Objects of Virtue Luke Syson, Dora Thornton, 2001. You are what you own. So believed many of the elite men and women of Renaissance Italy. The notion that a person's belongings transmit something about their personal history, status and character was renewed in the fifteenth and early sixteenth centuries. Objects of Virtue explores the multiple meanings and values of the objects with which families like the Medici, Este and Gonzaga surrounded themselves. This lavishly illustrated volume examines the complicated relationships between the so-called fine arts: painting and sculpture and artifacts of other kinds for which artistry might be as important as utility: furniture, jewelry and vessels made of gold, silver and bronze, precious and semi-precious stone, glass and ceramic. The works discussed were designed and made by artists as famous as Andrea Mantegna, Raphael and Michelangelo as well as by lesser-known specialists: goldsmiths, gem engravers, glassmakers and maiolica painters. **Subject Guide to Children's Books in Print 1997** Bowker Editorial Staff, R. R. Bowker Publishing, 1996-09. **Identity and Coexistence in the Early Modern Mediterranean** Eric Dursteler, 2000. **Art in Renaissance Italy, 1350-1500** Evelyn S. Welch, 2000. Between the Black Death in the mid-fourteenth century and the French invasions at the end of the fifteenth, artists such as Masaccio, Donatello, Fra Angelico and Leonardo working in the kingdoms, principalities and republics of the Italian peninsula created some of the most influential and exciting works in a variety of artistic fields. Yet the traditional story of the Renaissance has been dramatically revised in the light of new scholarship and new issues have greatly enriched our understanding of the period. Emphasis has been placed on recreating the experience of contemporary Italians: the patrons who commissioned the works, the members of the public who viewed them and the artists who produced them. In this book Evelyn Welch presents a fresh picture of the Italian Renaissance. Giving equal weight to the Italian regions outside Florence, she discusses a wide range of works from paintings to coins and from sculptures to tapestries, examines the issues of materials, workshop practices and artist-patron relationships and explores the ways in which visual imagery related to contemporary sexual, social and political behaviour. Perspectives On Western Art Linnea Wren, 2018-02-22. This anthology of readings related to Western art history explains specific works of art illustrated in Janson's *History of Art* and De la Croix and Tansey's *Gardner's Art Through the Ages* in terms of the ideas, beliefs and concerns of the people and cultures who created the art. It brings a new understanding of art because it shows the social and cultural basis of major works of art through history. The ten sections are: Ancient Near East, Egyptian, Aegean, Greek, Etruscan, Roman, early Christian, Byzantine and Islamic, early Medieval, Romanesque and Gothic. The readings have been drawn from many areas of intellectual and social history including religion, philosophy, literature, science, economics and law. Each selection is preceded by an introductory note which discusses the readings in terms of its subject and theme, its source and usage and its relevance to the study of the work of art. *The Gubbio Studiolo and Its Conservation: Italian Renaissance*

The Intellectual Life of the Early Renaissance Artist Francis Ames-Lewis, 2002-01-01 At the beginning of the fifteenth century painters and sculptors were seldom regarded as more than artisans and craftsmen but within little more than a hundred years they had risen to the status of artist This book explores how early Renaissance artists gained recognition for the intellectual foundations of their activities and achieved artistic autonomy from enlightened patrons A leading authority on Renaissance art Francis Ames Lewis traces the ways in which the social and intellectual concerns of painters and sculptors brought about the acceptance of their work as a liberal art alongside other arts like poetry He charts the development of the idea of the artist as a creative genius with a distinct identity and individuality Ames Lewis examines the various ways that Renaissance artists like Mantegna Leonardo da Vinci Raphael and Durer as well as many other less well known painters and sculptors pressed for intellectual independence By writing treatises biographies poetry and other literary works by seeking contacts with humanists and literary men and by investigating the arts of the classical past Renaissance artists honed their social graces and broadened their intellectual horizons They also experienced a growing creative confidence and self awareness that was expressed in novel self portraits works created solely to demonstrate pictorial skills and monuments to commemorate themselves after death Joyce in the Belly of the Big Truck; Workbook Joyce A.
