Alvar Aalto, 1898-1976 Alvar Aalto,1981 **Alvar Aalto** Malcolm Quantrill,1990-02-01 Alvar Aalto was remarkably inventive in architecture and industrial design Moreover his command of technology was integrated with a humanistic style of building and like Saarinen and Frank Lloyd Wright he sought an organic synthesis of his structures with their surroundings Aalto s success in approaching these ideals may account for the extraordinary spread of his influence on an international scale In this broad study of Aalto s work Malcolm Quantrill assesses its development in terms of two powerful sources the Finnish National Romantic movement and the Modern movement in architecture His critique of Aalto s most significant buildings and furniture designs is complemented by photographs of many stages of their creation from the spontaneity of initial sketches to the completed detail Professor Quantrill first met Alvar and Elissa Aalto at Muuratsalo in June 1953 and he has been studying and photographing Aalto s buildings ever since His book provides striking insights into the work of one of the greatest architects of the century **The Grove Encyclopedia of American Art** Joan M. History of Design and Design Law Tsukasa Aso,Christoph Rademacher,Jonathan Dobinson,2022-04-22 For the first time this book provides an up to date history of product design and product design law covering 17 countries Japan Korea China Singapore the United Kingdom Germany France Italy the Nordic countries Denmark Finland Iceland Norway and Sweden Russia the United States Brazil and Australia selected for their innovative or influential approach to design or design protection Each country is the subject of two chapters one on the history of design and the other on the history of design law authored by experts in design and intellectual property IP law This unique interdisciplinary approach explains why and how various national design protection systems that can include design copyright trade mark competition and civil laws developed making it an ideal book for students researchers and lawyers The book also serves as an international survey of different national policy and legal responses to historical developments and specific design and legal issues allowing readers to consider their advantages and disadvantages and so is also recommended for policy and law makers as well as organizations that administer IP rights Topics include the subject matter of design protection procedural and substantive requirements design registration infringement and the overlap of design rights and other IP rights The chapters on design history provide further context to the historical development of these legal concepts by considering major design movements key designers and iconic designs and the current state of design The chapters highlight the connected and often complementary relationship between the two histories not only for

each country but at the regional and international level often as a result of government policies trade colonialism immigration and globalisation Design and design practice continue to become more global and evolve with developments in technology At the same time design laws are not internationally harmonized and continue to develop at the national level with a number of significant changes occurring in recent years This timely book shows how the lessons of the past continue to inform the future direction of design and the legal systems developed to protect it **The Architecture of Use** Stephen

Grabow, Kent Spreckelmeyer, 2014-10-03 By analyzing ten examples of buildings that embody the human experience at an extraordinary level this book clarifies the central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper purposes and meanings of everyday life The Architect's Engineer Sir Nigel Thompson, 2022-06-07 Sir Nigel Thompson walked to school around the

bomb craters of the London Blitz it made him want to build things rather than knock them down After studying structural engineering in Africa he worked on hospitals and theaters in London and later headed the team that designed University of Qatar He went on to design Embankment Place a massive office complex built over London's Charing Cross railway station Turning from building to rebuilding he explored construction opportunities for British firms during the Gulf War in Kuwait's still burning oil fields Following the 1999 bombing of Serbia and Kosovo he led a reconstruction task force in Kosovo at the request of UK Prime Minister Tony Blair for which he was knighted Thompson's memoir details his long career in architectural design and construction and in restorative development *Approaches to Drawing in Architectural and Urban*

Design Fabio Colonnese, Nuno Grancho, Robin Schaeffer, 2024-04-04 Architects draw for a variety of purposes they draw to assimilate places and precedents to generate ideas to develop a concept into a consistent project in a team to communicate ideas and solutions to patrons and clients and to guide building contractors during the construction stages as well as to produce further elaborations in order to publish their project in a treatise a journal or their own portfolio Most importantly architects draw to think and to manage complexity in a visual way By taking into account innovative and interdisciplinary uses of architectural drawing in the design process both historical and current the collection of chapters and interviews in this book frames a new critical perspective and a uniquely contextual appreciation of drawing as a way to encourage spatial thinking and practice in architecture and urbanism The authors take the discussion to a new level of

philosophical sophistication while also considering drawing in relation to a series of specific engagements with urban development planning and architecture

Post-Western Histories of Architecture Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23 This book seeks to provide an alternative post Western perspective to the history of contemporary architecture It puts forward detailed critical analyses of various areas of the world including Europe Latin America Africa China Australia India and Japan where particular movements of architecture have developed as active political acts The authors focus on a broad spectrum of countries architectures and architects that have developed a design approach closely linked to the building context The concept of context is broad and includes various economic social cultural political and natural aspects In all cases the architects selected in this book have chosen to view context as an opportunity However each architect has considered certain specific aspects of context some have been very attentive to the social context others to material aspects or typological issues and still others to aspects related to political visions or economic factors The analysis critically highlights interesting creative and respectful design approaches towards local conditions such as sustainability in Nordic Europe climate conscious design in Africa and the bottom up sensitivity of India The book s main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment Thanks to its valuable examples this book strives to make a conscious contribution to establishing a bulwark against the current flattening out processes that architecture is experiencing This book will be of relevance to researchers teachers and students interested in the history of architecture architecture and planning and postcolonial studies
