ALBERT EINSTEIN
NOBEL PRIZE WINNER

"We may well be grateful to Harrison Brown for this book on the condition of mankind as it appears to an outsider, clear-sighted, calmly appraising vision. . . . The latest phase of unrelenting scientific progress, with its fantastic increase of population, has created a situation fraught with problems of hitherto unknown dimensions. . . . This objective book has high value."

WILLIAM O. DOUGLAS
U.S. SUPREME COURT

"*The Challenge of Man's Future* runs through today's worries to the great crisis that lies ahead—beyond the limits of human imagination. The book poses together problems facing the entire world community, among them: population, food, raw materials, and industrialization—themes on which the best minds of all nations must now be asked. It makes startlingly clear how American liberty and Asian hopes are linked inseparably. It challenges all men to find solutions far beyond the sights which the daily press sets for us."

MARSTON BATES, *New York Times*

"... a truly extraordinary achievement, a masterly synthesis of all of the diverse fields of scientific knowledge that bear on the problems of mankind's increasing population and resources."

addresses the problem of religion ethics and public policy in a global technological civilization It attempts to do what

narrative ethicists have said cannot be done to construct a cross cultural ethic of human dignity human rights and human liberation which respects the diversity of narrative traditions It seeks to do this without succumbing to either ethical relativism or ethical absolutism The author confronts directly the dominant narrative of our technological civilization the Janus faced myths of Apocalypse or Utopia Through this myth we view technology ambivalently as both the object of our dread and the source of our hope The myth thus renders us ethically impotent the very strength of our literal utopian euphoria sends us careening toward some literal apocalyptic final solution The demonic narrative that dominated Auschwitz killing in order to heal is part of this Janus faced technological mythos that emerged out of Hiroshima And it is this mythic narrative which underlies and structures much of public policy in our nuclear age This book proposes a coalition of members of holy communities and secular groups organized to prevent any future eruptions of the demonic Its goal is to construct a bridge not only over the abyss between religions East and West but also between religious and secular ethics Preparing for the Next Cyber Revolution Joseph N. went rogue in a conspiracy involving the CIA the Pentagon the State Department and the Department of Justice to affect a coup d tat that would allow the military industrial complex to go to war in Vietnam the deep state has created an ongoing Truman Show a series of never ending psychological operations designed to induce citizens worldwide to surrender freedoms to government in return for security With the premise that the globalist elite uses systems of mass manipulation and social engineering to induce the world s population to accept the implementation of the reforms it has already decided to implement Corsi sets a detailed plan for organizing global resistance against the subversives who now sit at the top of the institutions or world government and finance The Anti Globalist Manifesto is a call to action to restore God to our lives as those of us fighting for a return to personal freedoms and limited government ending the war on humanity and driving once and for all time the New World Order globalists back to Hell where they belong *Bulletin of the Atomic Scientists* ,1987-03
