

A large, close-up portrait of Arnold O. Beckman, an elderly man with a serious expression, wearing a dark suit, white shirt, and patterned tie. The background is a neutral, light-colored wall.

Arnold O. Beckman

One Hundred Years of Excellence

In honor of Dr. Beckman's latest milestone—becoming a centenarian—Beckman Coulter is pleased to provide you with this biography, along with a video on CD at the back of the book. It offers a new look at the man, his life, and his contribution to what the company has become. The book is a fitting tribute to the founder and chairman emeritus of Beckman Instruments, Inc. who reminds us, "There is no satisfactory substitute for excellence." Enjoy!

Arnold O Beckman 100 Years Of Excellence:

Arnold O. Beckman Arnold Thackray, Minor Myers, 2000 Arnold O Beckman was a legend in his time the blacksmith's son who grew up to play a pivotal role in the instrumentation revolution that dramatically changed science technology and society From his rural boyhood world of farming and woodworking through his service in the U S Marines and his appointment to the Caltech faculty to his path breaking creation of the pH meter the DU spectrophotometer and the establishment of the Beckman Instruments company this work portrays an individual whose ingenuity and integrity made him a scientific leader and industrial pioneer It also discusses his role in California and national politics and his career as a major philanthropist Arnold Beckman's story is inseparable from that of the 20th century a very inspiring read Included with this biography is a video portrait of Arnold Beckman in CD ROM format for both PC and Mac You will see and hear Dr Beckman talk about his early life his marriage to Mabel and his philosophies of inventing education and philanthropy The CD ROM was produced by Jeffrey I Seeman Arnold O. Beckman, 2000 Chemical History Gerrylyn K Roberts, Colin A Russell, 2007-10-31 This book provides an historical overview of the recent developments in the history of diverse fields within chemistry It follows on from Recent Developments in the History of Chemistry a volume published in 1985 Covering chiefly the last 20 years the primary aim of Chemical History Reviews of the Recent Literature is to familiarise newcomers to the history of chemistry with some of the more important developments in the field Starting with a general introduction and look at the early history of chemistry subsequent chapters go on to investigate the traditional areas of chemistry physical organic inorganic alongside analytical chemistry physical organic chemistry medical chemistry and biochemistry and instruments and apparatus Topics such as industrial chemistry and chemistry in national contexts whilst not featuring as separate chapters are woven throughout the content Each chapter is written by experts and is extensively referenced to the international chemical literature Chemical History Reviews of the Recent Literature is also ideal for chemists who wish to become familiar with historical aspects of their work In addition it will appeal to a wider audience interested in the history of chemistry as it draws together historical materials that are widely scattered throughout the chemical literature **Current Biography Yearbook**, 2002 **Solidarity Under Siege** Jeffrey L. Gould, 2019-05-23 Depicts the rise and fall of the militant labor movement in modern El Salvador **Current Biography Yearbook 2002** Clifford (editor) Thompson, 2002 REFERENCE STORAGE AREA BASEMENT **Chemical Achievers** Mary Ellen Bowden, 1997 This book was designed to help teachers supplement science curricula with human stories of discovery in the chemical sciences Chemical Achievers presents the lives and work of two types of achievers First are the historical greats those chemical scientists most often referred to in introductory courses Second are those scientists who made contributions in areas of the chemical sciences that are of special relevance to modern life and the career choices students will make The human faces summarized in this book range from Robert Boyle to Glenn Seaborg and Stephanie Kwolek In this lively and comprehensive collection of photographs

and biographies Bowden illuminates how much the chemical sciences owe to the individual achiever Over 150 images can be easily reproduced as overhead transparencies or other visual teaching aids

Women in Chemistry Marelene F. Rayner-Canham, Geoffrey Rayner-Canham, 1998 Though rarely noted women have been active participants in the chemical sciences since the beginning of recorded history This thought provoking book brings to life the many talented women who besides the universally respected Marie Curie made significant contributions to chemistry The Rayner Canhams examine the forces that have defined women s roles in the progress of chemistry observing that many were thwarted from capitalizing on their achievements by the prejudices of their time Their book discusses women chemists from as far past as the Babylonian civilization but focuses on professional women chemists from the mid 19th century when women gained access to higher education Read this book and learn about the chemist assistants of the French salons about independent researchers in the 19th century about the three disciplinary havens for women in the 20th century about how war helped bring women into the chemical industry and much more

Engineering Communism Steven T. Usdin, 2008-10-01 Engineering Communism is the fascinating story of Joel Barr and Alfred Sarant dedicated Communists and members of the Rosenberg spy ring who stole information from the United States during World War II that proved crucial to building the first advanced weapons systems in the USSR On the brink of arrest they escaped with KGB s help and eluded American intelligence for decades Drawing on extensive interviews with Barr and new archival evidence Steve Usdin explains why Barr and Sarant became spies how they obtained military secrets and how FBI blunders led to their escape He chronicles their pioneering role in the Soviet computer industry including their success in convincing Nikita Khrushchev to build a secret Silicon Valley The book is rich with details of Barr s and Sarant s intriguing and exciting personal lives their families as well as their integration into Russian society Engineering Communism follows the two spies through Sarant s death and Barr s unbelievable return to the United States

Moving Violations Lee Vinsel, 2019-07-16 The first comprehensive history of auto regulation in the United States Regulation has shaped the evolution of the automobile from the beginning In Moving Violations Lee Vinsel shows that contrary to popular opinion these restrictions have not hindered technological change Rather by drawing together communities of scientific and technical experts auto regulations have actually fostered innovation Vinsel tracks the history of American auto regulation from the era of horseless carriages and the first faltering efforts to establish speed limits in cities to recent experiments with self driving cars He examines how the government has tried to address car related problems from accidents to air pollution and demonstrates that automotive safety emissions and fuel economy have all improved massively over time Touching on fuel economy standards the rise of traffic laws the birth of drivers education classes and the science of distraction he also describes how the government s changing activities have reshaped the automobile and its drivers as well as the country s entire system of roadways and supporting technologies including traffic lights and gas pumps Moving Violations examines how policymakers elected officials consumer advocates environmentalists and other interested parties

wrestled to control the negative aspects of American car culture while attempting to preserve what they saw as its positive contributions to society Written in a clear approachable and jargon free voice *Moving Violations* will appeal to makers and analysts of policy historians of science technology business and the environment and any readers interested in the history of cars and government

From Classical to Modern Chemistry Peter J. T. Morris, Peter John Turnbull Morris, Royal Society of Chemistry (Great Britain), 2002 Most chemists today have either taken part in or been affected by the chemical revolution that has taken place over the course of the last century Developments in instrumentation have changed not just what chemists do but also how they think about chemistry New and exciting areas of previously inaccessible research have been opened up as a direct result of this revolution This is the first book to examine this instrumental revolution and goes on to assess the impact on chemical practice in areas ranging from organic chemistry and biochemistry to environmental analysis and process control thus demonstrating how fundamental and extensive are the changes that have occurred With contributions from internationally recognised specialists this lavishly illustrated book provides a focal point for any historian of chemistry or chemist with an interest in this fascinating topic This book is published in association with the Science Museum London UK and the Chemical Heritage Foundation Philadelphia

Instrumentation Between Science, State and Industry B. Joerges, T. Shinn, 2012-12-06 In this book we appropriate their conception of research technology and extend it to many other phenomena which are less stable and less localized in time and space than the Zeeman Cotton situation In the following pages we use the concept for instances where research activities are orientated primarily toward technologies which facilitate both the production of scientific knowledge and the production of other goods In particular we use the term for instances where instruments and methods traverse numerous geographic and institutional boundaries that is fields distinctly different and distant from the instruments and methods initial focus We suggest that instruments such as the ultra centrifuge and the trajectories of the men who devise such artefacts diverge in an interesting way from other forms of artefacts and careers in science metrology and engineering with which students of science and technology are more familiar The instrument systems developed by research technologists strike us as especially general open ended and flexible When tailored effectively research technology instruments potentially fit into many niches and serve a host of unrelated applications Their multi functional character distinguishes them from many other devices which are designed to address specifically narrowly defined problems in a circumscribed arena in and outside of science Research technology activities link universities industry public and private research or metrology establishments instrument making firms consulting companies the military and metrological agencies Research technology practitioners do not follow the career path of the traditional academic or engineering professional

Everybody Wins!

Gordon Cain, 2001 *Everybody Wins* is the inspiring unfamiliar picture of an individual launching a wholly new career not once but twice when most are ready to retire. In his 70s Gordon Cain, a chemical engineer by trade, acquired and restructured several chemical companies, effecting a turnaround in the commodity chemicals industry. An unprecedented visionary, Cain made millions for himself and his employees through the strategies of innovative management, employee stock ownership, and leveraged buyouts. In his 80s, he turned his interests to a new economy field, biotechnology. Within only six years, he transformed one company, Lexicon Genetics, from a university-based start-up to a public company worth over one billion dollars while masterminding two more biotech companies. The second edition talks about these recent ventures. As Cain recounts with modesty and humor how he made his way from chemical engineer to millionaire entrepreneur, we are reminded of how America's free market economy provides unparalleled opportunity and how good business deals can benefit everyone. In the process, this book illustrates how entrepreneurs continually reinvent themselves. *Instrumentation for a Better*

Tomorrow, National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, 2006-07-11. On November 15, 2004, the National Academies sponsored a symposium at the Beckman Center in honor of Arnold O. Beckman. The symposium concentrated on the wide-ranging practical applications of scientific instrumentation, as was the focus of much of Arnold Beckman's career. The report begins with two presentations: a remembrance by Arnold Beckman's daughter, Pat, and an overview of his life and accomplishments by Arnold Thackray, President of the Chemical Heritage Foundation. The next section contains presentations on the application of instrumentation in seven diverse areas: organic chemistry, molecular and systems biology, synchrotron x-ray sources, nanoscale chemistry, forensics, and clinical medicine. Finally, there is a summary of a panel discussion on the evolving relationship between instrumentation and research. *Chemistry and Industry*, 2001. *Bridging Divides*, Theodore L. Brown, 2010-10-01.

Bridging Divides offers a first-hand account of the origins of the Beckman Institute for Advanced Science and Technology, an interdisciplinary research institute at the University of Illinois at Urbana-Champaign devoted to leading-edge research in the physical sciences, computation, engineering, biology, behavior, cognition, and neuroscience. The book follows the progress of the Beckman Institute's creation from the initial conceptualization of a large multi-disciplinary institute through proposal, formulation, to the architectural design and actual construction of its state-of-the-art building, made possible by the largest gift made to any public university at the time: a 40-million contribution from Illinois alumnus and founder of Beckman Instruments Inc., Arnold O. Beckman, and his wife, Mabel M. Beckman. Theodore L. Brown, the founding director of the Beckman Institute, brings an insider's personal perspective on its conception and its early operations. The evolution of a physical facility that matched a developing sense of what multidisciplinary and interdisciplinary research might be was a vital ingredient in the Institute's development. In addition, because the Institute represented a dramatic departure from traditional university organization, many challenges involving its administration and faculty had to be overcome. A celebration of the Beckman

Institute's first twenty years of operation since the building's completion in 1989 *Bridging Divides* provides an informative look back at the history of this groundbreaking interdisciplinary research center. The book also includes forewords by Stanley O Ikenberry, former president of the University of Illinois, and Richard H Herman, chancellor of the University of Illinois at Urbana-Champaign. **Luminaries of the Chemical Sciences**, 2002 **Orange Coast Magazine**, 2002-06 Orange Coast Magazine is the oldest continuously published lifestyle magazine in the region, bringing together Orange County's most affluent coastal communities through smart, fun, and timely editorial content, as well as compelling photographs and design.
