Chicken Soup for the Father Son Soul      **Feminist Mothering** Andrea O'Reilly, 2008-10-09 Feminist Mothering goes beyond critiques of patriarchal motherhood to locate and investigate feminist maternal practices as sites for women's empowerment and social change. The contributors see feminist mothering as practices of mothering that seek to challenge and change the norms of patriarchal motherhood that are limiting and oppressive to women. For many women practicing feminist mothering offers a way to disrupt the transmission of sexist and patriarchal values from generation to generation. Contributors explore the ways in which women integrate activism, paid employment, nonsexist childrearing practices, and non-child centered interests in their lives and other caregivers into their children's lives in order to challenge existing societal inequality and create new egalitarian possibilities for women, men, and families. **BOOK JACKET**      *Population Trends No. 117 Autumn 2004* NA NA, 2004-09-30 This quarterly publication covers population and demographic information. It contains commentary on the latest findings, topical articles on relevant subjects such as one-parent families, cohabitation, fertility differences, international demography, population estimates and projections for different groups, illustrated with colour charts and diagrams, regularly updated statistical tables and graphs showing trends, and the latest quarterly information on conceptions, births, marriages, divorces, internal and international migration, population estimates and projections, etc. This issue includes articles on Perpetual postponers, Women's, men's, and couple's fertility intentions and subsequent fertility behaviour, focussing particularly on women who are childless in their thirties, by Ann Berrington; Characteristics of sole registered births and the mothers who register them, by Steve Smallwood; Estimates of true birth order for Scotland 1945-1999, including a comparison with England and Wales data, by Jessica Chamberlain and Steve Smallwood; Reports on Divorces in England and Wales during 2003, and Internal migration estimates for local and unitary authorities in England and former health authorities in Wales 2003.      **Emerging Adulthood** Jeffrey Jensen Arnett, 2004-08-19 Recently the lives of people from age 18 to 29 have changed so dramatically that a new stage of life has developed: emerging adulthood, that is distinct from both the adolescence that precedes it and the young adulthood that comes in its wake. Rather than marrying and becoming parents in their early twenties, most people in industrialized societies now postpone these transitions until at least their late twenties and instead spend the time in self-focused exploration as they try out different possibilities in their careers and relationships. In *Emerging Adulthood*, Jeffrey Jensen Arnett identifies and labels for the first time this period: exploration, instability, possibility, self-focus, and a sustained sense of being in limbo. An increasing number of emerging adults emphasize having meaningful and satisfying work to a degree not seen in prior generations. Marrying later and exploring more casual sexual relationships have created different hopes and fears concerning long-term commitments, and the differences between love and sex. Emerging adults also face the challenge of defending their non-traditional lifestyles to parents and others outside their generation who have made much more traditional choices. In contrast to previous portrayals of emerging adults, Arnett's research shows that they are particularly skilled at maintaining contradictory emotions: they are confident while still

being wary and optimistic in the face of large degrees of uncertainty As the demographics of American youth the American workplace and adulthood continue to evolve *Emerging Adulthood* is indispensable reading for anyone wanting to understand the face of modern America

**A Mother's Work** Neil Gilbert, 2008-10-01 The question of how best to combine work and family life has led to lively debates in recent years Both a lifestyle and a policy issue it has been addressed psychologically socially and economically and conclusions have been hotly contested But as Neil Gilbert shows in this penetrating and provocative book we haven't looked closely enough at how and why these questions are framed or who benefits from the proposed answers *A Mother's Work* takes a hard look at the unprecedented rise in childlessness along with the outsourcing of family care and household production which have helped to alter family life since the 1960s It challenges the conventional view on how to balance motherhood and employment and examines how the choices women make are influenced by the culture of capitalism feminist expectations and the social policies of the welfare state Gilbert argues that while the market ignores the essential value of a mother's work prevailing norms about the social benefits of work have been overvalued by elites whose opportunities and circumstances little resemble those of most working and middle class mothers And the policies that have been crafted too often seem friendlier to the market than to the family Gilbert ends his discussion by looking at the issue internationally and he makes the case for reframing the debate to include a wider range of social values and public benefits that present more options for managing work and family responsibilities

*Australian Mothering* Carla Pascoe Leahy, Petra Bueskens, 2020-01-28 This collection defines the field of maternal studies in Australia for the first time Leading motherhood researchers explore how mothering has evolved across Australian history as well as the joys and challenges of being a mother today The contributors cover pregnancy birth relationships childcare domestic violence time use work welfare policy and psychology from a diverse range of maternal perspectives Utilising a matricentric feminist framework *Australian Mothering* foregrounds the experiences emotions and perspectives of mothers to better understand how Australian motherhood has developed historically and contemporaneously Drawing upon their combined sociological and historical expertise Bueskens and Pascoe Leahy have carefully curated a collection that presents compelling research on past and present perspectives on maternity in Australia which will be relevant to researchers advocates and policy makers interested in the changing role of mothers in Australian society

*Current Biography Yearbook*, 2002 *Your Girl* Vicki Courtney, 2012-07 Guides parents as they navigate the most important topics related to raising daughters

**The Changing Rhythms of American Family Life** Suzanne M. Bianchi, John P. Robinson, Melissa A. Milke, 2006-07-13 Over the last forty years the number of American households with a stay at home parent has dwindled as women have increasingly joined the paid workforce and more women raise children alone Many policy makers feared these changes would come at the expense of time mothers spend with their children In *Changing Rhythms of American Family Life* sociologists Suzanne M Bianchi John P Robinson and Melissa Milkie analyze the way families spend their time and uncover surprising new findings about how

Americans are balancing the demands of work and family Using time diary data from surveys of American parents over the last four decades *Changing Rhythms of American Family Life* finds that despite increased workloads outside of the home mothers today spend at least as much time interacting with their children as mothers did decades ago and perhaps even more Unexpectedly the authors find mothers time at work has not resulted in an overall decline in sleep or leisure time Rather mothers have made time for both work and family by sacrificing time spent doing housework and by increased multitasking *Changing Rhythms of American Family Life* finds that the total workload in and out of the home for employed parents is high for both sexes with employed mothers averaging five hours more per week than employed fathers and almost nineteen hours more per week than homemaker mothers Comparing average workloads of fathers with all mothers both those in the paid workforce and homemakers the authors find that there is gender equality in total workloads as there has been since 1965 Overall it appears that Americans have adapted to changing circumstances to ensure that they preserve their family time and provide adequately for their children *Changing Rhythms of American Family Life* explodes many of the popular misconceptions about how Americans balance work and family Though the iconic image of the American mother has changed from a docile homemaker to a frenzied sleepless working mom this important new volume demonstrates that the time mothers spend with their families has remained steady throughout the decades
