McGrath,2003-01-14 In the late nineteenth century scientists began allying themselves with America's corporate political and military elites. They did so not just to improve their professional standing and win more money for research says Patrick McGrath but for political reasons as well. They wanted to use their new institutional connections to effect a transformation of American political culture. They succeeded but not in ways that all scientists envisioned or agreed upon. McGrath describes how between 1890 and 1960 scientific business and political leaders together forged a new definition of American democracy in which science and technology were presented to the public as crucial ingredients of the nation's progress, prosperity and political stability. But as scientists became more prominent they provoked conflicts among themselves as well as with their institutional patrons over exactly how their expertise should be used. McGrath examines the bitter battles that erupted over the role scientists should play during the Great Depression, World War II, the Cold War arms race and the security and loyalty investigations of the 1950s. He finds that by the end of the 1950s scientists were regarded by the political and military elite not as partners but as subordinate technicians who were expected to supply weapons on demand for the Cold War state. Constructing Image, Identity, and Place Alison K. Hoagland, Kenneth A. Breisch, 2003. Although vernacular architecture scholarship has expanded beyond its core fascination with common buildings and places, its attention remains fixed on the social function of building. Consistent with this expansion of interests, *Constructing Image, Identity, and Place* includes essays on a wide variety of American building types and landscapes drawn from a broad geographic and chronological spectrum. Subjects range from examinations of the houses, hotels and churches of America's colonial and Republican elite to analyses of the humble cottages of Southern sharecroppers and mill workers, Mississippi juke joints and the ephemeral rustic arbors and bowers erected by Civil War soldiers. Other contributors examine or reexamine the form of early synagogues in Georgia, colonial construction technologies in the Chesapeake, the appropriation and use of storefront windows by San Francisco suffragists and the evolution of the modern factory tour. Other decidedly twentieth century topics include the impact of the automobile on American building forms and landscapes including parkways, drive-in movie theaters and shopping malls. Drawn from the Vernacular Architecture Forum conferences of 1998 and 1999, these seventeen essays represent the broad

range of topics and methodologies current in the field today The volume will introduce newcomers to the breadth and depth of vernacular architecture while also bringing established scholars up to date on the field's continued growth and maturation The Editors Alison K Hoagland is associate professor of history and historic preservation at Michigan Technological University Kenneth A Breisch is director of Programs in Historic Preservation at the University of Southern California He is author of Henry Hobson Richardson and the Small Public Library in America The Contributors Shannon Bell Robert W Blythe Timothy Davis Stephanie Dyer Willie Graham Kathleen LaFrank William Littmann Carl Lounsbury Al Luckenbach Sherri M Marsh Maurie McInnis Steven H Moffson Jason D Moser Jennifer Nardone Martin C Perdue Mark Reinberger Andrew K Sandoval Strausz Jessica Sewell Donna Ware and Camille Wells

Churella, 2023-11-21 By 1933 the Pennsylvania Railroad had been in existence for nearly ninety years During this time it had grown from a small line struggling to build west from the state capital in Harrisburg to the dominant transportation company in the United States In Volume 2 of *The Pennsylvania Railroad* Albert J Churella continues his history of this giant of American transportation At the beginning of the twentieth century the Pennsylvania Railroad was the world s largest business corporation and the nation s most important railroad By 1917 the Pennsylvania Railroad like the nation itself was confronting a very different world The war that had consumed Europe since 1914 was about to engulf the United States Amid unprecedented demand for transportation the federal government undertook the management of the railroads while new labor policies and new regulatory initiatives coupled with a postwar recession would challenge the company like never before Only time would tell whether the years that followed would signal a new beginning for the Pennsylvania Railroad or the beginning of the end *The Pennsylvania Railroad The Age of Limits 1917 1933* represents an unparalleled look at the history the personalities and the technologies of this iconic American company in a period that marked the shift from building an empire to exploring the limits of their power *Inside IBM* James W. people to eschew their own power as workers and citizens and forego their democratic power to restrain and regulate business activity. Sophisticated corporate funded think tanks augmented these campaigns in the 1970s and 1980s promoting free enterprise and business friendly policies. These free market missionaries now seek to change individual and institutional values through bolder strategies such as expanding share ownership and manipulating wider public concerns. In each case the goal is the same: the triumph of business values over community values. Beder's is an intellectual call to arms: challenge the ideology of the free market missionaries or be converted to it.
