**Every American an Innovator** Matthew Wisnioski, 2025-05-13 A landmark cultural history that reveals how the relentless pursuit of innovation has transformed our society our institutions and our inner selves For half a century innovation served as a universal good in an age of fracture That consensus is cracking While the imperative to innovate for a better future continues to fuel systemic change around the world critics now assail innovation culture as an engine of inequality or accuse its do gooders of woke groupthink What happened Drawing on a decade of research Every American an Innovator by Matthew Wisnioski investigates how innovation a once obscure academic term became ingrained in our institutions our education and our beliefs about ourselves Wisnioski argues that innovation culture did not spring from the digital revolution nor can it be boiled down to heroic entrepreneurs or villainous capitalists Instead he reveals the central role of a new class of experts in spreading toolkits and mindsets from the cornfields of 1940s Iowa to Silicon Valley tech giants today This group of engineers philosophers bureaucrats and business leaders posited that innovators were society s most important change agents and remade the nation in their image The innovation culture they built transcended partisan divisions and made strange bedfellows Wisnioski shows how Kennedy era policymakers inspired President Nixon s dream of a Nobel Prize for innovators how anti military professors built the first university incubators for entrepreneurs how radical feminists became millionaire consultants how demands for a rust belt manufacturing renaissance inspired theories of a global creative class how programs that encouraged girls and minority children to pursue innovative lives changed the nature of childhood play and why the innovation consensus is now in dispute

Innovation and Adaptation in War Matthew A. Tattar, 2025-05-20 An analysis of advances in military technology that illustrates the importance of organizational flexibility in both an attacker s innovations and an opponent s adaptations How important is military innovation in determining outcomes during armed conflict In Innovation and Adaptation in War Matthew Tattar questions the conventional wisdom that to succeed military organizations must innovate early and often Because successful methods of warfare are soon widely imitated or countered on the international stage the advantages of a particular innovation quickly evaporate Therefore Tattar argues large scale innovations at the cost of organizational flexibility and the ability to adapt to an adversary s innovations may not be the optimal path not just because force readiness is vital but also because innovation does not provide as long lasting and decisive an advantage as may have been previously thought Although other scholars have analyzed the sources of military innovation Tattar is the first to focus on the relationship between innovation and specific military outcomes Looking at several different types of military organizations and many different types of battles he draws on theoretical works in depth historical research and case studies and finds that the initial advantages that are generated by innovation disappear far too rapidly in wartime for militaries to depend on them for victory Furthermore as Tattar demonstrates emphasizing innovation in defense planning at the expense of organizational flexibility can have significant negative consequences The decisive factor in successful adaptation more often than not is a well positioned and flexible organization Providing both a new framework for studying military innovation and a comprehensive review of the current literature in this field Innovation and Adaptation in War offers crucial policymaking insights into when and under what circumstances militaries should innovate and adapt
