Amster, 2013-08-15 The colonial encounter between France and Morocco in the late nineteenth century took place not only in the political realm but also in the realm of medicine Because the body politic and the physical body are intimately linked French efforts to colonize Morocco took place in and through the body Starting from this original premise *Medicine and the Saints* traces a history of colonial embodiment in Morocco through a series of medical encounters between the Islamic sultanate of Morocco and the Republic of France from 1877 to 1956 Drawing on a wealth of primary sources in both French and Arabic Ellen Amster investigates the positivist ambitions of French colonial doctors sociologists philologists and historians the social history of the encounters and transformations occasioned by French medical interventions and the ways in which Moroccan nationalists ultimately appropriated a French model of modernity to invent the independent nation state Each chapter of the book addresses a different problem in the history of medicine international espionage and a doctor's murder disease and revolt in Moroccan cities a battle for authority between doctors and Muslim midwives and the search for national identity in the welfare state This research reveals how Moroccans ingested and digested French science and used it to create a nationalist

Transcultural Architecture Thorsten Botz-Bornstein,2016-03-09 Critical Regionalism is a notion which gained popularity in architectural debate as a synthesis of universal modern elements and individualistic elements derived from local cultures This book shifts the focus from Critical Regionalism towards a broader concept of Transcultural Architecture and defines Critical Regionalism as a subgroup of the latter One of the benefits that this change of perspective brings about is that a large part of the political agenda of Critical Regionalism which consists of resisting attitudes forged by typically

Western experiences is softened and negotiated according to premises provided by local circumstances A further benefit is that several responses dependent on factors that initial definitions of Critical Regionalism never took into account can now be considered At the book's centre is an analysis of Reima and Raili Pietilä's Sief Palace Area project in Kuwait Further cases of modern architecture in China Korea and Saudi Arabia show that the critique which holds that Critical Regionalism is a typical western exercise is not sound in all circumstances The book argues that there are different Critical Regionalisms and not all of them impose Western paradigms on non Western cultures Non Western regionalists can also successfully participate in the Western enlightened discourse even when they do not directly and consciously act against Western models Furthermore the book proposes that a certain architectural rationality can be contained in architecture itself not imposed by outside parameters like aesthetics comfort or even tradition but flowing out of a social game of which architecture is a part The key concept is that of the form of life as developed by Ludwig Wittgenstein whose thoughts are here linked to Critical Regionalism Kenneth Frampton argues that Critical Regionalism offers something well beyond comfort and accommodation What he has in mind are ethical prescripts closely linked to a
