uncertainty is a definitive guide to contemporary insights into this Achilles heel of modernity and the endemic hubris of institutional science in its role as public authority. It gives firm foundations to the fundamental historic shift now underway in the world towards normalizing acceptance of the immanent condition of ignorance and of its practical corollaries: contingency, uncontrol, and respect for difference. Brian Wynne, Professor of Science Studies, Lancaster University, Bammer, and Smithson have assembled a fascinating, important collection of papers on uncertainty and its management. The integrative nature of *Uncertainty and Risk* makes it a landmark in the intellectual history of this vital cross-disciplinary concept. George Cvetkovich, Director, Center for Cross Cultural Research, Western Washington University, *Uncertainty governs our lives. From the unknowns of living with the risks of terrorism to developing policies on genetically modified foods or disaster planning for catastrophic climate change, how we conceptualize, evaluate, and cope with uncertainty drives our actions and deployment of resources, decisions, and priorities. In this thorough and wide-ranging volume, theoretical perspectives are drawn from art, history, complexity science, economics, futures, history, law, philosophy, physics, psychology, statistics, and theology. On a practical level, uncertainty is examined in emergency management, intelligence, law enforcement, music policy, and politics. Key problems that are a subject of focus are environmental management, communicable diseases, and illicit drugs. Opening and closing sections of the book provide major conceptual strands in uncertainty thinking and develop an integrated view of the nature of uncertainty: uncertainty as a motivating or demotivating force and strategies for coping and managing under uncertainty.*

In Search of the Primitive Stanley Diamond, 2017-06-21 Anthropology is a kind of debate between human possibilities, a dialectical movement between the anthropologist as a modern man and the primitive peoples he studies. *In Search of the Primitive* is a tough-minded book containing chapters ranging from encounters in the field to essays on the nature of law, schizophrenia, and civilization, and the evolution of the work of Claude Lévi-Strauss. Above all, it is reflective and self-critical, critical of the discipline of anthropology and of the civilization that produced that discipline. Diamond views the anthropologist who refuses to become a searching critic of his own civilizations as not merely irresponsible but a tool of Western civilization. He rejects the associations which have been made in the ideology of our civilization, consciously or unconsciously, between Western dominance and progress, imperialism and evolution, evolution and progress.

Primitivism and Twentieth-Century Art Jack Flam, Miriam Deutch, 2003-03-27 This is a much-needed, important collection, a goldmine of sources for scholars and students. The texts articulate the key Primitivist aesthetic discourses of the period, offering crucial insight into the complex and always-changing nexus between culture, politics, and representation. Because of the breadth of the materials covered and the controversies they raise, this anthology is one of the all-too-rare volumes that not only will provide reference materials for years to come but also will feature centrally in classroom discussions. Suzanne Preston Blier, author of *African Vodun: Art, Psychology, and Power*. For almost a century, art historians have fretted about the notion of primitivism in the arts. This comprehensive, in both senses of the word, anthology is a peerless source of the history of

Bruce Elder,2015-10-15 This book deals with the early intellectual reception of the cinema and the

manner in which art theorists philosophers cultural theorists and especially artists of the first decades of the twentieth century responded to its advent While the idea persists that early writers on film were troubled by the cinema's lowly form this work proposes that there was another largely unrecognized strain in the reception of it Far from anxious about film's provenance in popular entertainment some writers and artists proclaimed that the cinema was the most important art for the moderns as it exemplified the vibrancy of contemporary life This view of the cinema was especially common among those whose commitments were to advanced artistic practices Their notions about how to recast the art media or the forms forged from those media's materials and the urgency of doing so formed the principal part of the conceptual core of the artistic programs advanced by the vanguard art movements of the first half of the twentieth century This book a companion to the author's previous *Harmony Dissent* examines the Dada and Surrealist movements as responses to the advent of the cinema
