**Military and Society in 21st Century Europe** Jürgen Kuhlmann, Jean Callaghan, 2000 After the Cold War came to an end European countries in both East and West faced the common question of how their military organizations and those of their neighbors would respond to shifts in international relations affecting their economies their perception of globalized threats and cross national security management It is undisputed for example that in well developed democratic societies the challenge to the legitimacy of the military in society the decreasing subjective apprehension of threat and growing opposition to systems of universal conscription have been linked to gains in wealth and living standards This volume seeks by empirically measuring social indicators to assess the current state of civil military relations in a number of countries in Eastern Europe Bulgaria Czech Republic Hungary Romania Russia as well as the state of relations in several of their Western European counterparts France Germany Italy the Netherlands The country studies describe and analyze the differing positions of the military in their specific national settings **Books in Print** ,1991 Some Aspects of European History (1789-1945) Mr. Rohit Manglik, 2024-03-14 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Books Out-of-print** ,1986 **European Armies and the Conduct of War** Hew Strachan, 2005-07-28 Through the eyes of the major theorists of the day and discussing the key issues of modern warfare Hew Strachan s work examines the theory and practice of land warfare in Europe since 1700 **Armies in Europe** John Gooch, 2015-10-05 This book originally published in 1980 is a study of the nature and purposes of peace time military organization in Europe and of the characteristics and outcome of the major wars fought during these years It charts the rise of mass armies and the role of conscription as a socializing agent and a military instrument as well as discussing the growing involvement of society in war both as agent and target of military activity the mounting effort required of a society in order to achieve victory culminating in the Total War of 1939 45 Among other subjects explored are the development of war economies the genesis and significance of war aims the importance of social cohesion in modern war and the impact of technology **War and the Rise of the State** Bruce D. Porter, 2002-02-01 States make war but war also makes states As Publishers Weekly notes Porter a political scientist at Brigham Young University demonstrates that wars have been catalysts for increasing the size and power of Western governments since the Renaissance The state s monopoly of effective violence has diminished not only individual rights and liberties but also the ability of local communities and private associates to challenge the centralization of authority Porter s originality lies in his thesis that war breaking down barriers of class gender ethnicity and ideology also contributes to meritocracy mobility and above all democratization Porter also posits the emergence of the Scientific Warfare State a political system in which advanced technology would render obsolete mass

participation in war This provocative study merits wide circulation and serious discussion *Fortitudine* ,1983 **Subject**
