

Change & Continuity

Help us compare and analyse.

Basic Information

In History, we usually use the concept of change and continuity to try to define the importance of an event or a certain period in History. It is also useful to compare different periods.

Simple definitions

Change

Refers to something that is different from what occurred previously.

Continuity

Refers to things that stay the same, relatively unchanged, over time.

Example in History

When we compare or analyse, we search for change and continuity in different aspects of development in History. We observe these dimensions:

Social

Economic

Political

Cultural

- A social continuity could be the unchanged child mortality rate between two periods of time.
- An economical change could be the important rise in the percentage of unemployment.
- A political change could be the end of the monarchy right after the French Revolution.
- A cultural continuity could be the fact that the French population in Québec kept on using French as their main language even after France lost this territory to England in the Seven Years' Wars.

Organizational Learning and Technological Change Cristina Zuccheromaglio, Sebastiano Bagnara, Susan U. Stucky, 2012-12-06 What the Book Is About This book is about the problem of organizational learning that is the analysis of organizations conceived as learning systems In order to survive in a period of a rapid change organizations must innovate and than to develop and exploit their abilities to learn The most innovative organizations are those that can respond with great efficiency to internal and external changes They respond to and generate technological change by acting as effective learning systems They maximize the learning potential of ongoing and normal work activities The organizational structure and the technology allow members to learn while the organizations itself learns from its members So organizations reach high levels of innovation when structured to take advantage of the social distributed participative situated processes of learning developed by its members in interaction with the technological environment Organizations should consider learning as an explicit productive objective They must create integrated learning mechanisms that encompass technological tools reward and incentive systems human resource practices belief systems access to information communication and mobility patterns performance appraisal systems organizational practices and structures The design of efficient learning organizations requires cognitive technological and social analyses All the computer based technologies e g office automation communication and group decision support not only those devoted to and used in training activities have to be considered as tools for organizational learning and innovation Resources in Education ,1999 *EBOOK: SUCCESSFUL SCHOOL IMPROVEMENT* Michael Fullan, 1992-06-16 This book examines the powerful concept of implementation or what actually happens in practice when innovations or reforms are attempted by demonstrating its uses in a variety of policy and programme applications **Mathematics & Science in the Real World** ,2000 **ENC Focus** ,2000 ,

Information Technology and Authentic Learning Angela McFarlane, 2003-10-04 As the presence of computers in the primary classroom increases and IT becomes a bigger part of learning the book takes a realistic look at the role of the computer in the National Curriculum and asks some important questions The book is designed to help teachers incorporate IT into their day to day teaching offering practical guidance and advice on task planning and management and includes examples of classroom practice The book covers all curriculum areas examining curriculum specific issues as well as more general concerns such as pupil expectation and self esteem problem solving collaborative learning data handling homework and the effects on the pupil teacher dynamic This book will be essential to all primary school teachers and trainees

Buddhist Philosophy Steven M. Emmanuel, 2017-08-07 *Buddhist Philosophy A Comparative Approach* presents a series of readings that examine the prominent thinkers and texts of the Buddhist tradition in the round introducing contemporary readers to major theories and debates at the intersection of Buddhist and Western thought Takes a comparative rather than oppositional approach to Buddhist philosophy exploring key theories and debates at the intersection of Eastern and Western thought Addresses a variety of topics that represent important points of convergence between the Buddhist and Western philosophical traditions Features contributions from a wide array of acclaimed international scholars in the discipline Provides a much needed cross cultural treatment of Buddhist philosophy appropriate for undergraduate students and specialists alike *The Social Studies Professional*, 2005 **Interactive Children, Communicative Teaching** Cook, Deirdre, Finlayson, Helen, 1999-11-01 This sympathetic and accessible book aims to support teachers in providing rich learning experiences for children through the use of information and communications technology The focus throughout is on pedagogy and the authors draw consistently upon an educational perspective which emphasises the socially and culturally influenced nature of learning Media Review Digest C. Edward Wall, 2002 ICT, Pedagogy and the Curriculum Viv Ellis, Avril Loveless, 2013-01-11 This book explores the impact new information and communication technologies are having on teaching and the way children learn The book addresses key issues across all phases of primary and secondary education both in the UK and internationally ICT Pedagogy and the Curriculum looks at the relationship between ICT paradigms of teaching and learning and the way in which curriculum subjects are represented Three principal areas are addressed the wider perception of ICT in society culture and schooling the challenges to pedagogy the way in which ICT not only supports learning and teaching but changes the nature of curriculum subjects The tensions between the use of technology to replicate traditional practices and the possibilities for transforming the curriculum and pedagogy are explored offering an original and distinctively critical perspective on the way in which we understand ICT in education It will be of interest to all primary and secondary teachers and those in initial teacher training who are concerned about current technology initiatives in education and how to respond to them **Social Partners and Gender Equality** Anna Elomäki, Johanna Kantola, Paula Koskinen Sandberg, 2021-12-01 This book breaks new ground in gender and politics research by studying the multiple ways in which gender and intersectional equalities shape and are shaped by social partners representing employers and employees in Europe as well as the relationships between those social partners Little critical attention has been paid to these organizations yet as this volume illustrates social partners are important actors in relation to gender and other inequalities at the level of both individual European countries and the European Union The chapters in this volume explore the impact of social partners on inequalities in a variety of 21st century political contexts taking into account phenomena such as neoliberalisation austerity and the COVID 19 crisis This volume adds a crucial dimension to studies on gender inequalities in the labour market contributing to research on issues such as domestic work the gender pay gap and the persistent undervaluation of

women's labour and feminized reproductive labour in particular care work. It also represents a significant contribution to the literature on gender equality policy. The book's focus on social partners provides important insights that help to explain the persistence of gender inequalities and the difficulties of adopting and implementing policies to combat them. This volume should appeal to students and researchers of gender studies, politics, European politics, employment relations and international relations as well as to policymakers engaged in addressing gender inequalities in the labour market.

Using IT in Primary School History Lez Smart, 1996-01-11. The UK National Curriculum requires children to develop an IT capability through the different subject areas. This book for non-IT specialists aims to help humanities teachers use IT to enhance and facilitate children's learning. The author considers how children's historical and geographical knowledge, skills and understanding can be better developed through use of IT and how their IT capability can be developed in this context.
