Armenia The Challenge Of Reform In The Agricultural Sector:

Armenia Csaba Csáki, World Bank, 1995 Armenia's land privatization program is a leader among the former Soviet republics in regard to the speed and completeness of its implementation. This study reviews the first years of privatized primary agriculture in Armenia and assesses the progress of sectoral reforms needed in the transition to a market based agricultural sector. Chapters cover areas of interest such as market development, the continuation of land reform, competition, crops, livestock, forestry, and the environment. The report recommends adoption of policies that will contribute to the future development of the sector and a short to medium term assistance program for supporting current reforms. The study began in 1993 and reflects developments in Armenia since then. The team leader of this study, Csaba Csáki, is the senior agriculture advisor in the Europe and Central Asia Region of the World Bank. He is president of the International Association of Agricultural Economists and has been professor and head of the Department of Agriculture Economics of the Budapest University of Economic Sciences. He has edited, written, and co-authored 20 books and more than 150 articles. Armenia Banco Mundial, 1995. *Farm Sector Restructuring in Belarus* Csaba Csáki, Zvi Lerman, Sergei Sotnikov, 2000. Agriculture remains the main source of employment and livelihood for the large rural population of many transition countries, especially among the former Soviet republics. Accordingly, the World Bank continuously monitors the progress of land reform and farm restructuring in the region because of the potential impact of these processes on rural development and poverty alleviation in rural areas. The present study on Belarus is the latest addition to a long and growing series of World Bank publications on land reform and farm restructuring in the former socialist countries of Europe and Central Asia. The unique features of all these publications is their reliance on first hand empirical information collected through extensive farm surveys of various rural constituencies. Analysis of survey findings enables the World Bank to base its policy dialogue with governments in the region on solid empirical facts, making the Bank's recommendations more credible and relevant. The survey findings in this volume will provide a platform for useful policy discussions with this country's government and supply international donors that are active there with essential information to design their strategic programs. **Land Reform and Farm**

Restructuring in Moldova Zvi Lerman, Csaba Csáki, Victor Moroz, 1998-01-01. Agricultural reforms including privatization of land and farm restructuring are an important cornerstone for overall transformation of the economies of the former socialist world. This paper summarizes the current status of land reform in Moldova and shows how there has been clear progress in creating a market based agriculture and food sector in Moldova. The results of this study indicate that genuine restructuring and transition to full fledged private farming have resulted in improved profitability and higher incomes for private farmers than those achieved by traditional collectives. **Ukraine--review of Farm Restructuring Experiences** Zvi Lerman, Csaba Csáki, 2000-01-01. Restructuring has produced a definite favorable impact on labor relations and workers behavior in the reorganized farms. Managers of reorganized farm enterprises give a much more positive assessment of the behavioral

patterns of their workers than managers of non reorganized farms Agriculture remains the main source of employment and livelihood for the large rural population of many transition countries especially among the former Soviet republics Accordingly the World Bank continuously monitors the progress of land reform and farm restructuring in the region because of the potential impact of these processes on rural development and poverty alleviation in rural areas The present study on Ukraine is the latest addition to a long and growing series of World Bank publications on land reform and farm restructuring in the former socialist countries of Europe and Central Asia The unique feature of all these publications is their reliance on first hand empirical information collected through extensive farm surveys of various rural constituencies Farm surveys have been conducted by the World Bank in many countries of the CIS Russia Ukraine Moldova Armenia Georgia Turkmenistan Belarus and Central and Eastern Europe Poland Romania Bulgaria Hungary Albania Analysis of survey findings enables the World Bank to base its policy dialogue with governments in the region on solid empirical facts making the Bank's recommendation much more credible and relevant The new findings for Ukraine will similarly provide a platform for useful policy discussions with this country's government and supply the many international donors active on the local scene with essential information for the design of their strategic programs

Lerman, Csaba Csáki, Gershon Feder, 2002 *Building Market Institutions in Post-communist Agriculture* David A. J. Macey, William Pyle, Stephen K. Wegren, 2004-01-01 Eurasia emerged from the former Soviet states failed agrarian program poised to be a great power in the new global economy In the late 1980 s post communist states put forth an agrarian reform plan that promised whirlwind institutional change as its goal However these amendments did not unleash the efficiency and productivity that privatization and destatizing seemed to promise Editors David Macey William Pyle and Stephen Wegren along with a host of world leading agrarian analyst and practitioners discuss the shortcoming of post communist agrarian reform and reveal how and why particular policies were or were not adopted Building Market Institutions in Post Communist Agriculture draws on country level case studies to analyze various initiatives undertaken by agricultural economies Contributors use a comparative analytical framework to shed light on the complex universal processes of agrarian transformation that continue to change the social economic and political character of the former Soviet Union
