Armoured Fighting Vehicles In Profile Afvs Of The World Series:

Armoured Fighting Vehicles in Profile (AFVs of the World Series) Duncan Crow, 1900 *American Thunder* Richard C. Anderson Jr., 2024-05-14 If the machine gun changed the course of ground combat in the First World War it was the tank that shaped ground combat in World War II The tank was introduced in World War I in an effort to end the stalemate of the machine gun versus barbed wire trenches and by World War II the tank's mobility and firepower became a rolling thundering difference maker on the battlefield In this detailed deeply researched and heavily illustrated book tank expert Richard Anderson tells the story of how the United States developed its armored force turning it into a war winning weapon in World War II that powered American ground forces and supplied armies around the world including the British and Soviets For decades American tanks of World War II have been undervalued in comparisons with German and Soviet tanks and it's true that the best of American armor tended to underperform the best of German and Soviet armor during the war That's because the U S had a different goal not only to create battleworthy tanks like the Sherman and to develop other tanks but also to supply American allies with serviceable combat ready tanks The United States did all this but until now the complete story of American tanks in World War II has yet to be told Anderson's book is deeper and more thorough a chronicle of American tanks in World War II than has ever been done This book is colorful vivid and thought provokingly insightful on how the U S produced a tank force capable of conducting its own battlefield efforts and sustaining key allies around the world This will be the go to volume on American tanks for years to come **Professional Journal of the United States Army**, 1972-07
