Chamorro Reference Grammar Donald M. Topping, Bernadita C. Dungca, 1980 *NIH Publication*, 1983 Pacific Languages in Education France Mugler, John Lynch, 1996 This collection of articles and interviews explores policy practice and attitudes relating to the use of Pacific languages in education systems of most Pacific Island countries and territories from pre school to tertiary level It records history it deals with current attitudes and prejudices and it focuses attention on perceived problems with the medium of education in many parts of the region Back cover **Chamorro Reference Grammar** Donald M. Topping, 2021-05-25 Chamorro Reference Grammar is a detailed description of the grammatical structure of the indigenous language of the Mariana Islands It is designed primarily as a reference work which will serve to give native speakers some insight into the complexities of their language and to encourage its use at a time when other languages are more prestigious The book contains an introduction to Chamorro and its developmental history and dialectal variations and with a minimum of technical linguistic terms it treats phonology morphology and syntax Notes to linguists and a glossary of linguistic terms are included *Bibliography of Amyotrophic Lateral Sclerosis and Parkinsonism-dementia of Guam* Ralph M. grammatical borrowability The key issues are How can grammatical replication be distinguished from other superficially similar processes of contact induced linguistic change and under what conditions does it take place Are there grammatical morphemes or constructions that are more easily borrowed than others and how can language contact account for areal biases in the borrowing vs calquing of grammatical formatives The book is a major contribution to the ongoing theoretical discussion concerning the relationship between grammaticalization and language contact on a broad empirical basis

Mokilese Reference Grammar Sheldon P. Harrison, Salich Y. Albert, 1976 *Composition Linguistique Des Nations Du Monde* Heinz Kloss, Grant D. McConnell, 1981 **The Paradigmatic Structure of Person Marking** Michael

Cysouw, 2009-01-29 This book explores person markers the linguistic elements that provide points of reference to speech act participants Michael Cysouw develops a new framework for the typology of person marking based on the rejection of the notion of plurality for its analysis When a mother says Mummy is going to say goodnight now Mummy is the person marker in a way that in English is confined to motherese but which is used more commonly in some other languages and may also be characteristic of much earlier forms Dr Cysouw divides the person markers of 400 languages into paradigms He considers how the structure of these person paradigms relates to their function His investigation provides a clear account of how person markers work syntactically pragmatically and semantically as well as giving fresh insights into aspects of linguistic change language relatedness and the interfaces between discourse syntax and semantics The combination of a typological and a comparative approach results in the first outline of a cognitive map of the paradigmatic structure of person marking

Spoken Chamorro Donald M. Topping, 1980-06-01 Spoken Chamorro is designed to enable the student to learn to speak and understand the Chamorro language the way native speakers do in their everyday activities This second edition has been revised to incorporate the spelling conventions adopted by the Marianas Orthography Committee in January 1971 and suggestions made by teachers who have used the text in the classroom The basic material in the text remains unchanged the work of the author and Pedro M Ogo principal of Rota Elementary and High School who is a native speaker of the language As much as possible the lessons exclude regionalisms presenting the language as it is heard generally on Guam Saipan Rota and elsewhere throughout the Mariana Islands **Woleaian Reference Grammar** Ho-min Sohn, 1975 A systematic

presentation of the overall grammatical structure of Woleaian spoken in the Caroline Islands For those who want to learn the language and for linguists who are interested for theoretical purposes **Comparative Austronesian Dictionary** Darrell

cultural landscape While the five states California Oregon Washington Alaska and Hawai i which touch Pacific waters do share commonalities within the history of westward expansion the peoples who settled the region and the indigenous peoples they encountered have created spheres of culture that defy simple categorization This wide ranging reference volume explores the marvelously eclectic cultures that define the Pacific region From the music and fashion of the Pacific northwest to the film industry and surfing subcultures of southern California from the vast expanses of the Alaskan wilderness to the schisms between native and tourist culture in Hawai ii this unprecedented reference provides a detailed and fascinating look at American regionalism along the Pacific Rim The Greenwood Encyclopedia of American Regional Cultures is the first rigorous reference collection on the many ways in which American identity has been defined by its regions and its people Each of its eight regional volumes presents thoroughly researched narrative chapters on Architecture Art Ecology Ethnicity Fashion Film Folklore Food Language Literature Music Religion and Sports Recreation Each book also includes a volume specific introduction as well as a series foreword by noted regional scholar and former National Endowment for the Humanities Chairman William Ferris who served as consulting editor for this encyclopedia

Neglected Aspects of Motion-Event Description Laure Sarda, Benjamin Fagard, 2022-07-15 The idea of this book on Neglected Aspects of Motion Event Description comes from the observation that over the last 30 years much attention has been devoted to the manner path divide in relation to the distinction between Verb Framed and Satellite Framed languages This mainstream focus has left aside other aspects of motion event descriptions The chapters of this volume take an in depth look at three less studied aspects of motion expression The first part of the book focuses on directional deixis especially in relation to associated motion and visual motion The second part explores variations in Source Goal asymmetries The third part investigates different types of motion event constructions e g with various types of co events Many languages are taken into consideration throughout the 11 chapters which gives the volume a clear typological dimension This book is intended for students and academics interested in motion spatial semantics typological variation and cognitive linguistics
