Arquitectura y hermenéutica Muntañola Thornberg, Josep, 2003-09 Por qué Arquitectura y Hermenéutica En este número monográfico de ARQUITECTONICS hemos intentado resumir la extraordinaria inteligencia del filósofo Paul Ricoeur a partir de la publicación con su expreso permiso de sus escritos en castellano y francés Paul Ricoeur en sus libros y artículos más recientes nos ha hecho un gran regalo a los arquitectos al aplicar sus ideas al espacio arquitectónico como realidad material

inteligible Por otro lado pocas personas han sido más influyentes en esta compleja relación entre arquitectura y hermenéutica que Robert Slutzky Extraordinario pintor y no menos buen profesor en las mejores escuelas de arquitectura de los Estados Unidos junto con Colin Rowe y John Hejduk Slutzky ha logrado dar a la arquitectura un nivel de sensibilidad y de inteligibilidad inigualable Buena muestra de ello es el texto de 1985 que publicamos aquí auténtico tratado y teoría del buen pintar en el que palabra escrita e imagen pictórica dialogan en una doble helice de energía inagotable 12 arquitectos contemporáneos Gomez Luque,2022-03-23 12 no es un mero cualquiera es el mero de fragmentos con los que se puede comenzar a armar el retrato fracturado fragmentado del arquitecto contemporáneo una labor que es siempre continua y no reconoce estados de quietud y que por el contrario exige la agilidad del trato con agentes múltiples en constante evolución La selección de las figuras a estudiar comienza en Peter Eisenman y culmina en Rem Koolhaas polarizando la tensión latente en la discusión actual sobre la autonomía de la disciplina o el realismo de los fenómenos urbanos y sitúa en medio a un grupo de arquitectos cuyas posiciones divergentes definen gran parte de los tópicos ineludibles de la arquitectura contemporánea desde el problema de la organización material a la manipulación formal desde el problema del contexto a la sociedad del espectáculo desde la retórica tecnológica hasta la densidad conceptual la primacía del proceso o el discurso de lo inacabado El resultado es un cuadro heterogéneo y colorido complejo y esquivo a la figuratividad de la interpretación clásica Un retrato fragmentado **Temas de composición arquitectónica. 9.Naturaleza y artefacto** Caldach Cervera,2000 La teoría de la arquitectura en la actualidad lejos de constituir un conjunto uniforme y coherente se constituye por un conglomerado de aspectos dispersos que forman un mosaico entrelazado El espacio la memoria el uso la técnica la luz la percepción son algunos de los campos de interés que constituyen el rizoma caótico sobre el que se asienta el pensamiento arquitectónico La Composición arquitectónica entendida como el conjunto de disciplinas que configuran el subestrato sobre el que se asienta la práctica de la arquitectura se va organizando a partir de estas piezas en cierta medida autónomas asentando de este modo el saber de la arquitectura
