Challenge Of Radical Political Economy An Introduction To The Alternatives To Neo Classical Economics:

The Challenge of Radical Political Economy Malcolm C. Sawyer, 1989 *The Challenge of Radical Political Economy* Malcolm C. Sawyer, 1989 *Political Economy from Below* Rob Knowles, 2017-07-05 Communitarian anarchism is a generic form of socialism that denies the need for a state or any other authority over the individual from above and which requires absolute belief that the individual cannot exist outside of a community of others This book suggests that the communitarian anarchists of the nineteenth century developed and articulated a distinct tradition of economic thought The period of this study begins with the first major writing of the French communitarian anarchist Pierre Joseph Proudhon in 1840 and ends with the temporary burial of anarchist theorizing at the beginning of the First World War in 1914 However the tradition of communitarian anarchist economic thought did not end in 1914 The economic thought explored in this book provides a fresh perception of the fragmentation evident in many societies today especially where there is a substantial informal economy

Post-Keynesian Theories of the Firm Nobantu L. Mbeki, 2023-04-07 Within Post Keynesian economics there is a spectrum of approaches to theories of the firm but what they have in common to their great benefit is a proper integration of the concept of radical uncertainty data that cannot be known This book revisits Kalecki's theory of the firm is located to show that it constitutes fertile theoretical ground on which to systematically understand the resultant indeterminacy when firms operate under conditions of radical uncertainty The author proposes a way of generalising radical uncertainty by integrating some of the separate approaches within Post Keynesian economics centred around Kalecki's work Through this it is shown that radical uncertainty does more than just change the ultimate motivation of firms dropping short run profit maximisation more complex motivation interconnectivity with the environment it is central to the emergence existence and motivation of firms and critically also firm strategy It is argued that firms do not simply respond to uncertainty it is the systematic cause of their intentional behaviour Through developing these arguments the book also contributes to the methodology of Kalecki and Shackle as well as Kaleckian price theory This book will be important reading for anyone interested in theories of the firm Post Keynesian economics and heterodox approaches to economics more broadly *Political Economy in the Twentieth Century* Maxine Berg, 1990-01-01 This collection of previously unpublished essays discusses the work of a select number of major intellectuals of the recent past Joan Robinson Piero Sraffa Maurice Dobb Michal Kalecki Paul Sweezy and Joseph Schumpeter These are not the figures who dominated established economic traditions they stood rather outside the mainstream acting as critics of the capitalist order and of the theory that sought to explain it More than a study of leading intellectuals the book also investigates the principal problems and theoretical inheritance which linked together theorists of otherwise disparate social and political contexts Students and scholars of the history of economic thought will find many interesting ideas here It will be a fascinating source of reference for many years to come The contributors are Geoff Harcourt A K Sen Malcolm Sawyer Josef Steindl Michael Lebowitz and Tom Bottomore **The Political Economy of European**

Union Competition Policy Tuna Baskoy,2008-06-24 In the European Union EU competition policy occupies a central place amongst other EU public policies and is the first truly supranational public policy regulating market competition One of the stated objectives of EU competition policy is to prevent excessive concentration of economic power in the hands of a few

A Critical Legal Study of the Ideology Behind Solvency II Kristina Loguinova,2019-10-17 This book analyzes the impact of Solvency II In recent years EU legislators have sought to introduce fundamental reforms Whether these reforms were indeed fundamental is critically investigated with regard to a post crisis piece of financial legislation affecting the EU s largest institutional investors Solvency II Namely the last financial and economic crisis the worst financial catastrophe of the last decade revealed that financial law in particular was not sufficiently mature to maintain the existence of a robust and trust worthy financial system that could protect society from economic decline The work also makes concrete recommendations on achieving a more sustainable future As such it offers a valuable resource for anyone who is interested in the financial system the EU political economy insurance sustainability and Critical Legal Studies Feminism and

Anti-feminism in Early Economic Thought The late Michèle A. Pujol,1999-05-26 I had the privilege and pleasure of supervising the Ph D dissertation from which the present book originated Its author Beth Webster was independent critical in a positive way and original She acquired a most thorough knowledge and mastery of the relevant literature She recognized early on the growing importance both qualitatively and quantitatively of investment in intangible assets in modern economic processes She set about developing an appropriate framework drawing on Kalecki s insights in particular within which to analyse the issues involved The outcome is the present book which is original relevant comprehensive and a pleasure to read G C Harcourt University of New South Wales Australia **Varieties of Economic Inequality** Sebastiano Fadda,Pasquale

Tridico,2016-03-10 Recently the issue of inequality has regained attention in economic and political debates Although this interest is welcome the debate is still mostly focused on income or wealth distribution which is an important aspect but does not present a complete view of inequality Most of the theoretical and empirical studies produced by economists concern personal income distribution or factor income distribution This is more evident in the studies of the evolution and characteristics of contemporary capitalism and globalization Varieties of Economic Inequality considers both theoretical perspectives and empirical evidence of aspects such as income gender race technology power region education and class Ultimately this text rejects the idea of supposed long run constant factor shares the positive effects of inequality and the greater importance of absolute level of income compared to its unequal distribution and instead reveals the structural inequalities that exist within societies This book advocates a move away from the focusing on inequality at the level of the individual and suggests policy for eradicating these various forms of inequality It is suitable for those who study political economy social inequality as well as economic theory and philosophy *Microeconomics: Undergraduate Essays and Revision Notes* Bahrum Lamehdasht,2012-12-13 This book contains essays and revision notes for Microeconomics at the

undergraduate level This book includes the following topics Utility Curves Perfect Competition vs Monopoly Oligopoly Collusion Monopolistic Competition Price Discrimination X Efficiency Why do Firms Exist Negative Externalities Positive Externalities Public Goods Adverse Selection General Equilibrium Efficiency Wages Minimum Wages and Unemployment Arrow Pratt Risk Aversion

Consumer Society and the Post-modern City David B Clarke, 2004-03 Working through the often controversial ideas of the consumer society's most influential theorists Jean Baudrillard and Zygmunt Bauman this book assesses the ways in which consumerism is reshaping the nature and meaning of the city

Behavioural Foundations of Economics J. Baxter, 2016-07-27 In recent years work on what may broadly be described as behavioural economics has expanded rapidly and is now attracting the attention of leading figures in economics such as Kenneth Arrow Much of the work however has concentrated on particular aspects of individual and aggregate behaviour The book attempts to construct a unified framework showing both how behavioural variables form the basis of economic activity and how behavioural and economic variables interact to determine individual and aggregate behaviour

Markets and Power Eric A. Schutz, 2016-07-01 In what ways do the actions and economic behavior of today's multinational corporations resemble the functioning and processes of the old command economics of the Soviet Union By ignoring questions about power relations in markets mainstream neoclassically oriented economists conclude that there are no significant power structures operating in market systems to control allocation and distribution This book argues to the contrary that there are fundamental and systemic power structures monopoly access to information or finance employer power etc at work in market economies which affects their ability to achieve real competition in much the same way as state controlled command economies hinder business activities Thus for example the biggest firms at the hubs of financial networks wield a kind of shaping power upon large numbers of relatively autonomous firms not only upon those that belong to the networks but also on the many firms outside them that are also affected

Geographies of Economies Roger Lee, Jane Wills, 2014-05-01 Setting out to explore the intersections of economy and geography this book brings together contributions from the world's top economic geographers Over forty contributors draw upon contemporary theory and experience to explore the cultural and social constitution of economic geographies processes of globalisation and new forms of political regulation and practice Although focusing upon new economic geography the book also illustrates the many connections with previous scholarship as scholars seek to reconstruct the traditions of political economy to understand the contemporary world Highlighting and illustrating contemporary developments the book opens up discussion about the implications of the complex geographies involved In pointing to new directions of research and debate this major statement in state of the art economic geography demonstrates the central relevance of economic geography not only in understanding the trajectories of change but in proposing alternatives

Trade, Finance and Developing Countries Sheila Page, 1990-01-01 The author presents a detailed analysis of the past performance of a large range of developing countries They are used to examine the opportunities facing

other countries in the 1990s Analysis of the successes of the Newly Industrialising countries has always emphasized the important role of exports a view reinforced by the problems faced by those countries who have pursued inward looking strategies and by the impact of the debt crisis in the 1980s The author shows how national policies have not simply responded to external opportunities but have used them and adapted their own strategies to international conditions She also demonstrates the increasing importance of financing constraints The reduction in the availability of external finance and the restrictions on the type available places a serious limitation on the choice of trade policies and therefore on industrial and development strategies that can be pursued

Economics of Unemployment Mary I. Marshall, 2006 The unemployment rate is the number of unemployed workers divided by the total civilian labour force which includes both the unemployed and those with jobs all those willing and able to work for pay In practice measuring the number of unemployed workers actually seeking work is notoriously difficult There are several different methods for measuring the number of unemployed workers Each method has its own biases and the different systems make comparing unemployment statistics between countries especially those with different systems difficult This book brings together diverse new research on this important area of economics

Post-Crash Economics Omar Feraboli, Carlo J. Morelli, 2017-11-21 This book demonstrates the continuing relevance of economics for understanding the world through a restatement of the importance of plurality and heterodox ideas for teaching and research The Great Financial Crash of 2007-8 gave rise to a widespread critique of economics for its inability to explain the most significant economic event since the 1930s The current straightjacket of neo classical undergraduate economic teaching and research hinders students understanding of the world they live in The chapters in this book provide examples to demonstrate the importance of pluralistic and heterodox ideas from across the breadth of economics The authors plurality of approach is indicative of the fact that economics is a much broader discipline than the dominant neo classical orthodoxy would suggest This volume provides undergraduate students with a range of alternative ideas and university lecturers with examples whereby the curricula have been broadened to include pluralist and heterodox ideas

Markets, Unemployment and Economic Policy Philip Arestis, Gabriel Palma, Malcolm Sawyer, 2005-10-19 In this volume more than 40 leading economists pay tribute to and critically evaluate Geoff Harcourt's work Contributors include Tony Atkinson Tony Lawson Edward Nell and Ian Steedman

Family, Gender and Kinship in Australia Allon J. Uhlmann, 2016-04-15 This ethnographically based exploration draws on sociological historical and demographic data to provide a comprehensive analysis of family gender and kinship in Australia which informs modern kinship and gender at large Allon Uhlmann charts the cultural basis that underlies kinship practices and argues that the Australian family is characterized by deep cultural and social continuities rather than the common view that the family is undergoing substantial change He further shows how the modern family both shapes and is shaped by broad social and economic processes This analysis provides greater insight into this critical field of practice as well as showcasing a novel analytical approach to

practice that is rooted in the sociology of practice and in the anthropology of cognition The book also suggests changes to the way in which social scientists currently treat family and kinship *The Routledge Handbook of Heterodox Economics*

Tae-Hee Jo,Lynne Chester,Carlo D'Ippoliti,2017-07-28 The Routledge Handbook of Heterodox Economics presents a comprehensive overview of the latest work on economic theory and policy from a pluralistic heterodox perspective Contributions throughout the Handbook explore different theoretical perspectives including Marxian radical political economics Post Keynesian Sraffian economics institutionalist evolutionary economics feminist economics social economics Regulation theory the Social Structure of Accumulation approach and ecological economics They explain the structural properties and dynamics of capitalism as well as propose economic and social policies for the benefit of the majority of the population This book aims firstly to provide realistic and coherent theoretical frameworks to understand the capitalist economy in a constructive and forward looking manner Secondly it delineates the future directions as well as the current state of heterodox economics and then provides both heat and light on controversial issues drawing out the commonalities and differences among different heterodox economic approaches The volume also envisions transformative economic and social policies for the majority of the population and explains why economics is and should be treated as a social science This Handbook will be of compelling interest to those including students who wish to learn about alternative economic theories and policies that are rarely found in conventional economics textbooks or discussed in the mainstream media and to critical economists and other social scientists who are concerned with analyzing pressing socio economic issues
