Welniak, 1982 The Personal Distribution of Income in an International Perspective Richard Hauser, Irene Becker, 2012-12-06 Irene Becker and Richard Hauser Bringing Income Distribution in From The Cold was the title Anthony B Atkinson gave his Presidential Address to the Royal Economic Society in 1996 This provocative formulation was intended to draw attention to the way in which the subject of income distribution long has been marginalised in the field of economics Atkinson 1997 In recent years however scientific interest in matters of personal income distribution has been growing One reason for this recent concern stems from the political sphere The factors of reinforced competition between countries due to the globalisation of markets and European integration high unemployment rates and demographic changes necessitate reforms of labour markets tax systems and social security systems These reforms will affect both allocation and distribution so that reliable information on both areas is needed to devise balanced political programs Another reason for the burgeoning literature on personal income distribution is the improved availability of data on individual income which are a major prerequisite for detailed analyses of distribution topics Last but not least the development of powerful computers advanced statistics econometric packages and extended micro simulation models enables researchers both to work with huge individual data sets to describe and explain the personal distribution of income and to simulate the effects of political social and economic programs The volume at hand is based on some of the research advances in this field during the last decade

Reporting on Income Distribution and Poverty

Richard Hauser, Irene Becker, 2013-06-29 Richard Hauser Irene Becker Johann Wolfgang Goethe University Frankfurt/Main

This volume marks the end of a research project of the editors titled The Development of the Personal Distribution of Income in Germany that was financed by the Hans Bockler Foundation from 1994 to 2001 This research concentrated on a national perspective studying many aspects of income inequality and poverty in West Germany between 1969 and 1998 and extending the analyses to inequality in East Germany after the German reunification Now at the end point of our empirical analyses we want to expand the perspective to other research in this field to challenges for future research and to the European dimension rather than to summarise all our results which is done in another book In 2001 the German government published its first Poverty and Wealth Report which also draws on results from our research project Thus the intention of this volume is threefold presenting and advancing German reporting on poverty in other countries and wealth examining experience with advanced reporting schemes tries and discussing comparative concepts for social monitoring in the European Union
