The symposium provides a platform from which authors from different professional and personal backgrounds can talk about their own definition and analysis of humor. The book is structured into 10 main sections that reflect the structure of the conference and presents various studies and research on the nature of humor and laughter. Contributions range from theoretical discussions to practical and experimental expositions. Topics on the psychoanalytical theory of humor and laughter, the nature and analysis of jokes, cross-cultural research of humor, mirth measurement, and humor as a tool of learning are some of the topics covered in the symposium. Psychologists, sociologists, teachers, communication experts, psychiatrists, and people who are curious to know more about humor and laughter will find the book very interesting and highly amusing.
