developments such as the GATT negotiations the Delors II package the aftermath of Maastricht and the new bids for membership and offers his own neo federalist approach to the uncertain future of the Union Creating the European Community Robert Case Mowat,1973

Building European Union Trevor C. Salmon,William Nicoll,1997 In Building European Union Trevor Salmon and William Nicoll draw upon twenty years experience one as an academic the other as a practitioner of European policy to bring together over 100 key documents on european integration in one volume each document or group of documents is preceded by commentary which locates the document in its historical context and explains its provenance purpose and impact upon the development of European Union

Creating European Citizens Willem Maas,2007-02-03 Exploring a key aspect of European integration this clear and thoughtful book considers the remarkable experiment with common rights and citizenship in the EU Governments around the world traditionally distinguish insiders citizens from outsiders foreigners Yet over the past half century an extensive set of supranational rights has been created in Europe that removes member governments authority to privilege their own citizens a hallmark of sovereignty The culmination of supranational rights European citizenship not only provides individuals with choices about where to live and work but also forces governments to respect those choices Explaining this innovation why states cede their sovereignty and eradicate or redefine the boundaries of the political community by including foreigners Willem Maas analyzes the development of European citizenship within the larger context of the evolution of rights Imagining more than simply a free trade market the goal of building a broader and deeper community among peoples with a destiny henceforward shared creating European citizens has informed European integration since its origins The author argues that its success or failure will not only determine the future of Europe but will also provide lessons for political integration elsewhere The European Community Johan Galtung,1973

Creating European Citizens Willem Maas,2007-02-03 Exploring a key aspect of European integration this clear and thoughtful book considers the remarkable experiment with common rights and citizenship in the EU Governments around the world traditionally distinguish insiders citizens from outsiders foreigners Yet over the past half century an extensive set of supranational rights has been created in Europe that removes member governments authority to privilege their own citizens a hallmark of sovereignty The culmination of supranational rights European citizenship not only provides individuals with choices about where to live and work but also forces governments to respect those choices Explaining this innovation why states cede their sovereignty and eradicate or redefine the boundaries of the political community by including foreigners Willem Maas analyzes the development of European citizenship within the larger context of the evolution of rights Imagining more than simply a free trade market the goal of building a broader and deeper community among peoples with a destiny

henceforward shared creating European citizens has informed European integration since its origins The author argues that its success or failure will not only determine the future of Europe but will also provide lessons for political integration elsewhere Decision-making in the European Community Emil Joseph Kirchner,1992 In this first major assessment of EC decision making at the highest levels for ten years Emil Kirchner examines the Council Presidency's role in European integration The author demonstrates how the EC Council Presidency plays a crucial role in the integration process enhanced by the Single European Act and the two Intergovernmental Conferences on EMU and Political Union He evaluates the balance and distribution of power between national and Community actors and asks whether the Council Presidency is primarily an instrument to maintain national control of EC decision making rather than a device for promoting integration He sheds light on the negotiations which led to the SEA and the two Intergovernmental Conferences and argues for a new interpretation of the relationship between the EC and its constituent states EC decision making is not characterised by a transfer of powers from the national to the EC level but by a sharing of competences between national and Community institutions and a pooling of sovereignties among member governments that is analogous to co operative federalism Decision making in the European Community will be vital reading for political scientists and students interested in the EC and for all those seeking to understand European integration potentially the 1990s most important political development

Philosophical Foundations of European Union Law Julie Dickson,Pavlos Eleftheriadis,2012-10-11 This volume brings together legal philosophers political philosophers and EU legal academics in the service of developing the philosophical analysis of EU law In a series of original and complementary essays they bring their varied disciplinary expertise and theoretical perspectives to bear on central issues facing the Union and its law Participation in EU Rule-making Joana Mendes,2011-04-07 The limited scope of participation in the making of EU law remains a continued source of controversy featuring prominently in recent institutional and political developments that have been shaping the EU's constitutional framework most intensely in the follow up of the Commission's White Paper on Governance Yet little attention has been paid to participation rights as a means of ensuring the procedural protection of persons affected by EU regulation in its diverse forms This is a dimension of the rule of law that has been largely ignored by EU legislative and judicial bodies Not only the legislator but also the Court of Justice and the Court of First Instance tend to adhere to excessively formal conceptions of participation rights that are premised on the right to be heard in individual procedures as well as to a restrictive view regarding the relationships between the citizens and the administration This book shows why in the face of new regulatory developments these conceptions are currently inadequate to ensure the legal protection of rights and interests affected by EU regulation Combining a conceptual analysis with thorough empirical scrutiny this book assesses the scope of participation rights in EU law against their rationales and underlying legal values It makes a case for the extension of participation rights to new situations and new types of procedures in particular those that would generally fall within the category of rulemaking

It brings distinct normative insights into a crucial theme of EU administrative law and makes a topical and timely contribution to the increasingly notable theme of public participation in EU regulation Joanna Mendes 2009 thesis upon which Participation in EU Rule Making is based was awarded the the European University Institute Florence Mauro Cappelletti Prize for the best doctoral thesis using a methodology of comparative law

The History of the European Union Wolfram Kaiser, Brigitte Leucht, Morten Rasmussen, 2008-09-05 This book radically re conceptualises the origins of the European Union as a trans and supranational polity as it emerged between the Schuman Plan of May 1950 and the first enlargement of the European Communities at the start of 1973 Drawing upon social science theories and debates as well as recent historical research Wolfram Kaiser and Morten Rasmussen in their introductory chapters discuss innovative ways of narrating the history of the EU as the emergence of a transnational political society and supranational political system Building on these insights eight chapters based on multilateral and multi archival research follow each with case studies of transnational networks public sphere and institutional cultures and policy making which illustrate systematically related aspects of the early history of the EU In the concluding chapter leading political scientist Alex Warleigh Lack demonstrates how greater interdisciplinary cooperation especially between contemporary history and political studies can significantly advance our knowledge of the EU as a complex polity This book will be of interest to students and scholars of Politics European Studies and History

Economic Citizenship in the European Union Paul Teague, 2005-10-25 Paul Teague explores the macro economic productive and institutional pressures faced by Europe's social model and assesses a number of economic and political programmes aimed at resolving the crisis It also considers the role of the European Union building a social dimension to the European economy The findings suggest that the future of traditional institutions of Social Europe is under threat However they also stress that we are not on the threshold of the Americanisation of European life This study finds that the influential political forces that reject the dismantling of Europe's social model should not be preoccupied with defending inherited institutions Instead this book argues that they should encourage the construction of new forms of social solidarity compatible with the complexities of modern economic life

Small States in the European Union Diana Panke, 2010 The most recent EU enlargements have considerably increased the number of small member states In the EU 27 19 countries have fewer votes in the Council of Ministers than the EU average These small states face a series of size related disadvantages in day to day EU negotiations Against this backdrop the book asks are some small states better at coping with structural disadvantages than others How active are small states in participating in day to day EU negotiations and why do some states use negotiation strategies more frequently than others Under which conditions are the different negotiation strategies effective and when can small states punch above their weight Based on more than 100 interviews with policy makers and an analysis of a unique database on the negotiation activities of EU member states this book explains how active participation is essential for the shaping success of small states and shows that small states are more influential with persuasion based rather than bargaining based strategies Two case studies on the pesticides and the spirit drinks regulations further reveal that

persuasion strategies are especially effective if the arguments match the nature of the issue at stake and resonate well with prior beliefs of addressees No other study comprehensively analyzes small states in a comparative perspective examines their activity levels in EU negotiations and outlines which conditions are needed for the effectiveness of a broad range of strategies This is an indispensable resource for students and researchers interested in how and under which conditions small states can influence policies in negotiations beyond the nation state

Leadership and Negotiation in the European Union Jonas Tallberg, 2006-08-24 In this 2006 book Jonas Tallberg offers a novel perspective on some of the most fundamental questions about international cooperation and European Union politics Offering the first systematic theoretical and empirical exploration of the influence wielded by chairmen of multilateral negotiations Tallberg develops a rationalist theory of formal leadership and demonstrates its explanatory power through carefully selected case studies of EU negotiations He shows that the rotating Presidency of the EU constitutes a power platform that grants governments unique opportunities to shape the outcomes of negotiations His provocative analysis establishes that Presidencies while performing vital functions for the EU simultaneously exploit their privileged political position to favour national interests Extending the scope of the analysis to international negotiations on trade security and the environment Tallberg further demonstrates that the influence of the EU Presidency is not an isolated occurrence but the expression of a general phenomenon in world politics the power of the chair
