Power and

Legitimacy - Challenges from Russia Per-Arne Bodin, Stefan Hedlund, Elena Namli, 2012-08-21 This book sheds new light on the continuing debate within political thought as to what constitutes power and what distinguishes legitimate from illegitimate power. It does so by considering the experience of Russia a polity where experiences of the legitimacy of power and the collapse of power offer a contrast to Western experiences on which most political theory formulated in the West is based. The book considers power in a range of contexts philosophy and discourse the rule of law and its importance for economic development the use of culture and religion as means to legitimate power and liberalism and the reasons for its weakness in Russia. The book concludes by arguing that the Russian experience provides a useful lens through which ideas of power and legitimacy can be re evaluated and re interpreted and through which the idea of the West as the ideal model can be questioned.

Twentieth-Century Western Philosophy of Religion 1900-2000 Eugene Thomas Long, 2012-12-06 In the fall of 1994 Hendrik Jan van Leusen an acquisitions editor from Kluwer Academic Publishers visited me in my home to discuss a proposal for a handbook in the philosophy of religion. He reported that he had been talking about this with philosophers of religion at several universities and that the response to the idea had been quite favorable. I suggested that given the different approaches to the philosophy of religion it might be good

for him to meet with philosophers representing different philosophical traditions at an upcoming meeting of the Eastern Division of the American Philosophical Association. Jude Dougherty, Joseph Kockelmans, Robert Neville, William Rowe, and Merold Westphal kindly agreed to attend that meeting. They made many substantial and helpful suggestions, and a summary of the discussions was sent to van Leusen. Some months later, he wrote to inquire whether I might consider editing the series and writing the first volume, which was to provide a historical map of twentieth-century western philosophy of religion. Although I could imagine myself editing the series, I was initially reluctant to undertake the task of writing a volume that would take me across the lines of many different philosophical traditions. By coincidence, I had been asked some months earlier to contribute an essay on the philosophy of religion for a conference being held at the Catholic University of America on the general topic *One Hundred Years of Philosophy*. **Methods in World History** Janken Myrdal, Arne Jarrick, Maria Wallenberg Bondesson, 2016-05-02 *Methods in World History* is the first international volume that systematically addresses a number of methodological problems specific to the field of world history. Prompted by a lack of applicable works, the authors advocate a considerable sharpening of the tools used within the field of study. Theories constructed on poor foundations run an obvious risk of reinforcing flawed assumptions and of propping up other, more ideological constructions. The dedicated critical approach outlined in this volume helps to mitigate such risks. Each author addresses a particular issue of method, for source criticism, archaeological evidence, or estimates of economies, for example, discussing the problems, giving practical examples, and offering solutions and ways of overcoming the difficulties involved. The perspectives are varied, the criticism focussed, and a common theme of coalescence is maintained throughout. This unique anthology will be of great use to advanced scholars of world history and to students entering the field for the first time.
