the book is subdivided into three parts In the first a novel definition of creativity in CCIs is developed in which its heterogeneity and place based nature are at the core In turn the second part addresses the phenomenon of localization choices in CCIs highlighting their heterogeneous innovativeness and the fili re which they belong to as key dimensions for the analysis In the third part the impact of CCIs on economic growth is explored This book offers new evidence on the conditions under which CCIs cluster in space and stimulate development It appeals to scholars in regional science cultural economics and related fields as well as policymakers and practitioners working in the cultural and creative industries
