presented in clear and highly readable translation. Philosophy in Review. First published in German in 1995, volume 77 of
Heidegger's Complete Works consists of three imaginary conversations written as World War II was coming to an end.
Composed at a crucial moment in history and in Heidegger's own thinking, these conversations present meditations on
science and technology, the devastation of nature, World War II and the nature of evil. Heidegger also delves into the
possibility of release from representational thinking into a more authentic relation with being and the world. The first
conversation involves a scientist, a scholar and a guide walking together on a country path; the second takes place between a
teacher and a tower warden; and the third features a younger man and an older man in a prisoner of war camp in Russia.
