Intonation A. Botinis, 2012-12-06 ANTONIS BOTINIS 1 1 Background This introduction provides essential information about the structure and the objects of study of this volume Following the introduction fourteen papers which represent current research on intonation are organised into five thematic sections I Overview of Intonation II Prominence and Focus III Boundaries and Discourse IV Intonation Modelling and V Intonation Technology Within the sections the papers are arranged thematically although several papers which deal with various aspects of intonation and prosody are basically intersectional As the title indicates Intonation Analysis Modelling and Technology is a contribution to the study of prosody with major emphasis on intonation Intonation and tonal themes are thus the central object of the volume although temporal and dynamic aspects are also taken into consideration by a good number of papers Although tonal and prosodic distinctions have been dealt with throughout man's literate history with reference to the study of language for example by classical philosophers such as Plato and Aristotle it is in recent decades that we have witnessed the most fertile growth in intonation studies as with experimental phonetics and speech technology in general As Rossi this volume points out intonation research really began to blossom in the sixties with a multi fold increase in prosodic studies reflected in contributions to the International Congress of Phonetic Sciences ICPhS and in the international literature

Documenting Endangered Languages Geoffrey Haig, Nicole Nau, Stefan Schnell, Claudia Wegener, 2011-11-30 The rapid decline in the world's linguistic diversity has prompted the emergence of documentary linguistics While documentary linguistics aims primarily at creating a durable accessible and comprehensive record of languages it has also been a driving force in developing language annotation and analysis software archiving architecture improved fieldwork methodologies and new standards in data accountability and accessibility More recently researchers have begun to recognize the immense potential available in the archived data as a source for linguistic analysis so that the field has become of increasing importance for typologists but also for neighbouring disciplines The present volume contains contributions by practitioners of language documentation most of whom have been involved in the Volkswagen Foundation's DoBeS programme Dokumentation Bedrohter Sprachen The topics covered in the volume reflect a field that has matured over the last decade and includes both retrospective accounts as well

as those that address new challenges linguistic annotation practice fieldwork and interaction with speech communities developments and challenges in archiving digital data multimedia lexicon applications corpora from endangered languages as a source for primary data typology as well as specific areas of linguistic analysis that are raised in documentary linguistics
