Alternative Media Meets Mainstream Politics Joshua D. Atkinson,Linda Kenix,2019-05-20 Alternative Media Meets

Mainstream Politics Activist Nation Rising demonstrates the rising role that alternative media play in contemporary mainstream political communication. The rise of the modern Internet and social media platforms have allowed for the proliferation of alternative media across society in ways that were not possible twenty years ago. Today alternative media have become more intertwined with mainstream media and have become increasingly relevant in mainstream political communication. Contributors focus on three primary sites where such media seem to have established growing influence in recent years: political parties, mainstream political news, and the production of participatory media that allow for engagement. Scholars of communication, political science, sociology, and media studies will find this collection useful.

Publicity and the Canadian State Kirsten Kozolanka, 2014-01-01. *Publicity and the Canadian State* is the first sustained study of the contemporary practices of political communication focusing holistically on the tools of the publicity state and their ideological underpinnings: advertising, public opinion research, marketing, branding, image consulting, and media and information management, as well as related topics such as election law and finance, privacy, think tank lobbying, and non-election communication campaigns. Media Independence James Bennett, Niki Strange, 2014-11-20. Media independence is central to the organization, make up, working practices, and output of media systems across the globe. Often stemming from western notions of individual and political freedoms, independence has informed the development of media across a range of platforms: from the freedom of the press as the fourth estate and the rise of Hollywood's Independent studios and Independent television in Britain, through to the importance of Indy labels in music and gaming, and the increasing importance of independence of voice in citizen journalism. Media independence for many therefore has come to mean working with freedom from state control or interference from monopoly, from market forces, as well as freedom to report, comment, create, and document without fear of persecution. However, far from a stable concept that informs all media systems, the notion of media independence has long been contested, forming a crucial tension point in the regulation, shape, size, and role of the media around the globe. Contributors including David Hesmondhalgh, Gholam Khiabany, Jos van Dijck, Hector Postigo, Anthony Fung, Stuart Allan, and Geoff King demonstrate how the notion of independence has remained paramount but contested in ideals of what the media is for, how it should be regulated, what it should produce, and what working within it should be like. They address questions of economics, labor relations, production, cultures, ideologies, and social functions.

scanning project subject heading reform and other issues The aim of the essays in Library Juice Concentrate is to provoke original thought and to encourage newcomers in the field to participate in professional discourse with confidence and with attention to the intellectual and political struggles of the past *The Handbook of Journalism Studies* Karin

social media in political processes in non western and non democratic contexts Using Zimbabwe as a case study the book demonstrates how activists and ordinary people deploy social media particularly Facebook to subvert an enduring hegemonic state However the book also highlights how authoritarian regimes are in turn learning and adapting to the information age challenging the impact of digital activism Studies of digital activism in the Global South are often centred around democracy but this book paints a more complex picture examining the role and effect of digital activism in challenging state hegemony in authoritarian contexts The book notes that while communication technologies help mediate activism they are also simultaneously constrained by pre existing and emergent challenges tied to the social and political context and the inherent limitations of those technologies The book investigates the tactics used by digital activists the contextual factors and restrictive political environment they operate in including the role of pro government activists and ultimately the impact of digital activism given these constraints From the case of Zimbabwe the book builds out a broader theoretical analysis of the evolution of third world protest in the digital age examining the limitations of activists actions and the ideological deficit in online activism to ferment a virulent counter hegemony Representation Jenny Kidd, 2015-10-23 Written especially for

undergraduate students Representation synthesises and updates our understandings of representation and the tools for its analysis for use in the new mediascape Jenny Kidd uses an engaging range of current examples and a lively style to explore a number of key questions reflecting existing and contemporary debates about representation These key questions include Who owns and manages representations Whose realities are foregrounded and whose are consigned to invisibility To what extent are increased opportunities for self representation altering the landscape And what happens to representation within

the noisy playful and often subversive communications of the Internet Kidd considers the political social and cultural importance of representation across a broad spectrum of cultural and creative industries This examination of the relationship between media cultural representations and the construction of reality identity and society makes it an ideal text for students that need to get to grips with this core thematic of media and cultural studies *Hong Kong Media* Chi Kit Chan, Gary Tang, Francis L. Lee, 2022-08-11 This book explores the challenges to news professionalism and media autonomy stemming from the state market pressure the digitalization of communication and a polarized civil society in Hong Kong China is tightening its control over post handover Hong Kong which includes press freedom Harsh market competition coupled with shifting readership from mainstream media to digital platforms is squeezing the business viability of media organizations The polarization of civil society in post handover Hong Kong had degraded consensual values upon which news professionalism relies Journalists have had to reorient news professionalism and media power in the midst of state society tension market pressure and the shifting communication mode driven by digitalization These are the key questions for Hong Kong media This dynamic intervention will be of interest to journalists scholars of civil society and scholars of Asian politics *An ANTi-History about Transgender Inclusion in the Brazilian Labor Market* Camilla Pinto Luna, Denise Franca Barros, 2023-03-29 An ANTi History about Transgender Inclusion in the Brazilian Labor Market answers repeated calls to correct the neglect of voices from the global south and the scarcity of work on gender and transgender peoples in organizational history
