The Global Environmental Benefits of Land Degradation Control on Agricultural Land Stefano

Pagiola, 1999-01-01 This book focuses on the global effects of land degradation but emphasizes other important levels of land degradation at the field level it may result in reduced productivity at the national level it may cause flooding and sedimentation and at the global level it can contribute to climate changes damaging bio diversity and international waters The effects on climate changes are explored and the report questions the extent to which land degradation on agricultural land affects climate change Does it increase emissions of greenhouse gases Does it affect land s capacity to serve as a carbon sink Can appropriate management enhance both land s productivity and its capacity to store carbon The carbon cycle in soils is analyzed indicating land degradation is likely to reduce the ability of soils to serve as carbon sink and release stored carbon into the atmosphere and bio diversity effects are likely to be adverse Global benefits of land degradation control include afforestation to allow increased carbon sequestration and provide adequate bio diversity habitats and community based wildlife management can provide alternatives to some marginal areas Although integrating global dimensions into land degradation control projects may reverse the field level or national problems it is causing difficulties and constraints will likely contribute to the failure of these projects

The Greening of Economic Policy Reform Jeremy J. Warford, Mohan Munasinghe, Wilfredo Cruz, 1997 This report in two volumes addresses environmental impacts stemming from economy wide policy reforms and seeks to clarify the nature of the economic physical institutional and cultural aspects of their relationship Volume 1 summarizes the case studies and synthesizes their key principles Volume 2 explores the case studies in full length They reflect a wide range of country situations and environmental problems Pollution issues are addressed such as air quality and energy use in Poland and Sri Lanka while a variety of natural resource related issues are covered in the other studies deforestation and land degradation in Costa Rica migration and deforestation in the Philippines agricultural land degradation due to overgrazing in Tunisia fertility losses due to extension of cultivation areas in Ghana water resource depletion in Morocco and wildlife management in Zimbabwe The case studies also use a variety of analytical methods to illustrate the different approaches to identifying the environmental implications of economy wide reforms These methods range from tracing the links between economic incentives and resource use through direct observation to relying on more complex economic modeling of policies and their environmental effects In all the studies however the analytical approach uniformly requires identifying key environmental concerns and relating them to the agenda of priority sectoral and macroeconomic reforms

Setting Priorities Environmental Action Programme for Central and Eastern Europe, 1998 Despite efforts by Central and Eastern European CEE countries to tackle environmental problems there are still a number of serious environmental problems that require immediate and urgent action The Environmental Action Programme EAP provides a

framework and guide for identifying the highest priority problems and for developing realistic efficient and cost effective solutions This book describes the features of the broad strategy and action framework that EAP represents Annexes provide summaries of topics such as human health problems and pollution hot spots the impact of economic reform and industrial restructuring and priorities for environmental expenditure Boxes discuss nitrates in drinking water in Romania short term threats to the environment in Russia and debt for environment swaps in Poland The American Bibliography of Slavic and East European Studies for 1994 Patt Leonard, Rebecca Routh, 1997-05-31 This text provides a source of citations to North American scholarships relating specifically to the area of Eastern Europe and the former Soviet Union It indexes fields of scholarship such as the humanities arts technology and life sciences and all kinds of scholarship such as PhDs

Market-based Instruments for Environmental Policymaking in Latin America and the Caribbean Richard M. Huber, H. Jack Ruitenbeek, Ronaldo Seroa da Motta, 1998 To preserve the environment with the lowest possible cost to the social sector means that private costs should be aligned with social costs Many governments in the Latin American and Caribbean Region are doing this now using market based instruments MBIs This publication investigates the use of MBIs in the Latin America and the Caribbean LAC context The investigation covers a sample of eleven countries in the region and a cross section of environmental issues in an urban setting **Smog Alert** Derek Elsom, 2014-04-04 The world's cities are choking on pollution from traffic and industry With the health of over 1.6 billion people under threat poor urban air quality is fast becoming one of the most pressing environmental problems of our times Smog Alert examines the causes and scale of urban air pollution identifying who is most at risk and what particular health risks various pollutants pose It then considers an effective framework for air quality management so that national and city authorities can consider what pollution control policies and measures are needed to deliver healthy urban air quality and to sustain it in the future Having established the background and framework the book examines the existing and alternative measures to monitor and combat the declining air quality It assesses smog alert systems the potential for cleaner car and fuel technology sustainable traffic management and public transport policies and methods of controlling both industrial and residential emissions Detailed case studies illustrate the severity and breadth of the problem from the first serious photochemical smogs in Los Angeles to the dire warning offered by Mexico City and from London the city which coined the word smog to Athens pollution phenomenon the nefos Drawing on the lessons learned from past experience Smog Alert provides a comprehensive analysis of how health air quality may yet be achieved in the world's cities

Environmental Regulation in Transforming Economies: The Case of Poland Piotr Jasinski, Helen Lawton-Smith, 2018-12-17 First published in 1999 the book is based on papers given at the final workshop of a research project into the evolution of environmental regulation in Poland undertaken as part of the UK's ERSC Global Environmental Change Programme Other invited papers focused on the development of regulatory policy in transforming economies and in the UK Furthermore the book highlights the weakness of internal political processes in

Poland and the important role played by foreign sponsored pressures whilst examining the divergence between the way environmental charges are supposed to operate and the ways in which they are implemented and enforced Topics covered include the links between privatisation and the environment the saline water problem in Upper Silesia enforcement of and compliance with environmental charges air pollution in Krakow and the structure of the Polish environmental administration system

Environmental Impacts of Macroeconomic and Sectoral Policies Mohan Munasinghe, International Society for Ecological Economics, 1996-01-01 The importance of violence as a contributory factor to urban poverty in Jamaica has gone largely unresearched This paper outlines the results of a study undertaken by the World Bank and the government of Jamaica to focus on the issue The study uses a participatory urban appraisal methodology in five poor urban areas mainly in Kingston to identify and understand local community perceptions of four different aspects of violence its causes its interrelationship with poverty its impact on employment economic and social infrastructure and local social institutions and ways in which government communities households and individuals can work to reduce it

The Theory and Practice of Command and Control in Environmental Policy Peter Berck, 2018-01-12 This title was first published in 2003 Economists have had increasing success in arguing the merits of market based approaches to environmental problems By making polluting expensive market based approaches provide polluters with incentives to clean up rather than mandates to stop polluting These approaches include pollution taxes transferable emissions permits and subsidies for pollution abatement The purpose of this volume is to explore the situations where Command and Control CAC may not be all bad and in fact might even have some advantages over market based instruments MBI

Macroeconomics and the Environment Mr. Ved P. Gandhi, 1996-06-14 Microeconomic policies dealing with individual industries and economic sectors have traditionally addressed environmental concerns but increasingly the environment is being viewed in terms of the macro economy To improve its understanding of the interrelationship between macroeconomics and the environment the IMF held a seminar in May 1995 at which recognized experts from academic and research institutions nongovernmental organizations and staff from the World Bank and the IMF shared their views on how macroeconomic policies affect the environment and how environmental policies affect the macro economy The present volume edited by Ved P Gandhi contains the papers and proceedings of this seminar

Pollution Abatement Strategies in Central and Eastern Europe Michael A. Toman, 2014-04-04 Protecting environmental quality while pursuing economic development poses a particularly difficult challenge to the countries of Central and Eastern Europe where political and economic systems are changing rapidly following decades of environmental neglect and economic mismanagement Advanced industrial nations also face difficult decisions about priorities and procedures for providing financial assistance to the region In order to identify workable solutions Pollution Abatement Strategies in Central and Eastern Europe investigates some of the leading pollution problems that these countries now face and examines the link between economic restructuring and environmental improvement Contributors to the volume

assess the changes in the region's environmental conditions likely to result from economic restructuring and the benefits that might arise from improvements. They also consider the design of effective environmental policies for economies in transition including the need to introduce or reform basic economic legal and regulatory constructs. Comparisons of incentive based versus command and control environmental policies suggest that despite the difficulties in implementing them incentive based policy options are worth pursuing in Central and Eastern Europe. Implementing Environmental Policies in Central and Eastern Europe Tomasz Żylicz, 1993. **Energy Abstracts for Policy Analysis**, 1987. *Economywide Policies and the Environment* Robin W. Bates, World Bank. Environment Department, 1994. *EPA Publications Bibliography Quarterly Abstract Bulletin* United States. Environmental Protection Agency, 1994-10. *Acid Precipitation*, 1993-07. **Climate Change 1995: Economic and Social Dimensions of Climate Change** Hoesong Yi, Intergovernmental Panel on Climate Change. Working Group III., 1996-06-27. The consequences of climate change for society are analysed in this landmark assessment from the IPCC. This book assesses the available knowledge on the many issues that society has to face including the international decision making framework applicability to climate change of techniques for assessing costs and benefits the significant social costs of projected climate change and the economic assessment of policy instruments to combat climate change nationally and internationally. Some important conclusions of this Second Assessment Report indicate that 10 to 30% of greenhouse gas emissions in most countries can be reduced at negative or zero cost no regrets measures. Also the literature indicates that climate change will cause aggregate net damage which provides an economic rationale for going beyond no regrets measures. It also indicates that a portfolio of mitigation adaptation and research measures is a sound strategy for addressing climate change given the remaining uncertainties. This report speaks directly to the issues that are faced by the many countries committed to limit emissions of greenhouse gases by the year 2000 and currently negotiating actions to be taken beyond that date. Will be of great value to the international community of policymakers interested in the consequences of climate change as well as to economists social and natural scientists. **World Bank Research Program** World Bank, 1994. *The Journal of Environment & Development*, 2000.
