## **Creation With German English Text:**

**Haydn: The Creation** Nicholas Temperley, 1991-05-31 Haydn's Creation is one of the great masterpieces of the classical period. This absorbing and original account of the work provides an indispensable guide for the concertgoer, performer, and student alike. The author places the work within the oratorio tradition and contrasts the theological and literary character of the English libretto with the Viennese milieu of the first performances. The complete text is provided in both German and English versions as a useful reference point for discussion of the design of the work, the musical treatment of the words, including questions of Haydn's pictorialism, and a detailed examination of the different movement types employed. The book also contains a brief history of the reception of the work with appendices of notes on the changing performance traditions and selected extracts from critical accounts from the nineteenth and twentieth centuries. **Trends in Natural Language**

**Generation - An Artificial Intelligence Perspective** Giovanni Adorni, Michael Zock, 1996-03-13 This proceedings volume gives an up-to-date overview of the most recent results in the field of plant molecular response to environmental constraints, especially heat, cold, water, drought, salt, or light. It centers on molecular approaches in understanding the bases of plant tolerance to physical stresses, links among different environmental stresses, and the manipulation of gene expression by recombinant DNA technology to obtain tolerant transgenic plants. *Advances in Information Retrieval* Allan

Hanbury, Gabriella Kazai, Andreas Rauber, Norbert Fuhr, 2015-03-16 This book constitutes the proceedings of the 37th European Conference on IR Research, ECIR 2015, held in Vienna, Austria, in March/April 2015. The 44 full papers, 41 poster papers, and 7 demonstrations presented together with 3 keynotes in this volume were carefully reviewed and selected from 305 submissions. The focus of the papers were on following topics: aggregated search and diversity, classification, cross-lingual and discourse efficiency, evaluation, event mining, and summarisation, information extraction, recommender systems, semantic and graph-based models, sentiment and opinion, social media-specific search tasks, temporal models and features, topic and document models, user behavior, and reproducible IR. **A Guide to Early Jewish Texts and Traditions in Christian**

**Transmission** Alexander Kulik, Lorenzo DiTommaso, 2019 The Jewish culture of the Hellenistic and early Roman periods established a basis for all monotheistic religions, but its main sources have been preserved to a great degree through Christian transmission. This Guide is devoted to problems of preservation, reception, and transformation of Jewish texts and traditions of the Second Temple period in the many Christian milieus from the ancient world to the late medieval era. It approaches this corpus not as an artificial collection of reconstructed texts, a body of hypothetical originals, but rather from the perspective of the preserved materials examined in their religious, social, and political contexts. It also considers the other non-Christian channels of the survival of early Jewish materials, including Rabbinic, Gnostic, Manichaean, and Islamic. This unique project brings together scholars from many different fields in order to map the trajectories of early Jewish texts and traditions among diverse later cultures. It also provides a comprehensive and comparative introduction to this new field of

study while bridging the gap between scholars of early Judaism and of medieval Christianity      Translation-Driven Corpora Federico Zanettin, 2014-04-08 Electronic texts and text analysis tools have opened up a wealth of opportunities to higher education and language service providers but learning to use these resources continues to pose challenges to scholars and professionals alike Translation Driven Corpora aims to introduce readers to corpus tools and methods which may be used in translation research and practice Each chapter focuses on specific aspects of corpus creation and use An introduction to corpora and overview of applications of corpus linguistics methodologies to translation studies is followed by a discussion of corpus design and acquisition Different stages and tools involved in corpus compilation and use are outlined from corpus encoding and annotation to indexing and data retrieval and the various methods and techniques that allow end users to make sense of corpus data are described The volume also offers detailed guidelines for the construction and analysis of multilingual corpora Corpus creation and use are illustrated through practical examples and case studies with each chapter outlining a set of tasks aimed at guiding researchers students and translators to practice some of the methods and use some of the resources discussed These tasks are meant as hands on activities to be carried out using the materials and links available in accompanying downloadable resources Suggested further readings at the end of each chapter are complemented by an extensive bibliography at the end of the volume Translation Driven Corpora is designed for use by teachers and students in the classroom or by researchers and professionals for self learning It is an invaluable resource for anyone interested in this fast growing area of scholarly and professional activity      Pro Oracle Application Express John Scott, Scott Spendolini, 2008-10-23 Application Express or APEX is one of the most innovative products to come out of Oracle in years APEX is an application development framework for developing database backed applications It s easy enough to get started in that power users can quit storing data in random spreadsheets and instead centralize their data in the powerful Oracle database all without developer help Developers aren t left out however Those who choose to do so can go deep and leverage the full power and flexibility of Oracle s database engine Getting started with APEX is easy learning how to take full advantage of APEX is the problem It was the problem that is until this book came along In Pro Oracle Application Express authors John Scott and Scott Spendolini open the hood of APEX and expose the full power behind its easy to use GUI They show you what you need to know to produce powerful professionally polished applications such as user authentication models approaches to layout and navigation how to integrate Ajax how to deal with localization issues such as time zones and translations how to customize the look and feel of an APEX web site and much much more The authors are well qualified to write on APEX John Scott runs ShellPrompt a hosting service that handles many large scale APEX applications some of which he is paid to develop John is a hard core APEX developer His co author Scott Spendolini is one of the original creators of APEX Both John and Scott now base their full time careers on developing APEX applications Pro Oracle Application Express is your opportunity to learn APEX from the very best      **Pro SAP Scripts, Smartforms, and Data Migration** Sushil
