

CREATIVITY IN COMMUNICATION STRATEGY

Creative Communication

Kenneth K. Inada, Nolan P. Jacobson

Creative Communication:

Co-Creative Communication in George Herbert and John Donne Sara Rogalski,2025-03-17 This study examines the co creative relationship between speakers hearers and God in poetry and prose by George Herbert and John Donne Through analyses of communicative situations communicative interactions and reflections on communication models of communication are established that underlie the texts selected In particular the activity of hearing is shown to be considered essential to the constitution of a meaningful utterance In this way a key function of communication becomes apparent it can yield a range of creative products from the conversation itself to a literary artefact and its extratextual effects This study thus offers a new reading of the texts of George Herbert and John Donne and provides a clear perspective on how early modern religious texts regarded communication and co creativity as connected concepts That's My Story!: Drama for Confidence, Communication and Creativity in KS1 and Beyond Adam Power-Annand,2024-03-25

The ability to communicate is an essential life skill for all children and young people and it underpins their social emotional and educational development If a child experiences a positive relationship with an adult listening carefully they are more likely to constructively share their thoughts feelings and their imaginative ideas That s My Story places children s imagined stories at the heart of their own development and provides a joyful creative approach to support young children s personal and social development and to encourage their communication In this book you will find Tried and tested drama games and activities that support communication and well being all adaptable to complement your current practice Guidance and advice on how to promote positive adult child interactions Examples of creative interventions that support children s communication development A celebration of the joy that comes with carefully listening to children s own imagined stories Those of us who work with children can sense a tangible connection between how young children feel and how they communicate This essential and practical resource will be valuable reading for primary teachers teaching assistants speech and language therapists and drama practitioners as well as outreach and education departments of theatre companies and other arts organisations

The Handbook of Group Communication Theory and Research Lawrence R. Frey, Dennis Gouran, Marshall Scott Poole, 1999-07-08 The Handbook of Group Communication Theory and Research establishes a central resource for the field documenting and synthesizing the work done in group communication's 50 year history With contributions from the most experienced and respected scholars in the field the editors Lawrence R Frey Dennis S Gouran and Marshall Scott Poole present an overview of group communication study and examine a variety of theoretical positions and methodological practices The volume is divided into six broad areas of communication scholarship Foundations of group communication theory and research Individuals and group communication Task and relational group communication Group communication processes Group communication facilitation Group communication contexts and applications The sections serve as a crossroads where various paths pursued in each area meet summarize and suggest new maps and roads that need to be followed in the future Offering a comprehensive history of group communication theory and research and establishing new conceptual perspectives and research agendas for future group communication scholars this important resource will be an unrivalled tool for scholars researchers educators practitioners and students alike

Pervasive Computing Patrik Floréen, Antonio Krüger, Mirjana Spasojevic, 2010-04-23 Welcome to the proceedings of the 8 International Conference on Pervasive Computing Pervasive 2010 After Toronto Sydney and Nara the conference has now returned to Europe Pervasive is one of the most important conferences in the area of pervasive and ubiquitous computing As in the previous year we had two categories of technical papers Full Papers and Notes Pervasive attracted 157 valid submissions from which the Technical Program Committee TPC accepted 24 full papers and one note resulting in an overall acceptance rate of 16% The submissions included 628 authors from 27 countries representing all the continents except Antarctica As we can see from these figures Pervasive is a truly global highly competitive conference A major conference such as Pervasive requires a rigorous and objective process for selecting papers This starts with the selection of a high quality TPC We were fortunate to be able to draw on the wisdom and experience of our 28 TPC members from the most prestigious universities and research labs in Europe North America and Asia This committee was aided by the input of no less than 238 external reviewers chosen on the basis of their domain knowledge and relevance to pervasive computing The papers were selected using a double blind review with four peer reviews per paper a discussion phase among the reviewers and a discussion of the papers in the TPC meeting which was held in Palo Alto during December 12-13 2009 We thank Nokia Research Center for hosting the meeting

Creativity, Communication and Cultural Value Keith Negus, Michael J Pickering, 2004-05-07 There have been few critical engagements with the concept of creativity in recent years so the authors provide an important contribution in drawing attention to what is arguably at the heart of much of what we most value in culture Douglas Kellner University of California Los Angeles In this important book Keith Negus and Michael Pickering

challenge commonplace assumptions about creativity and casual invocations of genius They give comfort neither to popular wisdom nor to academic convention Drawing on the work of philosophers sociologists political theorists and economists as well as artists musicians and novelists they raise profound questions about the very ideas which sustain our understanding of art and culture Professor John Street University of East Anglia It s all too rare to read a cultural studies book that offers any real originality This one achieves this not only by addressing debates and sources neglected in the field but also by traversing high and low culture and all points between Dave Hesmondhalgh The Open University Creativity has become a buzzword and key issue in debates about cultural policy human growth and the media and cultural industries It has also become a very misused term used to describe anything from musical and artistic genius to shady financial accounting to the teaching of children and the management of employees But what does it mean Negus and Pickering provide a clear and logical way of understanding what we describe as creative and how this term has become central to attaching cultural value Their book Develops an approach which enables us to think of creativity as both ordinary and exceptional Focuses on creativity as a way of rethinking key concepts in the study of culture such as Convention innovation tradition and experience This book is useful to those studying Media and Cultural Studies who need to understand Cultural Production Communication Popular Culture and Cultural Theory

Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1954, 1989 **Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1954**

United States. Internal Revenue Service, 1992 **Buddhism and American Thinkers** Kenneth K. Inada, Nolan P. Jacobson, 1984-06-30 In Buddhism and American Thinkers leading scholars explore Buddhist influences on the currents of American thought The essays presented here advance a continuing dialogue between East and West and show how Buddhism has made ever deepening penetrations into the very substratum of American thinking Contributors to this volume share a concern with ideas that constitute a common core of Buddhist and American philosophy Each relates Buddhism to a factor in American thinking exploring the numerous ways in which Buddhist perspectives on personal identity human suffering and alienation the nature of compassionate love and the social nature of ultimate reality amplify and clarify perspectives found in the golden age of American philosophy particularly in the thought of William James Josiah Royce Alfred North Whitehead John Dewey Charles Sanders Peirce and Charles Hartshorne the great living American philosopher Buddhism and American Thinkers brings new light to the interrelationship between an ancient orientation to life and the very deepest ideas in the history of American thought

Cognitive Processes in Individual and Collective Creativity: A Cross-Cultural Perspective Chang Liu,Linden John Ball,Haiying Long,Wangbing Shen,2019-12-30 Creativity the highest level of human wisdom has become an increasingly important concept in different fields of psychological enquiry particularly because it is portrayed as contributing to many aspects of society including personal development economic prosperity and technological advancement However although considerable research attention from a wide range of disciplinary backgrounds has focused on trying to understand creativity the specific nature of creativity its theoretical underpinnings and cognitive mechanisms remain unclear not least when it comes to the understanding of creativity at the individual level and creativity at the collective level On the one hand there are crucial distinctions between individual and collective creativity On the other hand the process of being creative involves not only independent or individual efforts but also interdependent or collective efforts Understanding these differences and interrelationships is crucially important in studies of creativity In this Research Topic we bring together research from a wide variety of cognitive and psychological approaches and perspectives in order to provide a comprehensive and in depth understanding of creativity at both the individual and collective levels Furthermore cognitive mechanisms in the creativity process are unavoidably affected by sociocultural factors and these mechanisms look different across cultures particularly between Eastern cultures and Western cultures two worlds that often imply dramatically dissimilar values and perspectives Despite the fact that many studies have compared and contrasted these two cultures in various respects little research has focused on the specific topic of cultural variation in creative cognition In addition very few studies have examined the differences in the cognitive mechanisms underpinning the cultural variations that can be observed at a surface level This Research Topic aims to fill this gap in the literature and examine the cognitive

processes and mechanisms in the creativity process at both individual and collective levels across different cultures by using theoretical and empirical evidence
