The computer and particularly the Internet have been represented as enabling technologies turning consumers into users and

users into producers The unfolding online cultural production by users has been framed enthusiastically as participatory culture But while many studies of user activities and the use of the Internet tend to romanticize emerging media practices this book steps beyond the usual framework and analyzes user participation in the context of accompanying popular and scholarly discourse as well as the material aspects of design and their relation to the practices of design and appropriation

Ars Electronica 2006 Gerfried Stocker,Christine Schöpf,2006 Isn't it strange that we are constantly developing new technologies to simplify our lives and work but in the end we are left with the impression that everything's just become a lot more complicated Simplicity more than just the pipe dream of a society dominated by technical revolutions global networks and inundations of information No other concept of late has enjoyed such widespread popularity and so accurately expressed the needs of our times Just how are we to cope with the increasing degree of complexity in the reality we inhabit How can we tap and utilize the potential of global communication in an efficient and responsible way How can we develop systems devices and programs that are responsive to our strengths and intuitive capabilities The Ars Electronica 2006 catalog brings together the theoretical reflections of participating artists and elaborations on projects presented at the Ars Electronica Festival 2006 thus providing a dynamic overview of the entire range of facets and levels of significance of the festival theme Simplicity the art of complexity Simplicity is not the opposite of complexity it is its complementary key Book jacket
