Organizational and Social Perspectives on Information Technology Richard Baskerville, Jan Stage, Janice I.

DeGross, 2013-03-14 The articles in this book constitute the proceedings papers from the IFIP WG 8.2 Working Conference IS2000 The Social and Organizational Perspective on Research and Practice in Information Technology held June 10-12 2000 in Aalborg Denmark The focus of the conference and therefore this book is on the basic aim of the working group namely the investigation of the interrelationships among four major components information systems IS information technology IT organizations and society This basic social and organizational perspective on research and practice in information technology may have evolved substantially since the founding of the group for example increasing the emphasis on IS development The plan for the conference was partially rooted in the early WG 8.2 traditions in which working conferences were substantially composed of invited papers For IS2000 roughly half of the paper presentations were planned to be invited the remaining half were planned to be double blind refereed in response to a Call For Papers Invited papers were single blind reviewed in order to provide the authors with pre publication feedback and comments along with the opportunity to revise their papers prior to its final incorporation in this book *Research Perspectives*, 1985 **New Perspectives on Information Systems**

Harindranath, 2002-09-30 Proceedings of the Tenth International Conference on Information Systems Development ISD2001 University of London September 5-7 2001 T p verso *Method Engineering* Sjaak Brinkkemper, Kalle Lyytinen, Richard Welke, 1996-08-31 Method Engineering focuses on the design construction and evaluation of methods techniques and support tools for information systems development It addresses a number of important topics including method representation formalisms meta modelling situational methods contingency approaches system development practices of method engineering terminology and reference models ontologies usability and experience reports and organisational support and impact Challenges and Strategies for Research in Systems Development William W. Cotterman, James A. Senn, 1992-08-11 Based on a conference held by the Information Technology Management Center INTEC at Georgia State University to assess the current level of development in the practice of systems analysis and design to evaluate the state of research in this area to identify recent research issues in the creation of information systems and to discuss research strategies which could influence future investigations Features papers presented in general sessions and workshops from leading academicians and practitioners Agile Software Development Torgeir Dingsøyr, Tore Dybå, Nils Brede Moe, 2010-05-26 Agile software development has become an umbrella term for a number of changes in how software developers plan and coordinate their work how they communicate with customers and external stakeholders and how software development is organized in small medium and large companies from the telecom and healthcare sectors to games and interactive media Still after a decade of research agile software development is the source of continued debate due to its multifaceted nature and insufficient synthesis of research results Dingsøyr Dybå and Moe now present a comprehensive

snapshot of the knowledge gained over many years of research by those working closely with or in the industry. It shows the current state of research on agile software development through an introduction and ten invited contributions on the main research fields, each written by renowned experts. These chapters cover three main issues: foundations and background of agile development, agile methods in practice and principal challenges, and new frontiers. They show the important results in each subfield and, in addition, they explain what these results mean to practitioners as well as for future research in the field. The book is aimed at reflective practitioners and researchers alike and it also can serve as the basis for graduate courses at universities.

**New Perspectives on Information Systems Development** Hari Harindranath, W. Gregory Wojtkowski, Joze Zupancic, Duska Rosenberg, Wita Wojtkowski, Stanislaw Wrycza, John A.A. Sillince, 2012-12-06. This book is a result of the Tenth International Conference on Information Systems Development (ISD2001) held at Royal Holloway University of London, United Kingdom, during September 5-7, 2001. ISD 2001 carries on the fine tradition established by the first Polish Scandinavian Seminar on Current Trends in Information Systems Development Methodologies held in Gdansk, Poland, in 1988. Through the years, this seminar evolved into an International Conference on Information Systems Development. The Conference gives participants an opportunity to express ideas on the current state of the art in information systems development and to discuss and exchange views on new methods, tools, applications, as well as theory. In all, 55 papers were presented at ISD2001, organised into twelve tracks covering the following themes: Systems Analysis and Development, Modelling Methodology, Database Systems, Collaborative Systems, Theory, Knowledge Management, Project Management, IS Education, Management issues, E-Commerce, and Technical Issues. We would like to thank all the contributing authors for making this book possible and for their participation in ISD2001. We are grateful to our panel of paper reviewers for their help and support. We would also like to express our sincere thanks to Ceri Bowyer and Steve Brown for their unfailing support with organising ISD2001.

**Research Challenges in Information Science** Fabiano Dalpiaz, Jelena Zdravkovic, Pericles Loucopoulos, 2020-06-24. This book constitutes the proceedings of the 14th International Conference on Research Challenges in Information Sciences (RCIS 2020) held in Limassol, Cyprus, during September 23-25, 2020. The conference was originally scheduled for May 2020 but the organizing committee was forced to postpone the conference due to the outbreak of the COVID-19 pandemic. The scope of RCIS 2020 is summarized by the thematic areas of information systems and their engineering, user-oriented approaches, data and information management, business process management, domain-specific information systems engineering, data science, information infrastructures, and reflective research and practice. The 26 full papers and 3 work-in-progress papers presented in this volume were carefully reviewed and selected from 106 submissions. They were organized in topical sections named: Data Analytics and Business Intelligence, Digital Enterprise and Technologies, Human Factors in Information Systems, Information Systems Development and Testing, Machine Learning and Text Processing, and Security and Privacy. The volume also contains 12 poster and demo papers and 4 Doctoral

Consortium papers      *Systems Development Methods for Databases, Enterprise Modeling, and Workflow Management* Wita Wojtkowski, W. Gregory Wojtkowski, Stanislaw Wrycza, Jozse Zupancic, 2012-12-06 This book is a result of the ISD 99 Eight International Conference on Information Systems Development Methods and Tools Theory and Practice held August 11-13 1999 in Boise Idaho USA. The purpose of this conference was to address the issues facing academia and industry when specifying, developing, managing and improving information systems. ISD 99 consisted not only of the technical program represented in these Proceedings but also of plenary sessions on product support and content management systems for the Internet environment, workshop on a new paradigm for successful acquisition of information systems and a panel discussion on current pedagogical issues in systems analysis and design. The selection of papers for ISD 99 was carried out by the International Program Committee. Papers presented during the conference and printed in this volume have been selected from submissions after formal double blind reviewing process and have been revised by their authors based on the recommendations of reviewers. Papers were judged according to their originality, relevance and presentation quality. All papers were judged purely on their own merits independently of other submissions. We would like to thank the authors of papers accepted for ISD 99 who all made gallant efforts to provide us with electronic copies of their manuscripts conforming to common guidelines. We thank them for thoughtfully responding to reviewers' comments and carefully preparing their final contributions. We thank Daryl Jones, provost of Boise State University and William Lathen, dean College of Business and Economics for their support and encouragement.
