The Arrogant Capital Kevin Phillips, 2002-08 *Arrogant Capital* Kevin Phillips, 1994 A political analyst offers a plan to stop the bloat of government and the power of special interests **History of Financial Institutions** Carmen Hofmann, Martin L. Müller, 2016-10-04 Globalization is not an external force but a result of concrete business decisions made by millions of entrepreneurs and managers across the world As such the modern corporation has completely altered the economic landscape business and finance have shaped the international order of the modern world History of Financial Institutions contributes to the analysis of how the modern corporation business and finance have shaped and keep on shaping our world In a collection of nine succinct essays this volume looks at the role of finance in European history from the beginning of the 19th century to the period after the Second World War Archivists and financial historians who are also leading scholars of banking and financial history investigate the ways in which the international post war order developed They draw on often hitherto unused archival sources from central banks and other institutions to reveal the unique histories of a variety of European countries and the paths that have led to the contemporary economic and financial system The collection includes reflections on monetary stabilization inflation hyperinflation globalization and public relations in banking and commerce This book is essential reading for banking and finance executives as well as policy makers with a historical interest It will also be of importance to academics with a particular interest in economic history financial or banking history and European history Encyclopedia of American Social Movements Immanuel Ness, 2015-07-17 This four volume set examines every social movement in American history from the great struggles for abolition civil rights and women s equality to the more specific quests for prohibition consumer safety unemployment insurance and global justice Building a Win-Win World Hazel Henderson, 1997-10 In Building a Win Win World world renowned futurist Hazel Henderson extends her twenty five years of work in economics to examine the havoc the current economic system is creating at the global level Markets are now spreading worldwide a spread which is often equated with the hope of democracy spreading along with it But markets still run on old textbook models that ignore social and environmental costs leading to a new kind of warfare global economic warfare Building a Win Win World demonstrates how the global economy is unsustainable because of its negative effects on employees families communities and the ecosystem Henderson shows that win win strategies can become the norm at every level when people see the true current and future costs of short sighted narrow economic policies Henderson shows how humans are encountering the endgames of the competition conflict paradigm and identifies the signs of transition Using warfare as a metaphor for the dark side of today s world economic system she shows how both are destructive inhumane wasteful irrational inefficient competitive and crisis driven Both create more new problems than they solve She describes how the globalization of the war system technology and industrialization brought the Cold War to a dead end By the mid 1980s the global warfare paradigm had given ground to a global economic warfare which many economists

politicians and business leaders hailed as a victory of capitalism and competitive free markets Yet this new type of warfare proved little better than the military warfare it was advertised to replace By the mid 1990s global economic warfare had already reached crisis points of its own Building a Win Win World examines how jobs education health care human rights democratic participation socially responsible business and environmental protection are all sacrificed to global competitiveness Henderson shows many ways out of the dilemmas faced by all countries New agreements are described to tame the global economic casino regulate multi national corporations and levy fees for commercial use of global common resources oceans atmosphere space etc and tax their abuse These revenues can then be invested in civilian needs and sectors worldwide She also describes a trend toward grassroots globalism citizens movements that are addressing poverty social inequities pollution resource depletion violence and wars Grassroots globalism she says is about thinking and acting globally and locally It is pragmatic problem solving implementing local solutions that keep the planet in mind Such social innovations can raise the ethical floor under the global playing field so that the most ethical companies and countries can win

Horowitz, 2013-12-02 While the clash between what has been called the modern and undeveloped worlds has led to America's military involvement in the Middle East and other places few people realize the tension between the modern and the traditional within the United States Beginning in the 1920's professional intellectuals and academics began influencing the nation's public policy on matters as diverse as education economics and public health In this thoughtful work David A Horowitz analyzes the tension between the so called New Class of knowledge professionals and their critics who accused them of being out of touch with the common sense of everyday people strangers to the American Way even Communists America's Political Class Under Fire is organized over nine periods of 20th century history providing a window into everything from the Scopes evolution trial and McCarthyism to affirmative action and the Clinton health care fiasco Along the way the book explores the New Left populist conservatism and the mid 90's reaction to political liberalism which saw Newt Gingrich rise to the top post in the House of Representatives In telling these stories Horowitz seeks to encourage a more balanced and fair minded assessment of the consequences of expertise and applied intellect to democratic existence in the United States *Teachers and Mentors* Craig Kridel, Robert V. Taking Trade to the Streets Susan Ariel Aaronson, 2002-05-14 In the wake of civil protest in Seattle during the 1999 World Trade Organization meeting many issues raised by globalization and increasingly free trade have been in the forefront of the news But these issues are not necessarily new Taking Trade to the Streets describes how so many individuals and nongovernmental organizations came over time to see trade agreements as threatening national systems of social and environmental regulations Using the United States as a case study Susan Ariel Aaronson examines the history of trade agreement critics focusing particular attention on NAFTA the North American Free Trade Agreement between Canada Mexico and the United States and the Tokyo and Uruguay Rounds of trade liberalization under the GATT She also considers the question of whether such trade agreement critics are truly protectionist The book explores how trade agreement critics built a fluid global movement to redefine the terms of trade agreements the international system of rules governing trade and to redefine how citizens talk about trade The terms of trade is a relationship between the prices of exports and of imports That movement which has been growing since the 1980s transcends borders as well as longstanding views about the role of government in the economy While many trade agreement critics on the left say they want government policies to make markets more equitable they find themselves allied with activists on the right who want to reduce the role of government in the economy Aaronson highlights three hot button social issues food safety the environment and labor standards to illustrate how conflicts arise between trade and other types of regulation And finally she calls for a careful evaluation of the terms of trade from which an honest debate over regulating the global economy might emerge Ultimately this book links the history of trade policy to the history of social regulation It is a social political and economic history that will be of interest to policymakers and students of history economics political science government trade sociology and international affairs Susan Ariel Aaronson is Senior Fellow at the National Policy Institute and occasional commentator on National Public Radio's Morning Edition

Realizing Peace Louis Kriesberg, 2015 Early work in conflict resolution and peace research focused on why wars broke out why they persisted and why peace agreements failed to endure Later research has focused on what actions and circumstances have actually averted destructive escalations stopped the perpetuation of destructive conduct produced a relatively good conflict transformation or resulted in an enduring and relatively equitable relationship among former adversaries This later research which began in the 1950s recognizes that conflict is inevitable and is often waged in the name of rectifying injustice Additionally it argues that damages can be minimized and gains maximized for various stakeholders in waging and settling conflicts This theory which is known as the constructive conflict approach looks at how conflicts can be waged and resolved so they are broadly beneficial rather than mutually destructive In this book Louis Kriesberg one of the major figures in the school of constructive conflict looks at major foreign conflict episodes in which the United States has been involved since the onset of the Cold War to analyze when American involvement in foreign conflicts has been relatively effective and beneficial and when it has not In

doing so he analyzes whether the US took constructive approaches to conflict and whether the approach yielded better consequences than more traditional coercive approaches Realizing Peace helps readers interested in engaging or learning about foreign policy to better understand what has happened in past American involvement in foreign conflicts to think freshly about better alternatives and to act in support of more constructive strategies in the future
