Creating The Future With All Finance And Financial Conglomerates:

Creating the Future with All Finance and Financial Conglomerates L. van den Berghe, K. Verweire, 2013-03-09

Creating the Future with All Finance and Financial Conglomerates comprises an academic search for an understanding of all finance and financial conglomerates. It presents a strategic and economic analysis of diversification strategies and the growing interface between different types of financial firms. On the basis of a solid analysis of theoretical foundations and practical value, the book develops basic concepts of creating the future, especially solutions in managing risks and fresh ideas for the development of integrated financial services. The structure of the book is logical, starting on theoretical foundations, section 1 part A, and examining the economic value of All Finance and Financial Conglomerates, part B, leads to creating a concept for the future, part C. Case studies add additional practical value to this research. The review of the subject is completed by aspects of risk management in this sector and by political guidelines for the EU single market, section 2. The book builds further on Professor Van den Berghe's first publication entitled *Financial Conglomerates: New Rules for New Players*, published by Kluwer Academic Publishers in October 1995, and broadens the scope in the direction of strategic and managerial aspects. The following five aspects underline the innovativeness of the material. The volume is not only focused on the diversification of banks via bancassurance but also analyses in depth the parallel developments in the insurance market, whereby insurers and insurance intermediaries launch themselves in the direction of assurfinance. The material analyses not only the cross-selling of each other's products and the blurring of the market boundaries but also the diversification, collaboration and integration on all other levels and functions. New conceptual tools, the financial conglomerates control board, are developed to provide a more in-depth comparison of the many cases of this international trend. The book goes far beyond the categorisation of the mode of diversification by looking at all managerial aspects of such a growth strategy and the work looks at the economic and legal aspects involved as well as at the more strategic and managerial aspects. This research has been made possible thanks to the financial support of The LEVOB Foundation.

The discussion ranges from theoretical and policy perspectives to comprehensive and critical consideration of financial regulation in the specifics. The focus of the book is on the substantive regulation of the UK and the EU as critical examination is made of the unravelling and the future of financial regulation with comparative insights offered where relevant especially from the US. Running throughout the book is consideration of the relationship between financial regulation, financial stability and the responsibility of various actors in governance. This book offers an important contribution to continuing reflections on the role of financial regulation, market discipline and corporate responsibility in the financial sector and upon the roles of regulatory authorities, markets and firms in ensuring the financial health and security of all in the future.

How We Sold Our Future Jens Beckert, 2024-11-25 For decades we have known about the dangers of global warming Nevertheless greenhouse gas emissions continue to increase How can we explain our failure to take the necessary measures to stop climate change Why are societies despite the mounting threat to ourselves and our children so reluctant to take action In this important new book Jens Beckert provides an answer to these questions Our apparent inability to implement basic measures to combat climate change is due to the nature of power and incentive structures affecting companies politicians voters and consumers Drawing on social science research he argues that climate change is an inevitable product of the structures of capitalist modernity which have been developing for the past 500 years Our institutional and cultural arrangements are operating at the cost of destroying the natural environment and attempts to address global warming are almost inevitably bound to fail Temperatures will continue to rise and social and political conflicts will intensify The tragic truth is we are selling our future for the next quarterly figures the upcoming election results and today's pleasure Any realistic climate policy needs to focus on preparing societies for the consequences of escalating climate change and aim at strengthening social resilience to cope with the increasingly unstable natural world Civil society is the only source of pressure that could build the necessary strength and support for climate protection
