Wisconsin Henry Joseph Cox, 1910 Cultivation of cranberries confined to three States The cultivation of cranberries in the United States is confined mainly to three States Massachusetts New Jersey and Wisconsin In Massachusetts the cranberry growing region in turn is limited almost entirely to the counties of Plymouth Barnstable and Bristol in New Jersey to Cape May Atlantic Gloucester Burlington Ocean and Monmouth counties and in Wisconsin to Wood Jackson Juneau and Monroe counties in the Wisconsin River Valley and to Waushara and Winnebago counties in the Fox River Valley Fig 1 for map of Wisconsin For several years there has been a marsh in the village of Cameron Wis and recently one was started in the Lake Superior region near the town of Ashland Wis The cultivation is slowly extending to Michigan and Minnesota and even Oregon but the cultivated marshes in the three states last named are at present comparatively of no importance There are of course wild cranberry marshes in several of the Northern States but the berries picked therefrom are seldom sufficient to supply even local needs They are of little consequence as compared with the fruit produced in the cultivated marshes of Massachusetts New Jersey and Wisconsin Introduction **Canadian Medicinal Crops** Ernest Small, Paul M.

North American Cornucopia Ernest Small, 2013-09-23 Many North American plants have characteristics that are especially promising for creating varieties needed to expand food production and there are excellent prospects of generating new economically competitive crops from these natives The inadequacy of current crops to meet the

food demands of the world's huge growing population makes the potential of indigenous North American food plants even more significant. These plants can also generate crops that are more compatible with the ecology of the world and many also have inherent health benefits. Presenting detailed scholarship in a thoroughly accessible style and numerous entertaining anecdotes, *North American Cornucopia: Top 100 Indigenous Food Plants* is a full color book dedicated to the most important 100 native food plants of North America north of Mexico that have achieved commercial success or have substantial market potential. The introductory chapter reviews the historical development of North American indigenous crops and factors bearing on their future economic success. The rest of the book consists of 100 chapters each dedicated to a particular crop. The book employs a user friendly chapter format that presents the material in sections offering in depth coverage of each plant. The first section of each chapter provides information on the scientific and English names of the plants followed by a section on the geography and ecology of the wild forms accompanied by a map showing the North American distribution. A section entitled Plant Portrait comprises a basic description of the plant its history and its economic and social importance. This is followed by Culinary Portrait concerned with food uses and culinary vocabulary. The chapters then provide an analysis of the economic future of each crop discuss notable and interesting scientific or technological observations and accomplishments and present extensive references.

Logging Railroads of the Adirondacks William Gove, 2006-01-16 The period of 1890-1950 marked the romantic era of steam power as the rails reached deep into the old growth of the Adirondack woods to harvest the timber crop. In addition he addresses the political and economic forces determining the location and viability of logging railroads, villages and the forest industry. *The Sandbar* , *America's Founding Fruit* Susan Playfair, 2014-10-07 The cranberry *Vaccinium macrocarpon* is one of only three cultivated fruits native to North America.
