## **Creations Tiny Mystery:**

**Creation's Tiny Mystery** Robert V. Gentry, 1988 Documents scientific evidence for instantaneous creation of Earth and recounts opposition of scientific community to this discovery      **Creation Rediscovered** Gerard J. Keane, 1998-10 The

author covers the basic question the two basic Evolution theories the concept of Special Creation the discoveries of science the fossil record genetics entropy the age of the universe pointers to a Creator and a number of other questions Not enough can be said for the importance of this book to get the fundamentals right regarding our Origins in order that the rest of our thought and all our actions are based upon the truth      The Conflict of the Ages Teacher Edition I-III Michael J.

Findley, Mary C. Findley , science history homeschool evolution young earth creation ancient manuscripts      The Fourth Source Robert J. Tuttle, 2012 This book describes how the effects of nature s own nuclear reactors have shaped the Earth the Solar System the Universe and the history of life as we know it It focuses on observed effects that are poorly explained by our standard theories identifies certain errors in those theories and shows how these effects are caused by natural nuclear fission reactors The theory of Plate Tectonics is wrong and it is shown that expansion of the Earth causes continental drift A physically reasonable mechanism is proposed for expansion and observational data are presented to show that this occurs Evolution is explained as punctuated equilibrium with mutations caused by abrupt surges of radiation and related life forms that have been interpreted as separate species are actually the result of radiation injury This view is particularly effective as applied to humans The ability of the dinosaurs to live so large is explained by use of Earth Expansion and a more massive atmosphere to provide buoyancy and effective transpiration of oxygen These effects also explain how pterodactyls and ancient birds could fly Expansion induced by impacts at the end of the Cretaceous caused the atmosphere to thin and the dinosaurs collapsed Analysis of geological and biological data supports this The astronomical distance scale is shown to be wrong based on the misconception that trigonometric parallax is an absolute measurement It isn t and the method is led astray by the overwhelming number of asteroidal fragments masquerading as stars The measurements of an expanding Universe are shown to be in error and an expanding Universe is not needed by an alternative interpretation of Einstein s equations This interpretation is based on the equal creation of matter and antimatter which is known to occur Spiral galaxies are not vast Island Universes of stars as we have thought but are shown to be the strewn fields of debris from the nuclear fission detonation of distant planets The Universe is not made up of 96% Dark Matter and Dark Energy but is instead very ordinary Abundant evidence and references provide support for all these interpretations This book opens new opportunities for research by correcting several fundamental errors in our concepts of the Earth Life and the Universe      Perspectives on the Age of the Earth and Why They Matter Francis Ö. Dudás, 2020-02-13 Polls show almost half of US adults believe that Earth is only 10 000 years old whereas scientists consider our planet to be 4 56 billion years old Examining these conflicting views illuminates aspects of the perceived conflict between religion and science and helps us understand the battles between

evolutionist and creationist advocates This book examines how we approach knowledge and how we look at certainty It disentangles the threads of the traditional knowledge we are taught from the knowledge we gain from our own investigation of truth It argues that nature the basis of science and scripture the basis of religion derive from a single source Because of their shared origins religious and scientific perspectives grounded in verifiable truths must be in harmony The book presents the science behind the reliability of isotopic dates and critiques young earth creationist attacks on isotopic studies Though the nature of time is a philosophical issue its measurement is a scientific venture that has affirmed that Earth is 4.56 billion years old The harmony of science and religion based on recognition of their single source is a prerequisite for the progress of humanity as a whole Thousands... Not Billions Dr. Donald DeYoung, 2005-09-01 Evolutionary models for life earth and space are questioned today by a significant group of scientists worldwide They are convinced that the earth and the entire universe are the result of a supernatural creation event which occurred just thousands of years ago not billions of years Why do conventional methods for dating rocks differ so radically What does carbon 14 found in diamonds tell us Was there accelerated nuclear decay in earth's history Are the creation and Flood accounts genuine historic events These and many other questions are addressed in *Thousands Not Billions* This book summarizes eight years of research by the Institute for Creation Research ICR and a team of scientists whose goal was to explore the age of the earth from a biblical perspective The project title was Radioisotopes and the Age of The Earth or RATE The age of the earth is one of the most divisive topics today much debated by scholars and laypersons alike What one believes about the age of the earth goes a long way in determining world views The Bible is explicit that the earth is young but many people feel that science has proved our planet is more than four billion year old *Thousands Not Billions* provides a compelling challenge to Darwinian evolution

*Reincarnation in the Bible?* Dan Carlton, 2013-10-24 In my early twenties I read a book that started me in a completely different direction Up to that time I had been taught to be agnostic and believed the Bible to be the result of ignorant men trying to explain what they did not understand with superstition fables exaggerated history etc The book is *There is a River* by Thomas Sugrue A few years ago I started writing down my conclusions in order to clarify to myself just what I did believe I could not accept the idea that I could be right when everyone I talked to disagreed with me And yet my conclusions do seem to me to agree with Scripture including my belief in reincarnation which I believe is not only a fact revealed in the Bible but is a necessary part of God's plan of salvation A motivating factor in my desire to share my understanding of truth is my belief that all of the problems in the world can be traced to erroneous beliefs If everyone correctly understood and applied truth I believe our problems would vanish God says we become what we think Pr 23:7 My belief that the Bible teaches that reincarnation is a fact hasn't endeared me to those who not only reject such an idea but also sincerely believe such a belief comes from the pit of hell and smells of smoke After reading *Reincarnation in the Bible* perhaps you can show me where I am in error if you disagree with me Or who knows perhaps you will agree with me At any rate I hope you find my book

interesting and enjoyable if not enlightening      The Conflict of the Ages Student Edition I: the Scientific History of Origins Michael J. Findley, Mary C. Findley, The Conflict of the Ages is a Multi Part exploration of History Science and ancient Literature This first installment covers the concepts of God time Creation physics cosmology and specifics about each day of Creation We make comparisons with ancient sources to see where they agree with the Scriptural account We reference classic and modern scientific views exposing errors preconceptions presuppositions and falsehoods taught as fact by the mainstream scientific community God is the first witness and the Bible the first eyewitness account of beginnings and origins Other ancient documents contain at least some truths and parallel accounts      The Conflict of the Ages Student II The Origin of Evil in the World that Was Michael J. Findley, Mary C. Findley, God made everything very good so how did evil come into being Is original sin real or just a myth Could man talk to animals There might be myths around the world that echo the creation story but did ancient people believe in the fall of angels Who are the sons of God What does their eyes were opened really mean Student text with review questions and vocabulary plus special projects      **In Six Days** John F. Ashton PhD, 2001 50 videnskabsfolk beretter om hvorfor de tror p skabelsesberetningen p trods af deres naturvidenskabelig baggrund      Einstein, Money and Contentment Richard H. Palmquist, 2013-05-21 Click this link to read a review of Einstein Money and Contentment Bridging the academic and practical Palmquist has taken what the open minded reader will view as a first step toward defining a generic Grand Unification Theory Objecting to the use of the word Theory Palmquist refers to Cosmolaw because he bases his work upon proven formulas controlling the behavior of electricity His proposed answer to the long sought after GUT should interest physicists His inter disciplinary application of those principles to the field of everyday life should interest economists The attention he centers upon the commonalities between the laws of nature and the nature of God should get the attention of theologians Even skeptical scientists must fill out 1040 forms If they take issue with Palmquist s views of Physics and cosmology they can nevertheless grasp his reasoning that no government under today s monetary policies can be rational if it also insists upon collecting income taxes from its citizens The formulas discussed by Palmquist are shown to be common to all of nature and can be applied to all of life His study embraces the fields of Economics and spiritual life Blending observations from natural law with his observations about Economics and ordinary life Palmquist makes the case that economists should try to provide a better society for us while we as individuals using Cosmolaw find contentment in whatever state life finds us      **The Genesis Factor** Ron J. Bigalke Jr., 2008-02-01 Genesis is among the most controversial books of the Bible facing increasing attacks on its credibility and its meaning within the modern Church as fashionable theories of intelligent design and progressive creationism gain support Compromising the literal interpretation of Scripture to reconcile faith instead with faulty scientific reasoning on the history of the earth many within the church are abandoning the very foundational truths of Christianity Join Ron Bigalke Jr and influential creationist leaders in discussing the myths and realities of Genesis In The Genesis Factor you will Unearth the historical roots of

creationism in the church from the apostle Paul and John to the Venerable Bede Martin Luther John Calvin Francis Bacon Galileo James Ussher Issac Newton and others Learn of the 19th century controversy between leading geologists and the scriptural geologists in uncovering the foundations of the oft contentious relationship of science to Christianity and the Scriptures Read the Scriptural interpretations that answer the questions regarding the length of a Creation week day Study point by point the recognized standards of writing history which Genesis 1 11 meet as literal history This powerful and needed defense of Genesis includes contributors Henry M Morris Christopher Cone Terry Mortenson Eugene Merrill Ron J Bigalke Jr Tas Walker Jonathon Henry Larry Vardiman John Whitcomb and Donald DeYoung From fossil evidence geologic evidence and historic evidence and more The Genesis Factor reinforces the validity of the scriptural account of Creation the Great Flood and the Tower of Babel Ancient World: Lesson Overviews, 5th ed. , Creation Under Fire from Within the Church Robert E. Franzen B. Th,2009-06 This book picks up where the Creation vs Evolution debate leaves off for the Christian Without rehashing the debates this book moves forward with what the Bible says and what it does not say about the subject of creation This book will equip you in answering today s pressing questions with the simplicity of God s Word This book also sounds the alarm to the Body of Christ on one of Satan s most successful lies ever perpetrated on humanity by exposing a dreadful theory called uniformitarianism and how it has infected the Body of Christ Why does what we believe about origins matter This book brings answers to tons of tough questions and sets the story straight We invite you to see these answers uncovered from the Bible alone Dr John Morris of the Institute for Creation Research icr.org Commends on a job well done and says Our modern church is plagued by compromise with Christian leaders intimidated by the pronouncements of some scientists who incorporated wrong thinking into the Biblical worldview They should read this thoughtful and well researched book Rob Franzen and his wife reside in central Virginia with their six children Rob is a 1992 graduate of Zion Bible Institute in Barrington Rhode Island and earned his Bachelor of Theology from Christian Life School of Theology CLST in Columbus GA Rob has ministered as an evangelist missionary evangelist and associate Pastor over the past 20 plus years Rob has traveled over two dozen foreign countries seeing many salvations and wonderful miracles and healings by the Grace of God As a minister he has a fervent love for the truth of God s Holy Word and for evangelism He ministers with a strong prophetic anointing of the Holy Spirit which will ignite Fresh Fire in those who hear Rock and Ice Ronald R. Rollins,1999-07 Is it necessary to accept what science presents about how old our earth is Do Christians have to set aside their beliefs when it comes to understanding the origin of our earth Dr Rollins presents an answer to these questions as an emphatic NO He shows us how the true age of the earth agrees with scriptures and that truth from any source is self consistent **Eastern Orthodoxy Illuminated by the Gospel** Ivica StamenkoviA++,2023-10-24 Eastern Orthodoxy illuminated by the Gospel is one of the greatest books ever written about the Orthodoxy Reading the book Eastern Orthodoxy illuminated by the Gospel is like climbing a high mountain where your visual field gets expanded with each step discovering

new and exciting details and finally gives an exceptional panoramic view that evokes the strongest feelings Each new line is like a new stair leading to a highest top from where you can observe the whole Orthodoxy Orthodoxy from God s perspective Light of the glorious Gospel and Christ s teachings shines like the sun throughout this book illuminating a complete profession of faith of the Eastern Orthodox Church Sladjan Djuric Author of the book Only Scripture Serbia I have never understood why Eastern Orthodox people practice or believe certain things When I would ask I would either get silence or a very confusing and superficial answer Ivica s book made those mysterious things clear for the first time and helped me understand the essence and the roots of the Orthodox religion Without exaggeration I think this is a first class apologetic manual ever written Everyone who is called to work with Orthodox believers should have this book because it can help them understand the people who practice Eastern Orthodoxy and give them directions how to pray and preach the Gospel more efficiently 2 Corinthians 4 3 4 Ephesians 6 12 Jan Vareca Editor of a Christian e magazine The trumpet of Zion Serbia Eastern Orthodoxy has been largely unknown in the West but in the recent years there has been a surge of interest particularly among Christians of Protestant Evangelical orientation many of whom wish to find out more about this mystical expression of faith that captivates by its ancient charm and connection to the early church fathers The book Eastern Orthodoxy Illuminated by the Gospel by Ivica Stamenkovic will unlock the mysteries of Eastern Orthodoxy for the Western readers A native of Serbia a country with a strong Eastern Orthodox majority Ivica had the advantage of studying Eastern Orthodoxy at its source The product of his studies is a volume that deserves to be called nothing less than a textbook on Eastern Orthodoxy and probably the first of its kind available in the English language His clear scholarly approach leaves no stones unturned Needless to say a study such as this one has been long overdue in the West Even though scholarly the book is by no means dry and is an enjoyable read cover to cover Alex Jovanovic Pastor of Mooretown Brethren in Christ Church Sandusky Michigan USA [The Big Bang Exploded](#) Russell R. Standish, Colin D. Standish, 1998 **Was Darwin Wrong?** Yes B. a. M. DIV Richard Pittack, Richard B. Pittack, 2011-07-05 David Quammen became the recipient of an award from the National Geographic Society for his article entitled Was Darwin Wrong NO In it he advocates Darwin s evolutionary theory of Natural Selection and Variation without Limitation of plants and animals Pittack s book entitled Was Darwin Wrong YES is a counter argument and direct refutation of the principle arguments Quammen has extrapolated from Darwin s writings and which is based on Biogeography Paleontology Morphology and Embryology Pittack s book is short and to the point and can be understood by high school students and those adults who have always wondered about the answers to the questions posed by evolutionists and the apostles who extol it more from the author at <http://www.richardpittack.co> **ProGenesis: Ninety-Five Theses Against Evolution** Dr. jur. Dieter Aebi, Dr. med. Markus Bourquin, Prof. a.D. Dr. Ing. Werner Gitt, Roland Schwab, Dipl. Ing. Hansruedi Stutz, lic. theol. Marcel Wildi, 2015-04-30 In the natural sciences today research and teaching are often carried out on the assumption of evolution The evolution theory is at present one of the main basic

concepts of the scientific community However there are at least 75 scientific arguments that invalidate the evolution theory 95 Theses Against Evolution makes it clear that alternative concepts are necessary such as ID intelligent design This book shows that ID is much more credible than evolution Though unresolved questions of detail are included the model of the theory of evolution primeval soup and the Big Bang is not called into question as a basic principle This paradigm contains fundamental non provable extrapolations into the distant past as well as philosophical assumptions that are elevated to scientific dogmas The assumption of evolution is so deeply rooted in science that only a massive change in thinking can lead to freer handling of questions of origin and development The 95 Theses described here are intended to contribute to this discussion Today s situation is similar to that in the 16th century when Dr Martin Luther with his 95 Theses invited debate on church practices of the time Hopefully this publication will have a similar effect Darwin on Trial Phillip E.

Johnson,2015-12-01 Darwin s theory of evolution is accepted by most educated Americans as simple fact This easy acceptance however hides from us the many ways in which evolution as an idea shapes our thinking about a great many things What if this idea is wrong Berkeley law professor Phillip E Johnson looks at the evidence for Darwinistic evolution the way a lawyer would with a cold dispassionate eye for logic and proof His discovery is that scientists have put the cart before the horse They prematurely accepted Darwin s theory as fact and have been scrambling to find evidence for it Darwin on Trial is a cogent and stunning tour de force that not only rattles the cages of conventional wisdom but could provide the basis for a fundamental change in the way educated Americans regard themselves their origins and their fate
