Creating Sense Texts And Realities:

Imagined Truths Bryant Griffith, 2012-01-01 Education is often envisioned as a linear one way cause and effect process with teaching as the cause learning as the effect But the relationships are less tidy less passive and more cyclical than that There is a continuous cycle of inquiry discovery and integration leading to further inquiry Technology facilitates the exchange of information not just teacher to student but student to teacher and student to student The result is that the nature of the development of learning knowledge and even wisdom becomes more transparent This presents challenges of method and identity for the teacher but more importantly it enforces a sense among students of their critical investment in their own education Teachers and learners need to contemplate why and how they construct knowledge An essential part of this reflection is questioning the premises that govern our views of the world as well as the premises of what is presented as knowledge This demands a new epistemology and requires that teachers change their conceptual structures and recognize that all theories of knowledge are not founded solely on formal logic using uninterpreted experience as data Moreover it demands that new models be considered as ways of making sense and of understanding As teachers we realize that learning how to cope with changes of this magnitude requires leadership where relationships are crucial The rapidly emerging significance of social networks is reshaping our world a world that isn't flat but where spiky concentrations of people work together to make things happen creatively It is more the case that the education we need to provide is to solve problems we can't conceive Our cultural narratives when freed of the bounds of instrumental learning become powerful tools for an emerging world where questions and answers are not simple cause and effect equations Yes the teacher is a facilitator but one with the mastery of sufficient material to be able to paint numerous contexts for the learner We need to be open attentive and anticipatory to that which may surprise us to that which we will not expect The shape of past knowledge can be discovered by reflecting on the ways in which we make decisions and by asking why questions These questions frame intentions and focus on the specific process of knowing why and how ideas have changed from the past to the present By placing the self in the middle this process becomes a trialectic of relational thought which in turn becomes the dialectic of learning

Representing (Post)Human Enhancement Technologies in Twenty-First Century US Fiction Carmen Laguarda-Bueno, 2022-10-07 This work studies three twenty first century novels by Richard Powers Dave Eggers and Don DeLillo as representative of a new trend of US fiction concerned with the topic of the technological augmentation of the human condition The different chapters provide from the double perspective of the optimistic transhumanist philosophy and the more balanced approach of critical posthumanism an overview of the narrative strategies used by the writers to explore the possibilities that biotechnology digital technologies and cryonics open up to transcend our human limitations while also warning their readers of their most nefarious consequences Ultimately the book puts forward the claim that even if the writers approach the subject from a variety of perspectives and using different narrative styles and techniques they all share a critical posthumanist fear that an unrestrained and unquestioned use of technology for enhancement purposes may bring about disembodiment and dehumanization

Proceedings: One English - many approaches, needs and realities, Religion and Art Davor Džalto, 2019-06-18 How can we think of the aura of sacred contexts and sacred works How to think of individual and collective esthetic religious experiences What to make of the manipulative dimension of religious and esthetic auratic experiences Is the work of art still capable of mediating the experience of the sacred and under what conditions What is the significance of the eschatological dimension of both art and religion the sense of ending Can theology offer a way to reaffirm the creative capacities of the human being as something that characterizes the very condition of being human This Special Issue aspires to contribute to the growing literature on contemporary art and religion and to explore the new ways of thinking of art and the sacred in their esthetic ideological and institutional dimensions in the context of contemporary culture

Creation and Reality Michael Welker, 1999 Michael Welker s newest book opens new vistas on the theology of creation and challenges reigning notions of nature transcendence revelation and life in biblical studies philosophy and theology Based on his Warfield Lectures at Princeton the volume probes the classical creation accounts of Genesis 1 and 2 Welker exhumes a more dynamic concrete pluralistic sense of creation with accents on interdependence unrest and the text s astounding potential for critique of deeply ingrained conceptions and ways of thinking Welker then sketches surprising and creative interpretations of the text s most perplexing features the

The Shaping of Text John Porter Houston,1993 The Shaping of Text pays homage to the work of the late John Porter Houston who wrote extensively on style rhetoric and narrative and poetic techniques in Western European literature It is appropriate that the essays in this volume focus on the form of the literary work and the ways in which form determines meaning William Calin s essay on the saint s life analyzes the use of antithesis as a poetic and structural device that illustrates the saint s fundamental understanding of the relationship between the ephemeral reality of his physical existence and the absolute timeless reality to which he aspires Raymond LaCharite s study of Rabelais focuses on the author s self conscious awareness of this relationship and of Renaissance preoccupation with reading as both an act of creation and interpretation George Joseph s study of three Renaissance poets focuses on the use of paradox as both a figure of speech and as a genre that serves both as a structure and as a basis for the interaction in the poetry David Rubin s essay on La Fontaine emphasizes the ways in which the register of style in the Fables is used to set the tone and control the meaning of the language In the chapters devoted to nineteenth and twentieth century literature one can see the continuing closer relationship between the book as a work of art and the reality in which it interacts Suzanne Nash analyzes the strategy Mme de Stael uses in writing *De l Allemagne* a book written less to present an accurate portrayal of Germany than to promote her own republican ideals for France Ross Chambers s essay probes the question of the theme of melancholy in Romantic writing and its relationship to the social and political structures of the period Edward Kaplan shows how a growing ethical social concern can be seen in Baudelaire s revised *Les Fleurs du Mal* Rima Reck and Edward Kaplan reflect the growing use of literature as a vehicle for influencing public opinion Stirling Haig analyzes Flaubert s careful use of style and his awareness that reality is ultimately shaped by the beholder s perspective Finnally Virginia La Charite s chapter on Proust returns to the idea of a structure within a structure in this case the architecture of the cathedral as a metaphor of synthesis an aesthetic device that gives an intelligible structure to Proust s enormous but intricately complex mass of details If John Porter Houston focused on form and style it is because he understood the semiotic nature of all things that a writer s style is a subtle form of refined communication or as Houston wrote style is an absolute manner of seeing things for Proust a question of vision and so constitutes the ultimate reality of literature

Survivor Lessons Matthew J. Smith, Andrew F. Wood, 2015-09-18 This collection of scholarly essays examines reality television The first show Survivor inspired a national craze when it aired in the summer of 2000 Ever since successors and copycats have been on each of the four largest networks The basics stay the same put a group of people into situations bound to cause conflict and watch them squirm Rather than criticize the series voyeuristic appeal this work evaluates what goes on within the text of such shows and how they reflect or affect our larger culture Contributors include researchers from communications sociology political science and psychology The contributions cover such topics as reality television's relationships with cultural identity publicity rights historical perspectives trust

decision making strategies political rationality office politics and primitivism Each chapter includes a bibliography

Lategan, W. S. Vorster, 1985
