Science, Worldviews and Education Michael Matthews, 2009-07-14 This book has its origins in a special issue of the journal Science Education Volume 18 Numbers 6 7 2009 The essay by Costas Skordoulis Science and Worldviews in the Marxist Tradition did not appear in that special issue due to a mistake in production scheduling It was published in an earlier issue of the journal Volume 17 Number 6 2008 but has been included in this book version of the special issue As explained in the Introduction the catalyst for the journal special issue was the essay on Science Worldviews and Education submitted to the journal by Hugh G Gauch Jr This was circulated to the other contributors who were asked to write their own contribution in the light of the arguments and literature contained in the paper Hugh made brief Responses and Clarifications after the papers were written However the Tanis Edis

article on Islam and my own article on Priestley were processed too late to benefit from Hugh's appraisal. The journal is associated with the International History Philosophy and Science Teaching Group which was formed in 1987. The group stages biennial international conferences and occasional regional conferences; details can be found at www.ihpst.org. The group though the journal conferences and its electronic newsletter at www.ihpst.org.

Logic, Reasoning, and Rationality Erik Weber, Dietlinde Wouters, Joke Meheus, 2014-08-06. This book contains a selection of the papers presented at the Logic Reasoning and Rationality 2010 conference LRR10 in Ghent. The conference aimed at stimulating the use of formal frameworks to explicate concrete cases of human reasoning and conversely to challenge scholars in formal studies by presenting them with interesting new cases of actual reasoning. According to the members of the Wiener Kreis there was a strong connection between logic reasoning and rationality and that human reasoning is rational in so far as it is based on classical logic. Later this belief came under attack and logic was deemed inadequate to explicate actual cases of human reasoning. Today there is a growing interest in reconnecting logic reasoning and rationality. A central motor for this change was the development of non-classical logics and non-classical formal frameworks. The book contains contributions in various non-classical formal frameworks, case studies that enhance our apprehension of concrete reasoning patterns and studies of the philosophical implications for our understanding of the notions of rationality.

Confirmation, Empirical Progress, and Truth Approximation, 2016-08-01. This book is the first of two volumes devoted to the work of Theo Kuipers, a leading Dutch philosopher of science. Philosophers and scientists from all over the world, thirty-seven in all, comment on Kuipers' philosophy and each of their commentaries is followed by a reply from Kuipers. The present volume focuses on Kuipers' views on confirmation, empirical progress, and truth approximation as laid down in his *From Instrumentalism to Constructive Realism* (Kluwer, 2000). In this book Kuipers offered a synthesis of Carnap's and Hempel's confirmation theory on the one hand and Popper's theory of truth approximation on the other. The key element of this synthesis is a sophisticated methodology which enables the evaluation of theories in terms of their problems and successes even if the theories are already falsified and which also fits well with the claim that one theory is closer to the truth than another.

Ilkka Niiniluoto, Patrick Maher, John Welch, Gerhard Schurz, Igor Douven, Bert Hamminga, David Miller, Johan van Benthem, Sjoerd Zwart, Thomas Mormann, Jes's Zamora Bonilla, Isabella Burger, Johannes Heidema, Joke Meheus, Hans Mooij, and Diderik Batens comment on these ideas of Kuipers and many present their own account. The present book also contains a synopsis of *From Instrumentalism to Constructive Realism*. It can be read independently of the second volume of *Essays in Debate with Theo Kuipers* which is devoted to Kuipers' *Structures in Science* (2001).

Laws of Nature Peter Mittelstaedt, Paul A. Weingartner, 2005-11-04. This book is not a textbook to become acquainted with the laws of nature. An elementary knowledge about laws of nature, in particular the laws of physics, is presupposed. The book is rather intended to provide a clarification of concepts and properties of the laws of nature. The authors would like to emphasise that this book has been developed/created as a real teamwork. Although

the chapters and in some cases parts of the chapters were originally written by one of the two authors all of them were discussed thoroughly and in detail and have been revised and complemented afterwards Even if both authors were in agreement on most of the foundational issues discussed in the book they did not feel it necessary to balance every viewpoint Thus some individual and personal difference or emphasis will still be recognisable from the chapters written by the different authors In this sense the authors feel specially responsible for the chapters as follows Mittelstaedt for Chaps 4 9 3 10 11 2 12 13 and Weingartner for Chaps 1 2 3 5 7 8 2 9 2 9 4 The remaining parts are joint sections Most of the chapters are formulated as questions and they begin with arguments pro and contra Then a detailed answer is proposed which contains a systematic discussion of the question This is the respective main part of the chapter It sometimes begins with a survey of the problem by giving some important answers to it from history of Chaps 6 and 9
