Seligson, 2008 **Challenging Democracy** Madeleine Arnot, Jo-Anne Dillabough, 2014-02-04 This collection establishes a highly topical new international field of study that of gender education and citizenship It brings together for the first time important cutting edge research on the contribution of the educational system to the formation of male and female citizens It shows how gender relations operate behind apparently neutral concepts of liberal democratic citizenship and citizenship education The editors asked leading international educationalists to describe the theoretical frameworks and methodologies they used to research gender and citizenship Challenging Democracy suggests ways in which the educational system could help develop genuinely inclusive democratic societies in which men and women play an equal role in shaping the meaning of citizenship *Democracy Challenged* Marina Ottaway, 2013-01-25

During the 1990s international democracy promotion efforts led to the establishment of numerous regimes that cannot be easily classified as either authoritarian or democratic They display characteristics of each in short they are semi authoritarian regimes These regimes pose a considerable challenge to U S policymakers because the superficial stability of many semi authoritarian regimes usually masks severe problems that need to be solved lest they lead to a future crisis Additionally these regimes call into question some of the ideas about democratic transitions that underpin the democracy promotion strategies of the United States and other Western countries Despite their growing importance semi authoritarian regimes have not received systematic attention Marina Ottaway examines five countries Egypt Azerbaijan Venezuela Croatia and Senegal which highlight the distinctive features of semi authoritarianism and the special challenge each poses to policymakers She explains why the dominant approach to democracy promotion isn t effective in these countries and concludes by suggesting alternative policies Marina Ottaway is senior associate and codirector of the Democracy and Rule of Law Project at the Carnegie Endowment

Challenges to Democracy Sten Berglund, 2001 The euphoria evidenced in the aftermath of the collapse of communist regimes in the late 1980s and early 1990s sometimes conveyed the impression that the process of democratization would be achieved without difficulty or tribulation This book sets out to provide a thorough comparative analysis of the challenges which face the

emerging democracies of Central and Eastern Europe and considers the impact of political change Drawing heavily on available survey data the book provides an in depth account of how the new democracies of Central and Eastern Europe have coped with four major challenges political fragmentation nationalism lack of respect for human rights and poorly developed civil service systems The book demonstrates that although the first few years of the 1990s were marked by increasing disenchantment with the new regimes the change of governments as a direct result of the electoral process and the prospects for European integration have served to reverse this negative trend Indeed the authors find that the new political systems have managed to cope with the challenges so effectively that striking similarities with Western democracies are now apparent Offering new insights into democratic transition Challenges to Democracy will appeal to political scientists diplomats and policymakers and economists with an interest in European and comparative politics The Challenge of

Democracy Kenneth Janda, 2000 **Democracy Transformed?** Bruce E. Cain, Russell J. Dalton, Susan E. The Great Disruption Zaki Ladi, 2007-09-04 The dynamic that currently underlies global social change is the product of forces that are not of a single type or origin As a consequence that change is experienced as a process that uproots individuals but gives no guidance for the future that destroys but does not reconstruct that prescribes action but provides no reassurance The radical uncertainty it engenders is an understandable source of anxiety the rich countries are increasingly worried about competition from low wage economies while the wretched of the earth suspect their precarious existences will come under even greater pressure Within each nation the constantly growing gap between winners and losers exacerbates these fears The Great Disruption is at its height This book is an examination and interpretation of the enormous complex of social changes which for want of a better word we term globalization *Unsettled Legitimacy* Steven Bernstein, William D. Coleman, 2010-07-01 Globalization has challenged taken for granted relationships of rule in local regional national and international settings This unsettling of legitimacy raises questions Under what conditions do individuals and communities accept globalized decision making as legitimate And what political practices do individuals and collectivities under globalization use to exercise autonomy To answer these questions the contributors to Unsettled Legitimacy explore the

disruptions and reconfigurations of political authority that accompany globalization Arguing that we live in an era in which political legitimacy at multiple scales of authority is under strain they show that globalization has also created demands for regulation security and the protection of rights and expressions of individual and collective autonomy within and across multiple political and geographic spaces Instead of offering simplistic arguments for or against global governance enhanced democracy or economic integration the contributors provide a sophisticated examination of the complexities of legitimacy and autonomy in a globalizing world Responsive Democracy Jeeyang Rhee Baum,2011-01-18 When and why do democratic governments respond to their citizens *Citizens, Democracy, and Markets Around the Pacific Rim* Russell J. Dalton,To-ch'öl Sin,2006-11-02 East Asia is one of the most dynamic areas of political change in the world today what role do citizens play in these processes of change Drawing upon a unique set of coordinated public opinion surveys conducted by the World Values Survey this book provides a dramatically new image of the political cultures of East Asia Most East Asian citizens have strong democratic aspirations even in still autocratic nations Most East Asians support liberal market reforms even in nationswhere state socialism has been dominant The books findings thus provide a new perspective on the political values of Asian publics We demonstrate that the dramatic socioeconomic changes of the past several decades have transformed public opinion altering many of the social norms traditionallyidentified with Asian values and creating public support for further political and economic modernization of the region Political culture in East Asia is not an impediment to change but creates the potential for even greater democratization and marketization Comparative Politics is a series for students and teachers of political science that deals with contemporary government and politics The General Editors are Max Kaase Professor of Political Science Vice President and Dean School of Humanities and Social Science International University Bremen Germany and Kenneth Newton Professor of Comparative Politics University of Southampton The series is produced in association with the European Consortium for Political Research *How Globalisation and Mediatiation Challenge Democracy* Yvonne Rosteck,2019-07-12 Democracy was the most successful political idea of the 20th century as the high number of democratic governments around the world bears out Today though it seems that it is experiencing a reversal of fortunes Populist parties are on the rise in democratic states At the same time some countries are sliding towards autocracy Elsewhere politicians reframe election victories as a claim to absolute power There is no denying that democracy is under pressure Globalisation populism and mediatiation the growing influence of the media on politics are testing its limits Launched by the Swiss National Science Foundation and the University of Zurich in 2005 the National Centre of Competence in Research on Democracy NCCR Democracy examined how and why this is happening and the consequences it has for democracy The final report details the key findings of the 12 year research programme *New Challenges to Democratization* Peter Burnell,Richard Youngs,2009-12-04 Brings together leading international scholars to assess the claim that democratization around the world is facing a serious challenge and features in depth studies on US democracy
