Allied Coastal Forces Of World War II Vosper MTBs And US Elcos:

Allied Coastal Forces of World War II John Lambert, Al Ross, 2019-03 Allied Coastal Forces now a recognized classic work first published in 1990 remains the only publication to deal comprehensively in words photographs and drawings with the technical detail of motor torpedo boats PT boats motor gunboats launches and submarine chasers This second volume covers sixteen Vosper MTB designs and the US 70ft 77ft and 80ft ELCO designs **Allied Coastal Forces of World War II.** John Lambert, Al Ross, 2019 The major contribution made by Coastal Forces to the Allied war effort has had surprisingly little coverage in the literature of the Second World War Motor torpedo boats PT boats motor gunboats launches and submarine chasers served with distinction throughout the war and in every theatre They performed invaluable service as patrol boats convoy escorts minelayers and minesweepers harbour defence vessels light landing craft RAF rescue boats and transports for agents and clandestine missions Allied Coastal Forces now a recognised classic work and first published in 1990 remains the only publication to deal comprehensively in words photographs and drawings with the technical detail of all these boats Design construction and subsequent development are all covered and the builders construction lists fates and the technical data are given for each type Separate sections cover armament and equipment sea going qualities and habitability This second volume covers sixteen Vosper MTB designs and the US 70ft 77ft and 80ft ELCO designs US built Vosper designs supplied under lease lend are also covered while weapons systems and machinery are dealt with in detail Some 700 finely detailed drawings were drawn by the authors for this second volume in their highly acclaimed two volume work **AUTHORS** John Lambert spent nine years in the Royal Navy where he acquired his detailed technical knowledge of warships His subsequent research on small warships and naval weaponry combined with his remarkable technical drawing skills led to the creation of a body of work some of which is displayed in this volume He died in 2015 Al Ross II is the author of several books on small warships and since the 1980s has been producing a series of plans for modellers of small combatants of the Second World War and Vietnam eras He lives in Bangor Maine USA 150 b w photographs 700 line drawings 12 colour camouflage schemes Vosper MTBs and US Elcos John Lambert, 1990 *Allied Torpedo Boats* John Lambert, Les Brown, 2010-09-13 An inspirational enjoyable book with excellent representations of a wide variety of Motor Torpedo Boats by various modelers in a variety of scales ModelGeek The ShipCraft series provides in depth information about building and modifying model kits of famous warship types Lavishly illustrated each book takes the modeler through a brief history of the subject class highlighting differences between sisterships and changes in their appearance over their careers This includes paint schemes and camouflage featuring color profiles and highly detailed line drawings and scale plans The modeling section reviews the strengths and weaknesses of available kits lists commercial accessory sets for super detailing of the ships and provides hints on modifying and improving the basic kit This is followed by an extensive photographic gallery of selected high quality models in a variety of scales and the book concludes with a section on research references books monographs large scale

plans and relevant websites This volume follows the format of the highly successful Flower Class Corvettes where the extent has been doubled to include far more detailed drawings of the many different designs of British MTBs and US PT boats including their fittings sensors and weapons The content is packed with information that makes you want to turn a page from the history of torpedo boats from 1915 1945 which then goes on to model products showcase construction aftermarket products for scales 1 1200 to 1 100 Not only a reference to torpedo boats but a wonderful guide to building and getting the best out of a model AutoModeler

Torpedoes, Tea, and Medals Chris O'Flaherty, 2022-03-24 A biography chronicling one man's service during World War II as a Royal Navy commander and his career before for his bravery he was awarded the Distinguished Service Cross Further acts of gallantry in action combined with tactical innovation saw him earn two bars to his DSC as well as a Mention in Despatches he became one of only forty four officers in the Second World War to receive a DSC with two Bars After demobilization he returned to the tea trade rising to become one of Brooke Bond's senior directors supplying Britain's beloved beverage He even helped refine how to make the perfect cup of tea This is the life story of a determined brave innovative and decorated officer who has earned a place in the hearts of our nation It is the story of Derek Jake Wright DSC Praise for Torpedoes Tea and Medals A must read an enthralling look at motor torpedo boat operations off the coast of France and Belgium during World War II Naval Historical Foundation Wright clearly had a really action packed war and this book skillfully combines his coastal forces experiences with his influential role in the tea business Captain Andrew Welch FNI Royal Navy Retired

The Last Days of the Schooner America David Gendell, 2024-08-06 2025 BREWINGTON BOOK PRIZE WINNER The schooner America was a technological marvel and a child star In the summer of 1851 just weeks after her launching at New York she crossed the Atlantic and sailed to an upset victory against a fleet of champions The silver cup she won that day is still coveted by sportsmen Almost immediately after that famous victory she began a decades long run of adventure neglect rehabilitations and hard sailing always surrounded by colorful passionate personalities America ran and enforced wartime blockades She carried spies across the ocean And she was on the scene as yachtsmen and business titans spent freely and competed fiercely for the cup she first won By the early twentieth century she was in desperate need of a thorough refit The old thoroughbred floated in brackish water at the United States Naval Academy stripped of her sails and rotting in the sun Refitting America would be a massive project expensive and potentially distracting for a nation struggling to emerge from the Great Depression and preparing for a world war But the project had a powerful sponsor On a windy evening in December 1940 the eighty nine year old America was hauled groaning and complaining up a marine railway at Annapolis the first physical step in a rehabilitation rumored to have been set in motion by President Franklin Roosevelt himself The haul out brought the famous schooner into the heart of the Annapolis Yacht Yard a privately owned company with a staff capable of completing such a project but with leadership determined to convert their facility into a modern warship production plant on behalf of the United States and its allies The Last Days of the Schooner

America traces the history of the famous vessel from her design build and early racing career through her lesser known Civil War service and the never before told story of her final days and moments on the ground at Annapolis The schooner s story is set against a vivid picture of the entrepreneurial forces behind the fast focused rise of the Annapolis Yacht Yard as the United States prepares for and enters World War II As wooden warships are built around her America waits for a rehabilitation that would never happen To bring this unique story to life Annapolis sailor David Gendell delves into archival sources and oral histories and interviews some of the last living people who saw America at the Annapolis Yacht Yard [Home Waters MTBs & MGBs at War, 1939-1945](#) Leonard C. Reynolds,2000 This third and final volume in the Royal Navy Coastal Forces trilogy offers eyewitness accounts of operations in the English Channel and North Sea by the Royal Navy s short MTBs and MGBs during World War II The chronological account also traces the evolution of tactics and strategies boat construction training and administration It demonstrates dramatically the difference between the boats which began the war and those which finished it **High Performance Marine Vessels** Liang Yun,Alan Bliault,2014-07-08 High Performance Marine Vessels HPMVs range from the Fast Ferries to the latest high speed Navy Craft including competition power boats and hydroplanes hydrofoils hovercraft catamarans and other multi hull craft High Performance Marine Vessels covers the main concepts of HPMVs and discusses historical background design features services that have been successful and not so successful and some sample data of the range of HPMVs to date Included is a comparison of all HPMVs craft and the differences between them and descriptions of performance hydrodynamics and aerodynamics Readers will find a comprehensive overview of the design development and building of HPMVs [Fighting Boats for a Fighting Navy: The World War II PT Boats in contemporary advertisements: Black & White Collection](#) Patrick Matthews,2012-01-16 PT boats captured the imagination of the American public during WW2 From the darkest days of 1941 and 1942 the PTs were bravely slugging it out with the overwhelming Japanese invasion forces PTs extracted MacArthur from Manila and when he returned it was on a PT The PTs were nimble and quick and packed a wallop They were Davids to the Axis Goliaths And the crews what young man wouldn t want to be a dashing PT sailor This collection of WW2 ads follows the PTs and their crews from those dark early days to the final victory and the promise of carefree yachting in the ensuing peace Over 200 wartime PT ads are crammed into this affordable Black White Collection Also look for the companion volume Fighting Boats for a Fighting Navy Supplemental Color Edition which contains a selection of the most colorful ads from this larger B W edition **From War to Peace** Nick Robins,2021-09-30 From War to Peace tells the story of the adaptation from White Ensign to Red Ensign and to flags of other nations of the numerous classes of naval ships mainly built during the two world wars and surplus to requirements with the advent of peace It also describes ships sourced from the United States Navy and elsewhere that were converted for commercial use The most successful classes to transfer to the merchant service were the Hunt class minesweepers of the Great War Landing Craft Tank the salvage tugs of World War Two and the wooden hulled Fairmile launches which became

familiar at seaside resorts in the 1950s and 60s and of course the MFV classes that helped the fishing industry in the postwar years The story includes the successful commercial conversions of many of the Flower and Castle Class corvettes and River Class frigates notably the 1954 conversion of HMCS Stormont to a luxury yacht for the Greek shipping magnate Onassis It describes why HMS Charybdis became a passenger liner in the Great War and how HMS Albatross nearly became a luxury liner after World War Two but in fact was transformed into a very unpopular emigrant ship and ended her days as a floating casino based at Cape Town The author reveals the military antecedents of numerous commercial vessels that many would have thought were built especially for the service that they later maintained and it illustrates just how many Royal Navy vessels ended up in private ownership And the question is asked if the military had not built so many ships that were eminently suitable for commercial adaptation would the technical development of merchant shipping have progressed at a faster rate than it did The answer is a definite no and is illustrated in several ways It was former naval vessels that promoted the early development of the Ro Ro ferry former naval ships introduced numerous design innovations for example the raised foredeck common for so many years on salvage tugs and above all stripped of their military hardware ex naval ships provided opportunities for modest investment where otherwise there would have been none Copiously illustrated throughout the book tells a fascinating story of invention and ingenious ship conversion and of pragmatic adaptation in the financially stringent years after two world wars

British Motor Gun Boat 1939-45 Angus Konstam, 2013-03-20 Motor Gun Boats were the Spitfires of the Seas of the Royal Navy Bristling with small calibre guns and machine guns they served in a variety of roles during the War In the early war period they battled against German E boats in the English Channel then went on the offensive searching the enemy shore for targets of opportunity At other times they ran support for Motor Torpedo Boats and were used to deliver commandos on various raids Naval Warfare expert Angus Konstam tells the story of these small but destructive boats beginning with their design and development and carrying through to their operational use in both the European and Mediterranean theatres of World War II

Storming St. Nazaire James Dorrian, 2009-04-21 This WWII history examines an early British commando raid on Nazi occupied France through extensive interviews with survivors from both sides On March 28th 1942 a combined force of British Commandos and Royal Navy disembarked for the Atlantic coast of Nazi occupied France Their mission Operation Chariot was a daring amphibious attack on a fortified drydock in the port of Saint Nazaire The obsolete destroyer HMS Campbeltown was packed with delayed action explosives and rammed into the gates of Normandie Dock Though the dock was destroyed the underequipped raiding party faced an overwhelming counter attack Though the St Nazaire raid was a significant event in the evolution of special warfare tactics it has not been studied in detail Historian James Dorrian draws on interviews with more than a hundred survivors both British and German to present this remarkable account Storming St Nazaire covers all aspects of the engagement including the final ironic incident that resulted in more German casualties than the main battle itself

The Mariner's Mirror Leonard George Carr

Laughton, Roger Charles Anderson, William Gordon Perrin, 1997 **The British National Bibliography** Arthur James Wells, 1995 **Naval History**, 1994 *Warship*, 1993 *British Coastal Forces* Norman Friedman, 2023-04-30 The Royal Navy invented the fast motor torpedo boat during the First World War and used it and other small coastal craft to great effect during the Second This book tells the dramatic story of British coastal forces both offensive and defensive in both World Wars and beyond In the Second World War British coastal forces fought a desperate battle to control the narrow seas particularly the Channel and the North Sea and took the war to the coasts of German occupied Europe fighting where larger warships could not be risked They also made a significant contribution to victory in the Mediterranean but it was primarily warfare in home waters that shaped wartime British Coastal Forces and left lessons for postwar development In this book Norman Friedman uniquely connects the technical story of the coastal craft and their weapons and other innovations with the way they fought In both world wars much of the technology was at the edge of what was feasible at the time Boats incorporated considerable British innovation and also benefited from important US contributions particularly in supplying high powered engines during World War II In contrast with larger warships British coastal forces craft were essentially shaped by a few builders and their part in the story is given full credit They also built a large number of broadly similar craft for air sea rescue and for completeness these are described in an appendix This fascinating dramatic story is also relevant to modern naval thinkers concerned with gaining or denying access to hostile shores The technology has changed but the underlying realities have not This book includes an extensive account of how coastal forces supported the biggest European example of seizing a defended shore the Normandy invasion That was by far the largest single British coastal forces operation demanding a wide range of innovations to make it possible Like other books in this series this one is based very heavily on contemporary official material much of which has not been used previously like the extensive reports of US naval observers who were allowed wide access to the Royal Navy as early as 1940 Combined with published memoirs these sources offer a much more complete picture than has previously appeared of how Coastal Forces fought and of the way in which various pressures both operational and industrial shaped them MER: Marine Engineers Review, 1994 **Ships Monthly**, 1996 *Together We Stand* James Holland, 2005 When the Axis forces were finally driven from North Africa in May 1943 over 250 000 were taken prisoner as many as had surrendered to the Russians at Stalingrad It was a major victory and a crucial stepping stone to the future invasion of Italy and France Yet just a year before the Allies had been facing one disaster after another In North Africa the Eighth Army's terrible defeat at Gazala represented Britain's nadir Slowly but surely however the Allies began to turn the tide This crucial period was a time of learning for both America and Britain and by the end of the Tunisian campaign they had finally gained material but also certain tactical advantages over Germany particularly in the air war As this book shows the development of a tactical air force principles that are still used to this day were founded over the skies of North Africa And yet this is also a book about the men and women who found themselves caught up in this

struggle people drawn from all parts of the globe and brought together to make up these polyglot Allied forces British and American Nepalese and Punjabi South African and Australian Maori and Zulu and from all ranks and all services BOOK
